Google Associate Cloud Engineer Exam certification is recognized globally and is a valuable asset for anyone looking to start or advance their career in cloud computing. With the right preparation and training, anyone can pass Associate-Cloud-Engineer exam and join the growing community of GCP professionals.

Google Associate Cloud Engineer Exam Sample Questions (Q113-Q118):

NEW QUESTION # 113

A colleague handed over a Google Cloud project for you to maintain. As part of a security checkup, you want to review who has been granted the Project Owner role. What should you do?

- A. Navigate to Identity-Aware Proxy and check the permissions for these resources.
- **B. Use the `gcloud projects get-iam-policy` command to view the current role assignments.**
- C. Enable Audit logs on the IAM & admin page for all resources, and validate the results.
- D. In the Google Cloud console, validate which SSH keys have been stored as project-wide keys.

Answer: B

Explanation:

The `gcloud projects get-iam-policy` command displays the IAM policy for a project, which includes the roles and members assigned to those roles. The Project Owner role grants full access to all resources and actions in the project. By using this command, you can review who has been granted this role and make any necessary changes. * 2: `gcloud projects get-iam-policy` | Cloud SDK Documentation | Google Cloud

* 3: Understanding roles | Cloud IAM Documentation | Google Cloud

NEW QUESTION # 114

You are deploying an application to a Compute Engine VM in a managed instance group. The application must be running at all times, but only a single instance of the VM should run per GCP project. How should you configure the instance group?

- **A. Set autoscaling to On, set the minimum number of instances to 1, and then set the maximum number of instances to 1.**
- B. Set autoscaling to Off, set the minimum number of instances to 1, and then set the maximum number of instances to 1.
- C. Set autoscaling to Off, set the minimum number of instances to 1, and then set the maximum number of instances to 2.
- D. Set autoscaling to On, set the minimum number of instances to 1, and then set the maximum number of instances to 2.

Answer: A

NEW QUESTION # 115

You created several resources in multiple Google Cloud projects. All projects are linked to different billing accounts. To better estimate future charges, you want to have a single visual representation of all costs incurred. You want to include new cost data as soon as possible. What should you do?

- **A. Configure Billing Data Export to BigQuery and visualize the data in Data Studio.**
- B. Visit the Cost Table page to get a CSV export and visualize it using Data Studio.
- C. Use the Reports view in the Cloud Billing Console to view the desired cost information.
- D. Fill all resources in the Pricing Calculator to get an estimate of the monthly cost.

Answer: A

NEW QUESTION # 116

You need to grant access for three users so that they can view and edit table data on a Cloud Spanner instance. What should you do?

- A. Run `gcloud iam roles describe roles/spanner.databaseUser`.

Add the users to the role.

- B. Run `gcloud iam roles describe roles/spanner.databaseUser`.
Add the users to a new group. Add the group to the role.
- C. Run `gcloud iam roles describe roles/spanner.viewer - -project my-project`.
Add the users to a new group. Add the group to the role.
- D. Run `gcloud iam roles describe roles/spanner.viewer - -project my-project`.
Add the users to the role.

Answer: B

Explanation:

As recommended practice, for 3 users creating a group and assigning role to that is the correct method.

NEW QUESTION # 117

A colleague handed over a Google Cloud project for you to maintain. As part of a security checkup, you want to review who has been granted the Project Owner role. What should you do?

- A. Enable Audit logs on the IAM & admin page for all resources, and validate the results.
- B. Navigate to Identity-Aware Proxy and check the permissions for these resources.
- C. Use the `gcloud projects get-iam-policy` command to view the current role assignments.
- D. In the Google Cloud console, validate which SSH keys have been stored as project-wide keys.

Answer: C

Explanation:

The `gcloud projects get-iam-policy` command displays the IAM policy for a project, which includes the roles and members assigned to those roles. The Project Owner role grants full access to all resources and actions in the project. By using this command, you can review who has been granted this role and make any necessary changes.
