ATLASSIAN Jira Administration for Data Center Sample Questions (Q60-Q65):

NEW QUESTION # 60

You need to find all Tasks and Stories which match the criteria below

- * were created after the beginning of last week
- * are associated with an epic
- * the status never changed since creation

You created a filter with the JQL query below, but it returns the wrong results.

created > startOfWeek(-1) AND "Epic Link" is not EMPTY AND issuetype = Task AND issuetype = Story AND NOT status changed Which part of the query is causing the problem?

- A. "Epic Link" is not EMPTY
- B. created > startOfWeek(-1)
- **C. issuetype = Task AND issuetype = Story**
- D. NOT status changed

Answer: C

NEW QUESTION # 61

Teresa needs to perform several tasks.

Which task definitely requires her to be a Jira system admin?

- A. Backup Jira data.
- B. Add groups to application access.
- **C. View the audit log.**
- D. Configure issue collectors.
- E. Configure mail handlers.

Answer: C

NEW QUESTION # 62

Currently, users log time and enter a comment on a transition screen when closing issues. Now, they want the comment to be copied automatically to the work log description. Identify the configuration area that needs to be modified.

- A. global time tracking settings
- **B. field configuration**
- C. workflow condition
- D. global permissions
- E. issue layout

Answer: B

NEW QUESTION # 63

Developers must edit the Time Spent they previously entered on their assigned issues. They should not have more permissions than required. Which permission is NOT required?

- A. Work On Issues
- B. Assignable User
- **C. Assign Issues**
- D. Browse Projects
- E. Edit Own Worklogs

Answer: C

NEW QUESTION # 64

Your project is configured as follows:

- * several issue types, components and versions
- * a single, simple unique workflow - OPEN --> IN PROGRESS --> DONE
- * Fix Version(s) can be set on the transition to IN PROGRESS
- * Component(s) are required and new issues are automatically assigned to component leads
- * all component leads are members of the Administrators project role

Now you have to implement the following requirements:

- * an affected version needs to be added to the issue upon creation
- * only component leads can choose or add a fix version when the issue is transitioned to IN PROGRESS What two configurations are prerequisites to meet the requirements? (Choose two.)

- **A. Add a condition limiting execution to the IN PROGRESS transition to the current assignee.**

- B. Ensure Affects Versions/s is required in the used field configurations and on the correct screen.
- C. Ensure that only members of the Administrators project role have Resolve Issues permission.
- D. Add a condition limiting execution to the Administrators role to the IN PROGRESS transition and require Fix Version/s to be set.
- E. Ensure Component/s, Affects Versions/s, and Fix Version/s are required in the used field configurations.

Answer: A,C
