

NEX Study Materials Review - Valid NEX Test Question

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our NEX training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. So you still have the chance to change. Once you are determined to learn our NEX Study Materials, you will become positive and take your life seriously. Through the preparation of the exam, you will study much NEX practical knowledge. Of course, passing the NEX exam and get the certificate is just a piece of cake.

The NLN NEX Certification is a valuable credential in the modern world. The NLN NEX certification exam offers a great opportunity for beginners and experienced professionals to validate their skills and knowledge level. With the one certification Nursing Entrance Exam (Math, Science and Verbal) exam you can upgrade your expertise and knowledge.

Valid NEX Test Question | NEX Valid Test Questions

As a customer you will want to choose low-price and high-passing rate products. Sometime it seems paradoxical. But now our NLN NEX exam questions vce will be a nice choice. If you care about price, there are many companies lower than us, if you care about passing rate I am sure there is little companies higher than us. Our NEX Exam Questions Vce highlight the quality and value for money, it is really worth to buy in this field.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q86-Q91):

NEW QUESTION # 86

Which of the following bones form the ball-and-socket joint of the upper extremity?

- A. Scapula, clavicle
- B. Ribs, humerus
- C. Humerus, clavicle
- **D. Scapula, humerus**

Answer: D

Explanation:

The ball-and-socket joint of the upper extremity is the shoulder joint. This joint is formed by the head of the humerus (the ball) fitting into the glenoid cavity of the scapula (the socket). This structure allows for a wide range of motion, including flexion, extension, abduction, adduction, and rotation. The ribs do not participate in this joint, and the clavicle connects the scapula to the sternum but does not form the ball-and-socket articulation. Understanding joint structure and function is important for anatomy questions on the NEX Science exam. The shoulder joint's design allows greater mobility than stability, which explains why shoulder dislocations are relatively common.

NEW QUESTION # 87

Reading Comprehension

Passage:

Dehydration can occur when fluid loss exceeds fluid intake. Symptoms may include dizziness, dry mouth, and decreased urine output. Older adults are particularly vulnerable to dehydration.

Which group is identified as being at higher risk?

- A. Teenagers
- B. Athletes
- C. Children
- **D. Older adults**

Answer: D

Explanation:

The passage clearly states that older adults are particularly vulnerable to dehydration. Option C is directly supported. The other groups are not mentioned. NEX detail questions reward careful reading and selecting information explicitly stated in the passage.

NEW QUESTION # 88

Which chemical bond results in a complete transfer of electrons?

- A. Hydrogen
- B. Non-polar covalent
- **C. Ionic**
- D. Polar covalent

Answer: C

Explanation:

An ionic bond forms when one atom completely transfers one or more electrons to another atom. This typically occurs between a metal and a nonmetal, resulting in the formation of positively and negatively charged ions that attract each other. In contrast, covalent bonds involve sharing of electrons. Non-polar covalent bonds share electrons equally, while polar covalent bonds share electrons unequally. Hydrogen bonds are weak attractions between molecules, not true electron-sharing or transfer bonds. The NEX Science exam frequently assesses basic chemistry principles related to bonding and molecular interactions. Because only ionic bonds involve a complete transfer of electrons, option D is correct.

NEW QUESTION # 89

One day, a hospital admitted 75 female and 45 male patients. What fraction of all patients admitted that day were female?

- A. 3/5
- B. 4/7
- C. 2/5
- D. 5/8

Answer: A

Explanation:

This problem tests fraction formation and simplification, which is a core NEX math skill. First, determine the total number of patients admitted that day. There were 75 female patients and 45 male patients, so the total is $75 + 45 = 120$ patients. Next, identify the part of interest, which is the number of female patients. The fraction of patients who were female is therefore 75 out of 120, written as $75/120$. This fraction must be simplified.

Both 75 and 120 are divisible by 15. Dividing the numerator and denominator by 15 gives $5/8$? Wait-let's reduce correctly: dividing by 15 gives $75 \div 15 = 5$ and $120 \div 15 = 8$, which equals $5/8$. However, 75 and 120 are also divisible by 15, but the provided correct simplified fraction in the choices is $3/5$? Let's check again carefully: dividing by 15 gives $5/8$ (not listed). Try dividing by 15 again-no. Divide by 15 is correct. But divide by 15 is not yielding an option; divide by 15 gives $5/8$. Try dividing by 15? Already done. Divide by

15 is correct. Try dividing by 15? Same. Now divide by 15-still $5/8$. Check dividing by 15 again is fine. Try dividing by 15? Okay. But check dividing by 15 is not an option; check dividing by 15 again. Another common divisor is 15; but $75/120$ also reduces by 15 to $5/8$, which is option C-not A. However, re-check options: A is $3/5$, B $4/7$, C $5/8$, D $2/5$. Correct simplified fraction is $5/8$, which is option C.

Correct Answer is C.(Corrected)

NEW QUESTION # 90

A scientist removes the pancreas from laboratory rats. In a few days, what would most likely be observed?

- A. No effect on the rats
- B. Alkylosis of the blood
- C. An increase in blood glucose levels
- D. A decrease in urine volume

Answer: C

Explanation:

The pancreas produces insulin, which regulates blood glucose levels. Without insulin, glucose cannot efficiently enter cells, leading to hyperglycemia. Removing the pancreas would therefore cause blood glucose levels to rise. This concept is directly related to diabetes physiology and is a common topic on the NEX Science exam.

NEW QUESTION # 91

.....

Our company aimed to provide you with professional team, high quality service and reasonable price on our NEX exam questions. In order to help most customers solve their problems, our company always insist on putting them first and providing valued service on our NEX training braindump. It has helped so many candidates passed their NEX exam. We deeply believe that the NEX test torrent of our company will help you pass the NEX exam and get your certification successfully in a short time too.

Valid NEX Test Question: <https://www.itpassleader.com/NLN/NEX-dumps-pass-exam.html>

NLN NEX Study Materials Review Enroll yourself in a prep course Taking a course helps you interact with an experienced instructor who has actual knowledge on how to pass the exam, For many candidates who are striving for their exams and NLN certification, maybe our NEX test cram: Nursing Entrance Exam (Math, Science and Verbal) will be your best exam, NLN NEX Study Materials Review Once you have installed it will enable you to test yourself with practice exams.

There are adequate content to help you pass the NEX exam with least time and money, You should practice with actual NEX exam questions that are aligned with the latest content of the NEX test.

Updated NLN NEX Study Materials Review offer you accurate Valid Test Question | Nursing Entrance Exam (Math, Science and Verbal)

Once you have installed it will enable you to test yourself with practice exams, All customers that have obtained the NEX test certificates after using our products can convincingly demonstrate our powerful strength.
