

# Training 100-160 Materials - 100-160 Latest Exam Cost

DOWNLOAD the newest VCE4Plus 100-160 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1TAi6kGuLpwkxfanxYtwPb2FzxEsEZP6F>

Preparing with outdated 100-160 exam questions results in failure and loss of time and money. You can get success in the exam on first attempt and save your resources with the help of updated exam questions. We offer Cisco 100-160 real questions to help pupils in getting ready for the exam in a short time. Students who choose VCE4Plus will get the latest and updated exam questions they need to prepare for the 100-160 examination in a short time.

## Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection</li><li>prevention systems, providing insight into how threats are mitigated within network environments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.</li></ul>

## Pass Guaranteed Cisco - 100-160 - Cisco Certified Support Technician (CCST) Cybersecurity Unparalleled Training Materials

Try Cisco 100-160 Exam Questions In Various Formats That Are Simple to Use. VCE4Plus offers Cisco Exam Questions in three formats to make preparation simple and allow you to study at your own pace.

## Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q287-Q292):

### NEW QUESTION # 287

Which of the following is an example of a public cloud service?

- A. Intrusion Detection System (IDS)
- B. Firewall
- C. Virtual Private Network (VPN)
- D. Amazon Web Services (AWS)

**Answer: D**

Explanation:

Amazon Web Services (AWS) is a well-known public cloud service provider. Public cloud services are provided by third-party vendors and are available to multiple users over the internet.

### NEW QUESTION # 288

How can vulnerabilities be discovered in a network or system?

- A. By implementing strong cryptographic protocols.
- B. By conducting penetration testing.
- C. By using firewalls and antivirus software.
- D. By monitoring network traffic.

**Answer: B**

Explanation:

Penetration testing, also known as ethical hacking, is a method used to discover vulnerabilities in a network or system. It involves simulating an attack on the system to identify weaknesses and potential entry points for attackers. Penetration testing can help organizations uncover vulnerabilities before they can be exploited by malicious actors.

### NEW QUESTION # 289

What is an attack vector in cybersecurity?

- A. The likelihood of a cyber attack taking place
- B. The path or means through which an attacker can exploit vulnerabilities
- C. A vulnerability in a system that can be exploited
- D. The method used by an attacker to gain unauthorized access

**Answer: B**

Explanation:

An attack vector refers to the pathway or means by which an attacker can carry out a successful exploit or gain unauthorized access to a system. It can be a network protocol, software vulnerability, social engineering technique, malicious email attachment, or any other method that allows an attacker to exploit vulnerabilities. Understanding attack vectors is crucial for implementing effective defenses and mitigating risks.

### NEW QUESTION # 290

What is the primary reason for implementing multi-factor authentication in a cloud environment?

- A. To simplify the authentication process
- B. To reduce costs
- C. To provide an additional layer of security
- D. To improve performance

**Answer: C**

Explanation:

Option 1: Correct. Implementing multi-factor authentication provides an additional layer of security by requiring users to provide multiple forms of authentication to access cloud resources.

Option 2: Incorrect. The primary reason for implementing multi-factor authentication is to provide an additional layer of security, not to simplify the authentication process.

Option 3: Incorrect. The primary reason for implementing multi-factor authentication is to provide an additional layer of security, not to reduce costs.

Option 4: Incorrect. The primary reason for implementing multi-factor authentication is to provide an additional layer of security, not to improve performance.

### NEW QUESTION # 291

Which of the following is a principle of data security?

- A. Firewall
- **B. Encryption**
- C. Intrusion Detection System
- D. Data Masking

**Answer: B**

Explanation:

Option 1: Correct. Encryption is a principle of data security that involves converting data into a form that is unreadable by unauthorized users. This helps protect the confidentiality of data.

Option 2: Incorrect. A firewall is a network security device that monitors and filters incoming and outgoing network traffic based on predetermined security rules. While it plays a role in data security, it is not a principle of data security.

Option 3: Incorrect. An Intrusion Detection System (IDS) is a device or software application that monitors network or system activities for malicious activities or policy violations and produces reports. While it plays a role in data security, it is not a principle of data security.

Option 4: Incorrect. Data masking is a technique that replaces sensitive data with fictitious data to protect the privacy of data. While it plays a role in data security, it is not a principle of data security.

### NEW QUESTION # 292
