

Practical HPE2-W12 Information, HPE2-W12 Exam Discount

HPE2-W12	
Exam Name:	Selling HPE Aruba Networking Solutions
Exam Type:	Web-based
Duration:	1 hour
Number of Questions:	40
Passing Score:	70%

P.S. Free & New HPE2-W12 dumps are available on Google Drive shared by Lead2Passed: <https://drive.google.com/open?id=1tJm-ZJ2mhnbcUcBFSuEtXah8mwMjHn35>

As we all know, if everyone keeps doing one thing for a long time, as time goes on, people's attention will go from rising to falling. Experiments have shown that this is scientifically based and that our attention can only play the best role in a single period of time. The HPE2-W12 test material is professional editorial team, each test product layout and content of proofreading are conducted by experienced professionals who have many years of rich teaching experiences, so by the editor of fine typesetting and strict check, the latest HPE2-W12 Exam Torrent is presented to each user's page is refreshing, but also ensures the accuracy of all kinds of learning materials is extremely high.

Lead2Passed is the best choice for those in preparation for exams. Many people have gained good grades after using our HPE2-W12 exam materials, so you will also enjoy the good results. Our free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of our HPE2-W12 Exam Prep are more or less involved with heated issues and for customers who prepare for the HPE2-W12 exam.

To Become a Certified Holder Prepare With Actual HP HPE2-W12 Questions

As this new frontier of personalizing the online experience advances, our HPE2-W12 exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the HPE2-W12 study braindumps, you can leave us a message on the web page or email us. We promise to give you a satisfying reply as soon as possible. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our HPE2-W12 test guide' growth.

HP Selling HPE Aruba Networking Solutions Sample Questions (Q39-Q44):

NEW QUESTION # 39

What is one security feature that acts as a distinguishing value of HPE Aruba Networking Central?

- A. Ability to encrypt traffic in the wireless network.
- B. Filtering of remote users' access to SaaS applications to prevent data loss.
- C. AI-based security recommendations for firmware upgrades.
- D. A stateful firewall to filter VM-to-VM traffic in the data center.

Answer: C

Explanation:

The correct answer is D because Aruba Central leverages AI-driven security intelligence to provide proactive recommendations, including firmware and configuration updates, to mitigate vulnerabilities and strengthen overall network security. This capability distinguishes Central by combining AI for networking (AIOps) with security posture management, ensuring that networks remain resilient against emerging threats.

NEW QUESTION # 40

A senior IT manager tells you that she wants IT staff members to spend less time troubleshooting issues so they have more time to focus on new initiatives. How can HPE Aruba Networking deliver the senior IT manager's desired outcome?

- A. HPE Aruba User Experience Insight (UXI) helps IT determine why data center applications are not performing as well as they should.
- B. HPE Aruba Networking ClearPass monitors network devices' performance and automatically notifies IT admins of performance issues.
- C. HPE Aruba Networking Edge-to-Cloud solutions rely on AI to automate the onboarding of devices.
- **D. HPE Aruba Networking Central with AI for Networking accelerates troubleshooting by providing insights and recommendations that help remedy issues.**

Answer: D

Explanation:

The correct answer is D because Aruba Central with AI for Networking leverages machine learning and AI-powered insights to accelerate troubleshooting, provide root-cause analysis, and deliver prescriptive recommendations. This reduces the time IT staff spends on manual problem-solving, freeing them to focus on innovation and strategic initiatives.

NEW QUESTION # 41

What common challenge for network admins is created by an expanding remote workforce?

- A. Home equipment often lacks support for Wi-Fi 6.
- B. The shift in traffic away from the campus makes optimization difficult.
- C. Data center networks are not designed to receive so much external traffic.
- **D. Typical VPN solutions are complex and take a lot of time to support.**

Answer: D

Explanation:

The correct answer is B because as remote workforces expand, traditional VPN solutions have become a major challenge for IT teams. VPNs are complex to scale, create management overhead, and introduce performance bottlenecks. HPE Aruba Networking highlights that organizations increasingly need to move from VPN-based access to Zero Trust Network Access (ZTNA) and SASE models to simplify operations and improve security.

Relevant extracts from official HPE Aruba Networking documentation:

- * "Traditional VPNs are complex, hard to scale, and increase operational burden for IT teams supporting large remote workforces."
 - * "Remote workforce expansion has exposed the limitations of VPN architectures, including poor user experience, difficulty scaling, and excessive troubleshooting requirements."
 - * "ZTNA provides a simplified alternative to VPN by offering application-specific access with least privilege, reducing complexity and support requirements."
 - * "With Aruba's SSE and ZTNA solutions, organizations can eliminate VPN sprawl while improving both security and user experience." Why the other options are incorrect:
 - * A While external traffic does increase, modern data centers are designed to handle distributed traffic patterns-this is not the primary challenge.
 - * C Lack of Wi-Fi 6 support at home is a limitation but not a core IT admin challenge.
 - * D Traffic shift away from campus is true, but the bigger issue is the complexity of managing VPN solutions for remote users.

NEW QUESTION # 42

What is one way organizations can ensure their wireless network is always available?

- A. Connect APs to HPE Aruba Networking CX switches and configure device profiling to prioritize delivering PoE to the APs.
- B. Receive troubleshooting insights from HPE Aruba Networking ClearPass Policy Manager.
- **C. Use HPE Aruba Networking ClearPass Device Insight to proactively detect issues before they cause problems.**
- D. Enable device profiling on the APs to prioritize wireless access for top users and applications.

Answer: C

Explanation:

The correct answer is B because ClearPass Device Insight provides continuous visibility and profiling of all devices—including IoT, BYOD, and managed endpoints—on the network. By proactively detecting unknown, rogue, or misbehaving devices before they cause service or security issues, organizations can ensure higher wireless availability and operational continuity.

Relevant extracts from official HPE Aruba Networking documentation:

* "ClearPass Device Insight leverages machine learning and crowdsourced device fingerprints to automatically discover, classify, and monitor all devices connected to the network."

* "With proactive detection of abnormal behavior, IT can address issues before they affect network availability or security."

* "Device Insight closes visibility gaps by identifying unmanaged IoT and BYOD devices, reducing risks that could otherwise disrupt wireless service."

* "This proactive approach ensures that the wireless network remains resilient and available to support business-critical users and applications." Why the other options are incorrect:

* A Device profiling on APs alone cannot guarantee availability; it is part of traffic management, not proactive issue detection.

* CPoE prioritization ensures APs have power but does not address ongoing availability challenges like rogue devices or abnormal behavior.

* DClearPass Policy Manager enforces access control policies but does not provide proactive device visibility and anomaly detection to maintain availability.

NEW QUESTION # 43

Which Aruba technology supports AI-based network troubleshooting?

- A. Static monitoring
- **B. Aruba Central AI Insights**
- C. CLI diagnostics
- D. SNMP polling only

Answer: B

Explanation:

AI Insights analyzes telemetry to detect issues and recommend fixes.
