Our company is glad to provide customers with authoritative study platform. Our 2V0-11.25 quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our 2V0-11.25 Quiz torrent, you will have the chance to enjoy the authoritative study platform provided by our company.

VMware 2V0-11.25 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios. |
| Topic 2 | <ul style="list-style-type: none">IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers. |

| | |
|---------|--|
| Topic 3 | <ul style="list-style-type: none"> Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments. |
| Topic 4 | <ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network storage design. |
| Topic 5 | <ul style="list-style-type: none"> Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments. |

VMware 2V0-11.25 Prep Guide - 2V0-11.25 Exam Questions Fee

The pass rate is 98.75% for 2V0-11.25 exam braindumps, and you can pass your exam in your first attempt if you choose us. Many candidates have recommended our 2V0-11.25 exam materials to their friends for the high pass rate. In addition, we are pass guarantee and money back guarantee if you fail to pass the exam. 2V0-11.25 Exam Braindumps cover most of knowledge points for the exam, and you can increase your professional ability in the process of learning. We offer you free update for 365 days for 2V0-11.25 training materials after payment, and the update version will be sent to your email automatically.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q133-Q138):

NEW QUESTION # 133

An organization is planning to manage a diverse set of databases across multiple VMware Cloud Foundation (VCF) environments using Data Services Manager.

Which three capabilities of Data Services Manager would help the organization managing these databases efficiently? (Choose three.)

- A. Integration with vSAN for optimized storage management
- B. Automated database provisioning and deployment**
- C. Policy-based backup and recovery for databases**
- D. Automated database migration between on-premises and cloud environments
- E. Centralized monitoring and alerting for all managed databases**

Answer: B,C,E

Explanation:

Centralized monitoring and alerting gives visibility into performance and health across all databases.

Policy-based backup and recovery ensures consistent protection and recovery SLAs for each database.

Automated provisioning and deployment accelerates rollout of new database instances with standardized configurations.

NEW QUESTION # 134

An administrator is tasked with deploying a new VMware Cloud Foundation (VCF) instance. The management domain is designed to be created with three virtual distributed switches (VDS) configured as follows:

VDS1 - used for management and vMotion traffic

VDS2 - used for vSAN traffic

VDS3 - used for NSX Overlay traffic

What action would the administrator take to deploy the designed configuration?

- A. The design must be changed to ensure vSAN and NSX overlay traffic are on the same VDS.
- B. The ESXi hosts have to be configured with twelve physical NICs to ensure redundancy.
- **C. A JSON file must be prepared with the defined configuration and used to run the bring-up process.**
- D. vSphere Distributed Switch Profile 2 must be selected in the VCF Deployment parameter workbook.

Answer: C

NEW QUESTION # 135

An organization is integrating VMware vCenter with Active Directory (AD) to streamline user authentication.

As part of this process, the administrator needs to add AD as an identity source in vCenter.

Which three steps must be performed to successfully add AD as an identity source? (Choose three.)

- A. Reboot the vCenter to apply the identity source settings.
- **B. Enter the Domain Name and the credentials of an AD user with a minimum of read-only access to Base DN for users and groups.**
- C. Configure DNS settings on all ESXi hosts to point to the AD DNS servers.
- **D. Select 'Identity Sources' and choose 'Active Directory Domain'.**
- E. Create an Active Directory object for the vCenter Server Appliance.
- **F. Navigate to the vCenter Single Sign-On configuration in the vSphere Client.**

Answer: B,D,F

Explanation:

You must provide the AD domain name plus credentials (read-only is sufficient) to bind and query the Base DN for users and groups.

In the vSphere Client's Identity Sources section, choose "Active Directory Domain" when adding a new source.

These options are found under Administration # Single Sign-On # Configuration # Identity Sources in the vSphere Client.

NEW QUESTION # 136

An administrator has been tasked with deploying a new VMware Cloud Foundation (VCF) environment and is preparing the physical hosts that will be used for the management domain. The administrator has completed the following tasks for all of the physical hosts:

The required version of ESXi has been installed.

Networking has been configured for the ESXi management interface.

DNS entries have been created for forward and reverse name resolution.

NTP has been configured and the time synchronized with a centralized time source.

VLAN 10 has been presented to the ESXi hosts on the physical network infrastructure for the VCF ESXi management network. A combination of which two additional tasks must the administrator complete before starting the bring-up of the management domain? (Choose two.)

- **A. Configure VLAN 10 on the VM network Port Group of the vSphere Standard Switch on each ESXi host.**
- **B. Replace the SSL certificate with either a CA signed or self-signed certificate on each ESXi host.**
- C. Create a new vSphere Standard Switch for the VCF ESXi management network on each ESXi host.
- D. Configure a new shared NFS datastore on each ESXi host.
- E. Upload the Cloud Builder appliance OVA file to the new shared NFS datastore.

Answer: A,B

NEW QUESTION # 137

Following an internal security audit of the new VMware Cloud Foundation (VCF) instance, the following audit finding was documented for priority remediation:

All users from the custom administrators group could access the Direct Console User Interface (DCUI) on all ESXi hosts within the workload domain. RISK=High, IMPACT=High The company IT security policy around accessing ESXi servers states the following:

Users within the custom administrators group must access ESXi host configurations from within vCenter Server or the vSphere Web Client only.

Only users within the restricted administrators group must be allowed direct access to ESXi hosts.

Which two actions should the administrator perform on each of the hosts within the workload domain to remediate the security finding? (Choose two.)

- A. Add the restricted administrators group to the DCUI.Access advanced system setting.
- B. Enable Strict Lockdown Mode.
- C. Disable SSH and the ESXi Shell.
- D. Enable Normal Lockdown Mode.
- E. Add the custom administrators group to the DCUI.Access advanced system setting.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From the VMware vSphere Security Guide and official documentation for Lockdown Mode:

C . Add the restricted administrators group to the DCUI.Access advanced system setting.

Exact Extract:

"You can add users or groups to the DCUI.Access advanced system setting to allow them to access the Direct Console User Interface (DCUI) even when the host is in lockdown mode. Ensure that only the authorized group (restricted administrators group) is included in this setting, and remove any other groups that should not have DCUI access." E . Enable Normal Lockdown Mode.

Exact Extract:

"When Normal Lockdown Mode is enabled, only users and groups in the DCUI.Access list can log in to the Direct Console User Interface (DCUI) of the host. All other local or direct access is denied unless explicitly permitted in the DCUI.Access list. This mode allows vCenter-controlled access for all other administrative operations, which matches the company's security policy requirements."

Why Not the Other Options?

A: Disabling SSH and ESXi Shell is best practice but is not directly related to DCUI or lockdown mode.

B: Adding the custom administrators group would violate the stated security policy.

D: Strict Lockdown Mode prevents all DCUI access except for the root user, which is more restrictive than what the policy requires. The policy permits a specific group to have DCUI access, which is supported in Normal Lockdown Mode, not Strict.

Summary:

To meet the security policy and remediate the audit finding, the administrator must add only the restricted administrators group to the DCUI.Access setting (C) and enable Normal Lockdown Mode (E) on each ESXi host.

This configuration ensures that only members of the restricted administrators group can directly access the DCUI, and all other users (including those from the custom administrators group) must access the host through vCenter Server or the vSphere Web Client, fully aligning with the official VMware documentation and security best practices.

NEW QUESTION # 138

.....

In order to help customers solve the problem, our VMware Cloud Foundation 5.2 Administrator test torrent support the printing of page. We will provide you with three different versions, the PDF version allow you to switch our 2V0-11.25 study torrent on paper. You just need to download the PDF version of our 2V0-11.25 Exam Prep, and then you will have the right to switch study materials on paper. We believe it will be more convenient for you to make notes. Our website is very secure and regular platform, you can be assured to download the version of our 2V0-11.25 study torrent.
