

Latest 300-740 Exam Dumps Quiz Prep and preparation materials - PracticeDump

What's more, part of that PracticeDump 300-740 dumps now are free: https://drive.google.com/open?id=1edMiBE5erQO-iUMT_MlbRHYXWgvaR6Py

Cisco 300-740 certified examinations questions are collected and edited by latest exam teaching program and real test questions materials. We are engaged in updating our training materials constantly. If you are afraid that once you purchase our current version of 300-740 Certified examinations questions, then there is new update version, current version will be out, please rest assured that you can download free our latest version one we release new version within one year.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Network and Cloud Security:This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.

Topic 2	<ul style="list-style-type: none"> • Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 3	<ul style="list-style-type: none"> • Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.
Topic 4	<ul style="list-style-type: none"> • User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 5	<ul style="list-style-type: none"> • Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 6	<ul style="list-style-type: none"> • SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 7	<ul style="list-style-type: none"> • SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.

2026 Cisco Updated New 300-740 Exam Labs

With the rapid development of the economy, the demands of society on us are getting higher and higher. If you can have 300-740 certification, then you will be more competitive in society. We have chosen a large number of professionals to make 300-740 learning question more professional, while allowing our study materials to keep up with the times. Of course, we do it all for you to get the information you want, and you can make faster progress. You can also get help from 300-740 Exam Training professionals at any time when you encounter any problems. We can be sure that with the professional help of our 300-740 test guide you will surely get a very good experience. Good materials and methods can help you to do more with less. Choose 300-740 test guide to get you closer to success.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q131-Q136):

NEW QUESTION # 131

Which security policy is most relevant for controlling access to SaaS applications like Office 365, Workday, and Salesforce?

- **A. Implementing access control based on user identity and device security posture**
- B. Allowing all outbound traffic without inspection
- C. Unlimited data transfer policies
- D. Blocking all cloud services to ensure network security

Answer: A

NEW QUESTION # 132

Converged multicloud policy ensures:

- A. Separate policies for each cloud environment
- **B. Consistent security policies across all cloud environments**
- C. Decreased reliance on cloud security
- D. Increased complexity in security management

Answer: B

NEW QUESTION # 133

In the event of a security breach, it's crucial to _____ the incident to the relevant stakeholders and authorities.

- A. fabricate
- **B. report**
- C. ignore
- D. delete

Answer: B

NEW QUESTION # 134

Refer to the exhibit. An engineer must configure a remote access IPsec/IKEv1 VPN that will use AES256 and SHA256 on a Cisco ASA firewall. The indicated configuration was applied to the firewall; however, the tunnel fails to establish. Which two IKEv1 policy commands must be run to meet the requirement? (Choose two.)

- **A. encryption aes-256**
- B. integrity aes-256
- **C. hash sha-256**
- D. ipsec-proposal sha-256-aes-256
- E. ipsec-proposal AES256-SHA256

Answer: A,C

Explanation:

In IKEv1 policy configuration for Cisco ASA, two key commands are required to define the encryption and hashing algorithms:

A: encryption aes-256 defines the encryption method for the IKE SA.

E: hash sha-256 ensures SHA-256 is used as the integrity mechanism during IKE phase 1.

According to Cisco documentation and SCAZT (Section 1: Cloud Security Architecture, Pages 19-22), these two components are essential to negotiating a secure VPN tunnel. The provided config uses group 1 (modp768), which is weak by today's standards and could also lead to negotiation failure. However, from the available options, encryption and hash are the two required for tunnel success.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 1, Pages 19-22

NEW QUESTION # 135

What is the purpose of the security operations toolset within the Cisco Security Reference Architecture?

- A. To provide connectivity to cloud services
- B. To store digital certificates
- C. To enforce data privacy laws
- **D. To manage and analyze security data**

Answer: D

NEW QUESTION # 136

.....

How to realize your dream? PracticeDump Cisco 300-740 braindump is the royal road to success when preparing for Cisco 300-740 test. PracticeDump provide you with exam prep, which will pass the exam with assurance.
