SAP C-SIGVT-2506 시험환경에 적응하고 싶은 분은 pdf버전 구매시 온라인버전 또는 테스트엔진 버전을 추가구매하시면 됩니다. 문제는 pdf버전의 문제와 같지만 pdf버전의 문제를 마스터한후 실력테스 가능한 프로그램이기에 SAP C-SIGVT-2506시험환경에 익숙해져 시험을 보다 릴렉스한 상태에서 볼수 있습니다.

SAP C-SIGVT-2506 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Monitoring Transformation Progress using SAP Cloud ALM: This section of the exam measures the capabilities of Cloud ALM Specialists and covers the use of SAP Cloud ALM to track project progress and operational performance. It explains how Cloud ALM supports implementation tasks, monitors system health, and provides visibility into key milestones. Candidates learn how to use the platform to support continuous governance and ensure transformation activities remain on track.

주제 2	<ul style="list-style-type: none"> Using LeanIX for Enterprise Architecture Validation: This section of the exam measures the abilities of Enterprise Architects and focuses on using LeanIX to validate architecture landscapes. It includes understanding how LeanIX maps applications, data, and business capabilities to support modernization efforts. The domain emphasizes validating architecture readiness and ensuring that the existing IT landscape aligns with transformation goals.
주제 3	<ul style="list-style-type: none"> Validating Business Processes with SAP Signavio: This section of the exam measures the skills of Business Process Analysts and covers the use of SAP Signavio to evaluate, analyze, and validate business processes during transformation projects. It focuses on understanding how process insights support decision-making and how Signavio helps identify gaps between current operations and desired outcomes. The section ensures candidates can apply Signavio tools to support business process optimization.
주제 4	<ul style="list-style-type: none"> Exploring SAP Cloud Strategy: This section of the exam measures the skills of Cloud Strategy Analysts and focuses on SAP overall cloud vision, deployment models, and strategic direction. It includes understanding the value of cloud adoption, SAP portfolio of cloud solutions, and how organizations benefit from modern cloud architectures. The section validates foundational knowledge of SAP cloud ecosystem and its relevance to transformation.
주제 5	<ul style="list-style-type: none"> Exploring the SAP Business Transformation Methodology: This section of the exam measures the skills of Transformation Consultants and introduces SAP structured methodology for guiding organizations through transformation programs. It covers the stages, principles, and frameworks used to support business evolution, ensuring candidates understand how SAP's methodology enables structured planning, execution, and adoption across transformation lifecycles.

C-SIGVT-2506최신버전 시험덤프자료 시험 최신 공부자료

KoreaDumps의SAP C-SIGVT-2506 인증시험덤프는 자주 업데이트 되고, 오래 되고 더 이상 사용 하지 않는 문제들은 바로 삭제해버리며 새로운 최신 문제들을 추가 합니다. 이는 응시자가 확실하고도 빠르게SAP C-SIGVT-2506덤프를 마스터하고SAP C-SIGVT-2506시험을 패스할수 있도록 하는 또 하나의 보장입니다. 매력만점SAP C-SIGVT-2506덤프 강력 추천합니다.

최신 SAP Certified Associate C-SIGVT-2506 무료샘플문제 (Q13-Q18):

질문 # 13

Which method is primarily used to assess process performance and identify improvement opportunities in SAP Signavio?

- A. Tag-Based Filtering
- B. Lifecycle Modelling
- **C. KPI and Scoring**
- D. Interface Mapping

정답: C

설명:

SAP Signavio evaluates business processes using key performance indicators such as cycle times, throughput, automation rates, backlog volumes, and exception counts. These performance metrics are combined with a scoring system that highlights strengths and weaknesses across processes. This KPI-based evaluation helps identify bottlenecks, inconsistencies, or inefficiencies that should be targeted for improvement. The other options support documentation or filtering but are not the main method for performance assessment.

질문 # 14

What benefit does SAP LeanIX Insights provide to stakeholders?

- A. Lifecycle tag duration tracking

- B. Cost allocation mapping
- C. Enhanced survey management
- D. Visibility into current and target architecture alignment

정답: D

설명:

SAP LeanIX Insights summarizes architectural information to help stakeholders compare the current IT landscape with the planned future architecture. This includes visualizing application portfolios, evaluating capability support, and identifying technical or functional gaps. Insights offer clarity on the transformation roadmap, ensuring that business capabilities and IT strategy remain aligned. While LeanIX supports other reporting functions, its primary value in transformation programs is enabling clear visibility between "as-is" and "to-be" architecture.

질문 # 15

What is the primary role of the SAP Business Technology Platform?

(2 correct answers)

- A. To enable application extension with technologies like machine learning and AI
- B. To provide integration with third-party ecosystems
- C. To provide a platform for onboarding suppliers
- D. To serve as the underlying technology platform for SAP S/4HANA

정답: A,B

설명:

SAP Business Technology Platform (SAP BTP) is designed to be the central innovation and integration layer within SAP's cloud strategy. One of its key roles is to provide integration with third-party ecosystems.

BTP offers a comprehensive integration suite that includes API management, data services, event-driven architecture, and over a thousand prebuilt connectors. This enables seamless communication between SAP applications and external systems, supporting end-to-end processes that extend beyond the SAP landscape.

Organizations rely on this capability to unify their heterogeneous IT environments without modifying the SAP core system.

Another primary role of BTP is to enable application extensions enhanced by machine learning, AI, automation, and low-code/no-code development tools. Through services such as SAP Build, SAP AI Core, workflow automation, and analytics, businesses can create intelligent extensions that improve efficiency and innovate rapidly. These extensions run on the platform independently from SAP S/4HANA, ensuring that the core system remains clean, upgradeable, and stable.

Options B and C do not represent the main purpose of BTP. S/4HANA runs on SAP HANA, not BTP, and onboarding suppliers is a procurement-specific capability typically handled by SAP Ariba-not BTP. Thus, integration capabilities and intelligent extensibility are the two correct primary roles.

질문 # 16

What is the role of "Joule Agents" in SAP's cloud strategy?

- A. They provide interactive customer support.
- B. They offer sales and marketing solutions.
- C. They act as customer support agents.
- D. They orchestrate end-to-end business processes.

정답: D

질문 # 17

What does Cloud ALM Integration & Exception Monitoring track?

- A. Communication failures between systems
- B. Cloud API changes
- C. Cross-system process adherence
- D. Business partner roles

정답: A
