

# C\_S4CPB Examinations Actual Questions & C\_S4CPB Reliable Exam Syllabus

Achieve success by using our corrected SAP C\_S4CPB\_2402 exam questions 2024. We offer success guarantee with our updated C\_S4CPB\_2402 dumps.

## SAP C\_S4CPB\_2402 Exam Questions [Rectified 2024] - Get Ready For The Exam

Are you taking the SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Exam and want to ensure perfect preparation for the C\_S4CPB\_2402 SAP Certified Associate exam? CertsLink [SAP C\\_S4CPB\\_2402 exam questions](#) preparation can help you get there with ease. CertsLink SAP C\_S4CPB\_2402 exam questions is a comprehensive learning package that offers the C\_S4CPB\_2402 SAP Certified Associate exam real questions and answers with key features so that you can prepare for the C\_S4CPB\_2402 SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Exam smoothly.

A green advertisement for CertsLink. At the top left, it says 'CERTSLINK' in white on a dark green background. Below that, it says 'TRY 100% UPDATED EXAM DUMPS' in large white and blue letters. Underneath, it says 'NO.1 EXAM DUMPS PROVIDER'. There are four bullet points: '100% Actual Exam Questions & Answers', 'Instant Download Right After Payment', '24/7 Live Chat With Real Agents', and '90% Same Questions In Your Real Exam'. At the bottom, it says 'www.CertsLink.com'. On the right side, there is a circular image of a smiling man in a suit sitting at a desk with a laptop. There are also social media icons at the top right.

## Real SAP C\_S4CPB\_2402 Exam Questions In The PDF Format

The SAP Certified Associate C\_S4CPB\_2402 exam questions are available in pdf format, which makes it convenient for you to save the SAP

If our SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) guide torrent can't help you pass the exam, we will refund you in full. If only the client provide the exam certificate and the scanning copy or the screenshot of the failure score of C\_S4CPB Exam, we will refund the client immediately. The procedure of refund is very simple. The client can contact us by sending mails or contact us online. We will solve your problem as quickly as we can and provide the best service. Our after-sales service is great as we can solve your problem quickly and won't let your money be wasted.

When you take SAP C\_S4CPB practice exams again and again you get familiar with the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB) real test pressure and learn to handle it for better outcomes. Features of the web-based and desktop C\_S4CPB Practice Exams are similar. The only difference is that the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB) web-based version works online.

## SAP C\_S4CPB Reliable Exam Syllabus, C\_S4CPB Exam Vce

In order to let you understand our products in detail, our SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) test torrent has a free trail service for all customers. You can download the trail version of our C\_S4CPB study torrent before you buy our products, you will develop a better understanding of our products by the trail version. In addition, the buying process of our C\_S4CPB exam prep is very convenient and significant. You will receive the email from our company in 5 to 10 minutes after you pay successfully; you just need to click on the link and log in, then you can start to use our C\_S4CPB study torrent for studying. Immediate download after pay successfully is a main virtue of our SAP Certified -

Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) test torrent. At the same time, you will have the chance to enjoy the 24-hours online service if you purchase our products, so we can make sure that we will provide you with an attentive service.

## SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) Sample Questions (Q12-Q17):

### NEW QUESTION # 12

#### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a Launchpad Space and Page with the information below.

Parameter	Value
Space ID	Z_ALL_EMP_#####
Space Title	General
Space Description	General
Page ID	Z_ALL_EMP_#####

Parameter	Value
Page Title	General
Page Description	General

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

The page values shown in the task are:

Page Title: General

Page Description: General

The screenshot shows the SAP S/4HANA Cloud interface for maintaining business roles. The main heading is "All Employee Role 000013" with the ID "Z\_EMPLOYEES\_ALL\_000013". The role is in a "Draft" status. Below this, there are tabs for "General Role Details", "Business Catalogs (2)", "IAM Apps (3)", "Launchpad Spaces (1)", and "Business Users (0)". The "Launchpad Spaces (1)" tab is active, showing a table of assigned launchpad spaces. The table has columns for Space ID, Space Description, Space Title, Type, Template, and Merge ID. One space is listed with ID "Z\_ALL\_EMP\_000013", Description "General", Title "General", and Type "Managed by Customer".

Space ID	Space Description	Space Title	Type	Template	Merge ID
Z_ALL_EMP_000013	General	General	Managed by Customer		

### Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

### Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

### Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z\_ALL\_EMP\_#####

Space Description: General

Space Title: General

Page ID: Z\_ALL\_EMP\_#####

Page Title: General

Page Description: General

### Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

The page values shown in the task are:

Page Title: General

Page Description: General

### Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

### Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

### Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z\_ALL\_EMP\_#####

Space Description: General

Space Title: General

Page ID: Z\_ALL\_EMP\_#####

Page Title: General

Page Description: General

The image shows two screenshots from the SAP Fiori interface. The top screenshot is the 'Add Launchpad Space' form, and the bottom screenshot is the 'Page Content' view for a specific space.

**Add Launchpad Space Form:**

- Space ID:** Z\_ALL\_EMP\_000457
- Space Description:** General
- Space Title:** General
- Create Page from Business Catalogs and Groups
- Enter page details manually
- Buttons:** Create and Assign Space, Cancel

**Page Content View (Z\_ALL\_EMP\_000013):**

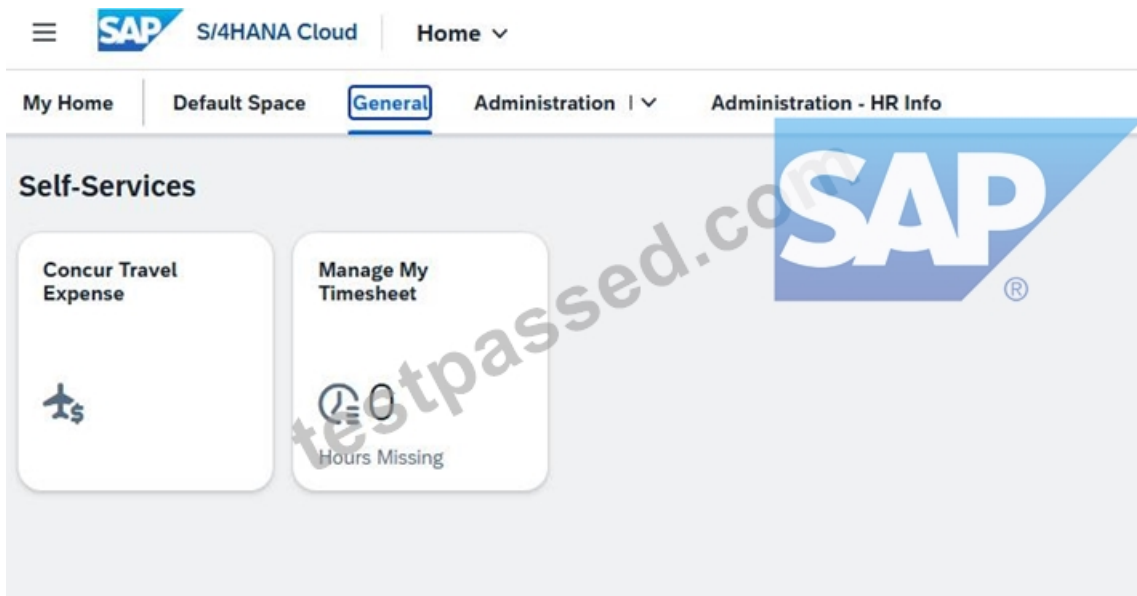

Section Title: Self-Services

To start, drag/add content from catalogs here.

**Derived from Roles / Manually Selected:**

Item	Action
SAP_COM_BC_CTE_ESS_PC Concur - Employee Self-Service	<input type="checkbox"/> Add   v
<input type="checkbox"/> Concur Travel Expense	<input checked="" type="radio"/> Add   v
<input type="checkbox"/> Enhanced WBS Element Search	<input checked="" type="radio"/> Add   v
SAP_HCM_BC_EMP_PC HCM - Employee Self-Service	<input type="checkbox"/> Add   v
<input type="checkbox"/> Manage My Timesheet	<input checked="" type="radio"/> Add   v

**Buttons:** Save, Cancel

**NEW QUESTION # 13**

**SIMULATION**

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (1EG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication System with the information listed below and save.

Parameter	Value
System ID	1EG_SYSTEM_#####
System Name	Bank Integration with File Interface
Host Name	DUMMY
Users for Inbound Communication	Select previously created user (1EG_COMM_USER_#####)

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a Communication System for the integration scenario Bank Integration with File Interface (1EG).

This communication system will later be used in the communication arrangement and will reference the communication user created in the previous task.

Business Scenario Explanation

In this scenario, you are setting up:

Bank Integration with File Interface (1EG)

In SAP S/4HANA Cloud, the technical setup typically requires:

a Communication User

a Communication System

a Communication Arrangement

In Task 13, you created the communication user.

In Task 14, you now create the communication system and link that previously created communication user for inbound communication.

The communication system represents the external or technical integration partner definition used in the scenario.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values shown in the task.

Do not change capitalization, underscores, or spacing.

The communication user assigned in this task must be the one created in the previous step:

1EG\_COMM\_USER\_#####

Required Values

Use the following values exactly as shown in the task image.

Parameter	Value
System ID	1EG_SYSTEM_#####
System Name	Bank Integration with File Interface
Host Name	DUMMY
Users for Inbound Communication	Select previously created user (1EG_COMM_USER_#####)

Example

If your suffix is 000013, then the values become:

System ID = 1EG\_SYSTEM\_000013

System Name = Bank Integration with File Interface

Host Name = DUMMY

Inbound Communication User = 1EG\_COMM\_USER\_000013

Step 1: Open the app "Communication Systems"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Systems

Open the app.

Explanation:

This app is used to create and maintain technical communication systems for integration scenarios.

Because the task explicitly asks to create a Communication System, this is the correct app.

Step 2: Start creating a new Communication System

Inside the Communication Systems app:

Click:

New

Explanation:

This starts the creation of a new communication system record.

Step 3: Enter the System ID

In the communication system creation screen, enter:

System ID = 1EG\_SYSTEM\_#####

Example

If your suffix is 000013, enter:

1EG\_SYSTEM\_000013

Explanation:

This is the technical ID of the communication system.

It must exactly match the task requirement.

Step 4: Enter the System Name

In the System Name field, enter exactly:

Bank Integration with File Interface

Explanation:

This is the descriptive name of the communication system and must be entered exactly as provided.

Step 5: Enter the Host Name

In the Host Name field, enter exactly:

DUMMY

Explanation:

For this simulation, the host is not a real productive endpoint.

The task explicitly requires the placeholder value DUMMY.

Step 6: Maintain the inbound communication user

Locate the section for:

Users for Inbound Communication

Then:

Click Add or select the entry field/value help

Choose the communication user created in the previous task:

1EG\_COMM\_USER\_#####

Example

If your suffix is 000013, select:

1EG\_COMM\_USER\_000013

Explanation:

This is a critical link between the communication user and the communication system.

Without assigning the previously created communication user, the communication system setup is incomplete.

Step 7: Verify the inbound user assignment

After adding the inbound communication user, confirm that the selected user is:

1EG\_COMM\_USER\_#####

Explanation:

This confirms that the system will use the correct technical user for inbound communication in the later communication arrangement.

Step 8: Review all entered values

Before saving, check the following:

System ID = 1EG\_SYSTEM\_#####

System Name = Bank Integration with File Interface

Host Name = DUMMY

Users for Inbound Communication = 1EG\_COMM\_USER\_#####

Explanation:

This review helps avoid validation issues caused by incorrect naming, missing underscores, or selecting the wrong communication user.

Step 9: Save the Communication System

Click:

Save

Explanation:

This finalizes the creation of the communication system.

Without saving, the communication system will not exist for the next task.

Step 10: Verify the saved Communication System

After saving, confirm that the communication system exists and displays the correct values:

1EG\_SYSTEM\_#####

Bank Integration with File Interface

Host = DUMMY

inbound user = 1EG\_COMM\_USER\_#####

Explanation:

This confirms the system is successfully created and ready for the communication arrangement setup in the next step.

Expected Result

After this task is completed successfully:

the communication system exists,

the system ID matches the required naming pattern,

the system name is correct,

the host name is DUMMY,

the previously created communication user is assigned for inbound communication, the system is saved successfully.

**NEW QUESTION # 14**

SIMULATION

## Create a Business User and Assign a Business Role

### Business Scenario

You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the HR Administrator (BR\_ADMINISTRATOR\_HRINFO) business role to your user.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR\_ADMINISTRATOR\_HRINFO

Business Role Description: Administrator - HR Info

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR\_ADMINISTRATOR\_HRINFO

Business Role Description: Administrator - HR Info

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search or launchpad search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to maintain user master data and assign business roles.

All business role assignments for your own user are done here.

Step 2: Search for your own user

In Maintain Business Users:

In the filter/search area, enter your own user name or user ID.

Click Go.

Explanation:

You need to open your own user because the HR Administrator role must be assigned to your own account before continuing the simulation.

Step 3: Open your user record

After the search results appear:

Click your own user in the result list.

Open the detail page.

Explanation:

This opens the business user detail screen where all assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the user detail page:

Click Edit.

Explanation:

Edit mode is required before you can add or remove business roles.

Without edit mode, the Assigned Business Roles tab is display-only.

**General**

First Name: A000457	Building: -	User Name: A000457	Global User ID History: -	Valid To: 31.12.9999	Decimal Format: 1,234,567.89
Last Name: SAP_Learning	Floor: -	User ID: CB9980001019	Locked: <input type="checkbox"/>	Business User Group: -	Date Format: DD.MM.YYYY (Gregorian Date)
Worker ID: A00457	Room: -	Global User ID: -	Valid From: 19.10.2020	Price Category: Advanced	Time Zone: Central Europe
Business Partner (Person ID): 9980001019					Time Format: 24 Hour Format (Example: 12:05:...
E-Mail: learner+A000457@education.cloud.sap					Language: English United States
Phone: -					

**Assigned Business Roles (2)**

Business Role	Business Role ID	Price Category
<input type="checkbox"/> Administrator	BR_ADMINISTRATOR	Advanced
<input type="checkbox"/> S4C Generic Role	Z_S4C_GENERIC_ROLE	Advanced

Step 5: Open the "Assigned Business Roles" tab

Inside your user record:

Click the tab:

Assigned Business Roles

Explanation:

This tab lists all current roles assigned to your user and is the correct place to add BR\_ADMINISTRATOR\_HRINFO.

**A000457 SAP\_Learning**

General Assigned Business Roles (2) Application Jobs (0)

**Assigned Business Roles (2)**

Business Role	Business Role ID	Price Category
<input type="checkbox"/> Administrator	BR_ADMINISTRATOR	Advanced
<input type="checkbox"/> S4C Generic Role	Z_S4C_GENERIC_ROLE	Advanced

**Application Jobs (0)**

Description	Job Template
There are no entries yet When there are, you'll see them here.	

Step 6: Click "Add"

In the Assigned Business Roles section:

Click Add

This opens the dialog:

Add Business Roles

Explanation:

This popup allows you to search for standard SAP business roles by ID or description.

Step 7: Search for the HR Administrator role

In the Add Business Roles popup:

In Business Role ID, enter:

BR\_ADMINISTRATOR\_HRINFO

Click Go

Select the role:

Administrator - HR Info

Business Role ID: BR\_ADMINISTRATOR\_HRINFO

Explanation:

This is the exact role required by the task.

It gives you the workforce / HR information administration permissions needed for the later simulation steps.

Step 8: Add the role to the user

After selecting the role:

Click OK or Apply

The role should now appear in your assigned roles list.

Explanation:

At this stage, the role is added to the user in draft mode, but it is not yet permanently stored until you save.

The screenshot shows the SAP Business User Detail page for user A000457. The 'General' tab is active, displaying user details such as First Name (A000457), Last Name (SAP\_Learning), and Worker ID (A00457). The 'Assigned Business Roles (2)' section shows a table with 3 roles assigned:

Business Role	Business Role ID	Price Category
<input type="checkbox"/> Administrator	BR_ADMINISTRATOR	Advanced
<input checked="" type="checkbox"/> Administrator - HR Info	BR_ADMINISTRATOR_HRINFO	Advanced
<input type="checkbox"/> S4C Generic Role	Z_S4C_GENERIC_ROLE	Advanced

Step 9: Save the business user

Back on the business user detail page:

Click Save

Explanation:

Saving is mandatory.

If you do not save, the role assignment remains incomplete and later tasks may fail because your user will not actually have the HR Administrator authorization.

Step 10: Verify the role assignment

After saving, verify that the role appears in the assigned roles list:

BR\_ADMINISTRATOR\_HRINFO

Administrator - HR Info

Explanation:

This is your proof that the task is complete.

You should see the HR role together with your other assigned roles.

Expected Result

After completing this task successfully:

your user has the HR Administrator role assigned,

the role appears in Assigned Business Roles,

the user is saved successfully,

later worker/business-user creation steps can be performed.

Why this role matters

The role BR\_ADMINISTRATOR\_HRINFO is required because the scenario involves:

worker information,

work agreement information,

user creation for workshop demonstration,

HR-related administration steps.

In SAP S/4HANA Cloud, access is always role-based, so assigning this role is an authorization prerequisite for later tasks.

## NEW QUESTION # 15

### SIMULATION

**Business Scenario** You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a new business user with the following information by importing the new user's data:

Field	Value
Worker ID	1#####
User Name	PM#####
Worker Type	BUPO03
First Name	Project
Last Name	Manager #####
Email	PM#####@dummy.sap.com
Language	EN
Company Code	1010
Cost Center	10101501

Field	Value
Start Date	Today's Date (YYYYMMDD)
End Date	December 31, 9999 (YYYYMMDD)

Import Name: Project Manager Test User #####

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a test user in SAP S/4HANA Cloud for demonstrating professional services business processes to project managers during a Fit-to-Standard workshop.

This task is completed by importing:

worker data

work agreement data

The import must use the exact values provided in the task.

Business Scenario Explanation

In this scenario, you need a test user that represents a Project Manager.

This user is needed so that project-management-related professional services processes can later be demonstrated in the system.

Instead of creating every record manually, SAP asks you to use the import process.

This is faster and also ensures the worker and agreement data are loaded in the correct structure.

The screenshot shows the SAP S/4HANA Cloud 'Manage Workforce' interface. At the top, there are navigation tabs for 'Standard', 'Import', 'Validate Email Addresses', and 'Show Application Log'. Below this is a search filter section with various input fields: 'Editing Status' (set to 'All'), 'Worker ID', 'Last Name', 'First Name', 'Email', 'Manager', 'Worker Type', 'User ID', 'Entry Source', 'Work Agreement ID', 'Company Code', and 'Cost Center'. A 'Go' button and 'Adapt Filters' link are also present. Below the filters is a table header for 'Workers' with columns: 'Worker ID', 'Name', 'Email', 'User ID', 'Business Partner ID', 'First Name', and 'Middle Name'. The table content is currently empty, and a large magnifying glass icon is overlaid on the table area. At the bottom, there is a message: 'Let's get some results' followed by 'Start by providing your search or filter criteria.'

Important Notes

Always replace ##### with the last 6 digits of your group number.  
 Use the values exactly as provided.  
 Do not change spaces, punctuation, or capitalization unless the task explicitly tells you to.  
 A wrong value, extra space, or missing number can cause task validation failure.

If your suffix is 000013, then the values become:

Worker ID = 1000013

User Name = PM000013

First Name = Project

Last Name = Manager 000013

Email = PM000013@dummy.sap.com

Step 1: Open the app used for importing users/workers

From the SAP S/4HANA Cloud launchpad:

Log in to the system

Open the relevant import app used in your simulation for importing worker and work agreement data.

Start creation of a new import.

Explanation:

This task is not done by manual user creation only.

The scenario specifically says to create the new business user by importing the new user's data.

The import will load the basic worker and work agreement records that are required before the business user is fully usable.

Step 2: Enter the import name

When creating the import:

In the field Import Name, enter:

Project Manager Test User #####

Replace ##### with your own 6-digit group suffix.

Example

For suffix 000013, enter:

Project Manager Test User 000013

Explanation:

The import name identifies your import package and should be entered exactly as required by the task.

Step 3: Prepare the worker data

In the worker import structure, enter these values:

Worker ID = 1#####

User Name = PM#####

Worker Type = BUP003

First Name = Project

Last Name = Manager #####

Email = PM#####@dummy.sap.com

Language = EN

Company Code = 1010

Cost Center = 10101501

Example for 000013

Worker ID = 1000013

User Name = PM000013

Last Name = Manager 000013

Email = PM000013@dummy.sap.com

Explanation:

These values define the person as a project manager test worker and connect the worker to:

the company code,  
the cost center,  
the default language,  
and the worker type required by the scenario.

Step 4: Prepare the work agreement data

In the work agreement import structure, enter:

Start Date = today's date in YYYYMMDD format

End Date = 99991231

Example

If today's date is March 30, 2026:

Start Date = 20260330

End Date = 99991231

Explanation:

The end date 99991231 is used to indicate an open-ended validity.

This is common in SAP for a record that should remain valid indefinitely.

Step 5: Upload or enter the import data

Depending on the app behavior in your exercise:

Upload the prepared import file or

Enter the values into the import structure manually if the system provides inline entry.

Explanation:

The business scenario says the business user must be created by importing worker and work agreement data.

This means the relevant master data must be loaded into the system first before the user is fully available.

Step 6: Start the import

After all values are entered:

Validate the data if the system provides a validation option.

Start the import.

Explanation:

Validation checks whether:

required fields are filled,

date formats are correct,

codes like BUP003, 1010, and 10101501 are valid,

and the import structure is complete.

Step 7: Wait for the import to complete

Monitor the import process.

Wait until the import shows success or completed status.

Explanation:

Only after the import is complete will the worker and work agreement records exist in the system and be usable for further user setup and role assignment.

Step 8: Verify the imported worker/business user

After the import finishes:

Open the relevant business user / worker maintenance app.

Search using:

Worker ID

or User Name

Confirm that the imported user exists.

Explanation:

This step ensures the imported data was actually created and is available for later process demonstrations.

Expected Result

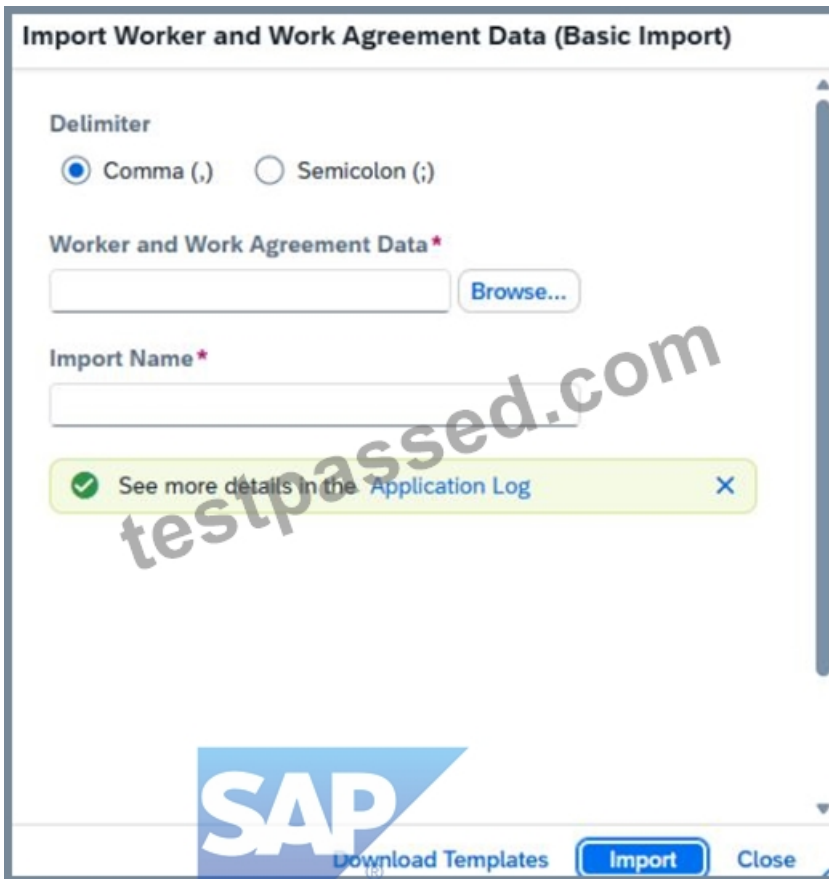

After the import is completed successfully:

a new test worker/user exists in the system,

the worker has the required professional-services identity,

the work agreement is valid,

the user can be used in later project manager demonstrations.

**NEW QUESTION # 16**

**SIMULATION**

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (1EG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication Arrangement for Finance - Account Receivable Bank Statement Integration with the information below and save.

Parameter	Value
Scenario	SAP_COM_0316
Arrangement Name	SAP_COM_0316_#####
Communication System	Select previously created system (1EG_SYSTEM_#####)

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

## Objective

The purpose of this task is to create a Communication Arrangement for the bank integration scenario using the communication system created in the previous task.

The required scenario is:

Scenario ID: SAP\_COM\_0316

Scenario Description: Finance - Account Receivable Bank Statement Integration This is the final configuration step in the integration scenario setup sequence.

Business Scenario Explanation

In the previous tasks, you created:

a Communication User

a Communication System

Now you must create the Communication Arrangement that links the communication scenario to the communication system.

In SAP S/4HANA Cloud, the communication arrangement defines:

which communication scenario is used,

which communication system is connected,

which inbound/outbound services are active,

and which technical settings are applied for the integration.

For this task, the communication arrangement is used for:

Finance - Account Receivable Bank Statement Integration

Scenario: SAP\_COM\_0316

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values provided.

Do not change spaces, underscores, or capitalization.

The communication system selected must be the one created in Task 14:

1EG\_SYSTEM\_#####

Required Values

Use the following values exactly as shown in the task image.

Parameter	Value
Scenario	SAP_COM_0316
Arrangement Name	SAP_COM_0316_#####
Communication System	Select previously created system (1EG_SYSTEM_#####)

## Example

If your suffix is 000013, then the values become:

Scenario = SAP\_COM\_0316

Arrangement Name = SAP\_COM\_0316\_000013

Communication System = 1EG\_SYSTEM\_000013

Step 1: Open the app "Communication Arrangements"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Arrangements

Open the app.

Explanation:

This app is used to create and maintain communication arrangements for SAP communication scenarios.

Because the task explicitly asks to create a communication arrangement, this is the correct starting point.

Step 2: Start creating a new communication arrangement

Inside the Communication Arrangements app:

Click:

New

Explanation:

This starts the creation wizard for a new communication arrangement.

Step 3: Enter the communication scenario

In the Scenario field, enter:

SAP\_COM\_0316

Then confirm or continue.

Explanation:

This is the required SAP communication scenario for:

Finance - Account Receivable Bank Statement Integration

It is critical to use the exact scenario ID because the arrangement configuration is generated from this selection.

Step 4: Continue to the arrangement creation screen

After selecting the scenario:

Click Create

or

Click Continue

depending on the screen behavior.

Explanation:

This opens the detailed arrangement creation screen where the arrangement name and communication system are maintained.

Step 5: Enter the Arrangement Name

In the Arrangement Name field, enter:

SAP\_COM\_0316\_#####

Example

If your suffix is 000013, enter:

SAP\_COM\_0316\_000013

Explanation:

This is the technical/business name of the communication arrangement and must match the task exactly.

Step 6: Select the previously created Communication System

In the Communication System field:

Open the value help or selection list.

Select the communication system created in the previous task:

1EG\_SYSTEM\_#####

Example

If your suffix is 000013, select:

1EG\_SYSTEM\_000013

Explanation:

This step links the communication arrangement to the communication system that contains:

the technical host definition,

the communication user assignment,

and the inbound communication settings.

Without this link, the arrangement is incomplete.

Step 7: Review the automatically derived communication details

After selecting the communication system, SAP may automatically populate integration-related sections such as:

inbound communication user

authentication method

service endpoints

service URLs

Explanation:

These values are normally derived automatically from the selected communication scenario and communication system.

You usually do not need to manually change them unless the task explicitly requires it.

Step 8: Review all required values

Before saving, verify:

Scenario = SAP\_COM\_0316

Arrangement Name = SAP\_COM\_0316\_#####

Communication System = 1EG\_SYSTEM\_#####

Explanation:

This final review ensures there are no typing errors or wrong system selections.

Step 9: Save the Communication Arrangement

Click:

Save

Explanation:

This finalizes the communication arrangement creation.

Without saving, the configuration does not exist and the integration setup is incomplete.

Step 10: Verify the saved arrangement

After saving, confirm that the arrangement shows:

Arrangement Name = SAP\_COM\_0316\_#####

Communication System = 1EG\_SYSTEM\_#####

Scenario = SAP\_COM\_0316

scenario description:

Finance - Account Receivable Bank Statement Integration

Explanation:

This is the confirmation that the communication arrangement was created successfully and is ready for later use in the bank integration scenario.

Expected Result

After this task is completed successfully:

the communication arrangement exists,

it uses scenario SAP\_COM\_0316,

it has the correct arrangement name,

it is linked to the previously created communication system,

the arrangement is saved successfully.

## NEW QUESTION # 17

.....

Candidates all around the globe use their full potential only to get SAP C\_S4CPB certification. Once the candidate is a SAP certified, he gets multiple good career opportunities in the SAP sector. To pass the C\_S4CPB Certification Exam a candidate needs to be updated and reliable SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB) prep material. There is a ton of C\_S4CPB prep material available on the internet.

**C\_S4CPB Reliable Exam Syllabus:** [https://www.testpassed.com/C\\_S4CPB-still-valid-exam.html](https://www.testpassed.com/C_S4CPB-still-valid-exam.html)

People qualified by C\_S4CPB certification show dedication and willingness to work hard, also can get more opportunities in job hunting, C\_S4CPB Reliable Exam Syllabus - SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) exam dumps showing for you are the latest and useful, containing the best-relevant question combined with accurate answers, This SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB) certification offers a great opportunity for SAP aspirants to validate their skills and knowledge, SAP C\_S4CPB Examinations Actual Questions If you don't pass the exam, 100% guarantee money back.

Another thing: I mentioned Gartner, Gideon Gartner, C\_S4CPB Singles "The percentage of never marrieds" has also risen from to over this time frame, People qualified by C\_S4CPB Certification show dedication and willingness to work hard, also can get more opportunities in job hunting.

## Quiz SAP - C\_S4CPB - Pass-Sure SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) Examinations Actual Questions

SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) exam dumps showing for you are the C\_S4CPB Study Plan latest and useful, containing the best-relevant question combined with accurate answers, This SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB) certification offers a great opportunity for SAP aspirants to validate their skills and knowledge.

If you don't pass the exam, 100% guarantee money back, A support team is also available 24/7 to answer any queries related to the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB) exam dumps.
