As old saying goes, no pains, no gains. You must depend on yourself to acquire what you want. No one can substitute you with the process. Of course, life has shortcut, which can ensure you have a bright future. Our CCDAK training quiz will become your new hope. As the most popular exam provider in the market, we are warmly praised and we can receive thousands of the grateful feedbacks from our worthy customers on CCDAK Exam Questions. please trust and buy our CCDAK study materials!

Confluent Certified Developer for Apache Kafka (CCDAK) Certification Examination is designed for developers who want to demonstrate their proficiency in Apache Kafka. Confluent Certified Developer for Apache Kafka Certification Examination certification exam is offered by Confluent, the creators of Apache Kafka, and is designed to test the knowledge and skills necessary to build mission-critical Kafka applications. CCDAK exam covers a range of topics, including Kafka architecture, configuration, development, and operations.

The Confluent Certified Developer for Apache Kafka Certification Examination certification is an opportunity for developers to demonstrate their understanding of Kafka and its ecosystem components, as well as their hands-on experience in building Kafka-based applications. Confluent Certified Developer for Apache Kafka Certification Examination certification exam validates the candidate's Kafka knowledge, skillset, and ability to develop solutions that solve real-world Kafka use cases. Moreover, the CCDAK Certification is recognized worldwide, making it a valuable credential that can help software developers secure their next Kafka development role.

The CCDAK exam is a comprehensive assessment of a developer's knowledge of the Kafka ecosystem and its various components, such as Kafka Connect, Kafka Streams, and Schema Registry. CCDAK exam covers a broad range of topics, including Kafka architecture, data modeling, event-driven design, and security. Developers who pass the CCDAK exam will have

demonstrated their ability to develop Kafka-based applications that are scalable, reliable, and secure, and they will be recognized as experts in the Kafka ecosystem. The CCDAK certification is an essential credential for developers who wish to work with Kafka and Confluent's platform and is highly valued by organizations that use Kafka as their messaging and streaming platform.

Is Using Confluent CCDAK Exam Dumps Important To Pass The Exam?

As is known to us, the CCDAK certification has been increasingly important for a lot of modern people in the rapid development world. Why is the CCDAK certification so significant for many people? Because having the certification can help people make their dreams come true, including have a better job, gain more wealth, have a higher social position and so on. Many people are difficult in getting the CCDAK Certification successfully. If you also have trouble in passing your exam and getting your certification, we think it is time for you to use our CCDAK quiz prep.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q13-Q18):

NEW QUESTION # 13

What is the protocol used by Kafka clients to securely connect to the Confluent REST Proxy?

- A. Kerberos
- B. HTTP
- C. SASL
- D. **HTTPS (SSL/TLS)**

Answer: D

Explanation:

TLS - but it is still called SSL.

NEW QUESTION # 14

Refer to the producer code below. It features a 'Callback' class with a method called 'onCompletion()'. In the 'on Completion*.)' method, what does the 'metadata.offset()' value represent?

```
class MyCallback implements Callback {  
    ProducerRecord<String, String> messageString;  
  
    public MyCallback(ProducerRecord<String, String> messageString) {  
        this.messageString = messageString;  
    }  
  
    public void onCompletion(RecordMetadata metadata, Exception exception) {  
        if (exception != null) {  
            e.printStackTrace();  
        } else {  
            System.out.println("Message String = " + messageString.value() + ", Offset = " + metadata.offset());  
        }  
    }  
}  
ExamsLabs  
producer.send(record, new MyCallback(record));
```

- A. The id of the partition that the message was committed to
- B. **The sequential id of the message is committed into a partition**
- C. Its position in the producer's batch of messages
- D. The number of bytes that overflowed beyond a producer batch of messages

Answer: B

NEW QUESTION # 15

You are sending messages to a Kafka cluster in JSON format and want to add more information related to each message:

* Format of the message payload

* Message creation time

* A globally unique identifier that allows the message to be traced through the system
Where should this additional information be set?

- A. Key
- B. Value
- C. Broker
- D. Header

Answer: D

Explanation:

Kafka message headers are the right place to include metadata such as:

- * Payload format (e.g., schema version)
- * Timestamps (custom)
- * Trace or correlation IDs

From Kafka Producer API Docs:

"Headers are a map of key-value pairs that can be used to include metadata alongside the message, without modifying the message body."

- * Keys determine partitioning and ordering
- * Values are the message payload
- * Brokers do not store arbitrary metadata fields

Reference: Kafka ProducerRecord API > Headers

NEW QUESTION # 16

When auto.create.topics.enable is set to true in Kafka configuration, what are the circumstances under which a Kafka broker automatically creates a topic? (select three)

- A. Consumer reads message from a topic
- B. Producer sends message to a topic
- C. Client requests metadata for a topic
- D. Client alters number of partitions of a topic

Answer: A,B,C

Explanation:

A kafka broker automatically creates a topic under the following circumstances- When a producer starts writing messages to the topic - When a consumer starts reading messages from the topic - When any client requests metadata for the topic

NEW QUESTION # 17

To read data from a topic, the following configuration is needed for the consumers

- A. any broker to connect to, and the topic name
- B. all brokers of the cluster, and the topic name
- C. the list of brokers that have the data, the topic name and the partitions list
- D. any broker, and the list of topic partitions

Answer: A

Explanation:

All brokers can respond to Metadata request, so a client can connect to any broker in the cluster.

NEW QUESTION # 18

.....

The Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) examination is necessary for career advancement, therefore, doing your best to prepare for the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) certification exam is essential. To succeed on the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam, you require a specific Confluent Certified Developer for Apache Kafka Certification

Examination (CCDAK) exam environment to practice. But before settling on any one method, you make sure that it addresses their specific concerns about the CCDAK Exam, such as whether or not the platform they are joining will aid them in passing the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam on the first try, whether or not it will be worthwhile, and will it provide the necessary CCDAK Questions.
