## Valid MB-335 Test Review | MB-335 New Exam Materials

Some customers may care about the private information problem while purchasing MB-335 Training Materials, if you are concern about this problem, our company will end the anxiety for you if you buy MB-335 training material of us . Our company is a professional company, we have lots of experiences in this field, and you email address and other information will be protected well, we respect the privacy of every customers. You give me trust , we give you privacy.

Microsoft MB-335 exam is targeted towards experienced professionals who have practical experience in implementing Dynamics 365 Supply Chain Management solutions. MB-335 exam content covers various topics, such as supply chain design, planning, sourcing, and execution. Candidates who pass the exam demonstrate their ability to use the Dynamics 365 SCM application to identify opportunities for process improvement, optimize inventory levels, and enhance supply chain visibility.

Microsoft MB-335 exam is designed to be challenging and comprehensive, and it requires a significant amount of preparation and study. Candidates are encouraged to create a study plan and use the resources provided by Microsoft, such as training courses, practice exams, and documentation. Passing the exam requires a score of 700 or higher out of a possible 1000 points, and the exam is available in multiple languages, including English, Japanese, and Chinese.

To pass the Microsoft MB-335 Certification Exam, candidates must have a sound understanding of the various components of

Dynamics 365 Supply Chain Management, as well as their interdependencies. They should also have practical experience using the product to solve real-world business problems. MB-335 exam consists of around 40-60 multiple-choice questions that are designed to test candidates' knowledge and understanding of the product.

## **Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q28-Q33):**

### **NEW QUESTION # 28**

You need to create the new summer limited edition bicycle in Dynamics 365 in preparation for taking orders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

### **Answer:**

Explanation:

Explanation:

Graphical user interface, text, application, email Description automatically generated

Topic 4, Case Study 4, Fabrikam inc.

Fabrikam, Inc. Is a discrete manufacturer of outdoor patio furniture. The company originated as a sole owner working from a home garage, then moved into a commercial storage space, and later into a full manufacturing facility. The company operates as two operating legal entities, one in the United States and the other in Mexico.

As the company grew, the existing software systems failed to grow with it. This meant that financial reporting was managed in an outdated accounting system; raw materials planning, production, and inventory control were managed in another system; and cost calculations were tracked in multiple spreadsheets managed by analysts.

Current environment

The Fabrikam inc. engineering team uses a third-party computer-aided design (CAD) system for drawings.

These drawings are later introduced into one or more companies for sale. A customer service center handles complaint calls and places orders for distributors.

The current system landscape creates a lack of controls and visibility across the systems, leading to overages of some raw materials, shortages on others, and large quantities of scrap. Heavy production volume provides little to no room for system downtime. The staff manually creates production orders, which leads to double work for system entry later. This delay has a ripple effect into the materials planning.

The company currently sources teakwood from India, making it a more expensive and high-end material.

Cedar and redwood are both sourced from the Western US. Truck driver shortages across the nation have caused shipping costs to rise sharply.

Fabrikam, Inc. recently decided to expand into the gas firepit market. All products are currently being prototyped. The company decides that the firepit prototype should be initially available only in the United States. The firepits will be manufactured only in Nevada and Arizona. The firepits are produced as prototyping; this production line operates only on Mondays.

Fabrikam, Inc. has purchased new manufacturing equipment for the firepit metal fabrication. This purchase includes a warranty, which requires that the company perform routine maintenance. Fabrikam, inc. elects to complete the maintenance in house on a quarterly schedule and maintain appropriate records for warranty purposes. The metal fabrication equipment consists of three separate machines used in a single production process.

Fabrikam, Inc. made the decision to move to Dynamics 365 Supply Chain Management.

Application and environment

\* Fabrikam, inc. must move systems and processing to software as a service (SaaS) whenever possible because the company does not have enough IT staff to support hardware.

Inventory and costing

\* Finished goods fall into three categories:

\* Wood furniture (teak, cedar, redwood) o Outdoor heating (firepits, gas heaters)

\* Each outdoor heating item with slight variations, such as a chrome or steel finish, must have a unique item number, o Repair parts (nuts and bolts, ignitors, and other parts)

\* The system must account for the fact that Fabrikam, inc. must take legal ownership of teakwood at the time of shipment, not at the time of receipt into the warehouse.

\* The company must accrue for the costs of the teakwood materials as soon as the company takes ownership.

The company takes ownership at the time of shipment, which is posted prior to physical receipt at the warehouse.

Engineering

\* Engineers who specialize in gas consumer goods will design the firepits and are the only users with authority to release the products for sale.

\* Engineering must notify customer service of any open orders that may contain a released product version that may be discontinued or delayed.

\* The change request workflow must route to the engineer.

#### Production

\* The raw material and subcomponent goods for the firepit must be managed by the engineer. This means the engineer must oversee any new items, material changes, address problems, and so on.

\* The metal fabrication equipment must be tracked at the locations where the firepits are produced.

\* The production team must operate on an all-day/everyday model, with each team operating in a 12-hour shift. This is a recent change to keep up with high demand for products, as well as for planning a new product line.

\* Raw material and subcomponent items for the firepit prototype must not be available for use until engineering is ready for the prototype product release.

\* Due to the production staff schedule, all equipment must be planned according to the staffing.

\* Maintenance for each of the three pieces of machinery must be scheduled at the same time so that only the local maintenance technician works on the equipment.

\* When the firepits are ready for the test market they must made be available for sale.

\* The United States operating company must review any engineering products before they are available for sales or production orders.

\* The engineering team must release the engineering product into the United States operating company.

\* The engineering BOM lines must not be removed by the United States operating company.

#### Application and environment

\* The operations manager is concerned that system downtime is so frequent that It is impacting efficiency due to the all-day/everyday production operation model.

#### Inventory and costing

\* Fabrikam, inc. marketing campaigns in the desert states of Arizona- Nevada, and New Mexico have led to an increased demand for teakwood furniture to endure weather elements. Supply and demand for this wood lowered expected margins with increased shipping costs and price increases from the vendors.

\* User1 reports that the inventory value of the teakwood is not on the financial reports, even though ownership of the product begins at the port of shipment,

\* Upon receipt into the physical warehouse, User2 reports that the warehouse workers received less teakwood than the ordered amount on the purchase order.

#### Engineering and production

\* As the firepits are produced and feedback received from the test market, records must be maintained of each revision to the firepit design.

\* Firepits must have attributes associated with them to specify the type of gas line that is available for the firepit such as natural gas or propane.

\* Customer service is receiving calls that the firepit ignition switch does not always work as expected. This issue was reported through an engineering change request.

\* User3 reports resource issues on the production shop floor due to system maintenance issues and other delays. The company does not want User3 or the other workers to stop production.

\* User4 reports that a bolt needed for cedar wood furniture is out of stock. A temporary substitution bolt was identified prior to starting the production order.

\* User5 reports that a hinge for redwood furniture will be discontinued at the end of the year. Production must reflect an updated part.

\* A large order was placed for 1,500 pieces of teakwood furniture and production orders must start as soon as possible.

\* Users reports the following:

\* Only 100 pieces of furniture can be produced on the night shift due to resourcing. Enough raw materials are on hand to complete 100 pieces, but not enough to produce all 1,500 pieces.

\* The production floor is organized into dedicated production lines, each with their own warehouse. The warehouse workers must pick the raw materials to the correct warehouse location.

#### NEW QUESTION # 29

A discrete manufacturer uses Dynamics 365 Supply Chain Management for time and attendance registrations on the shop floor.

Production worker A and production worker B clock in at 7 AM. They clock out at different times. Their work schedules are shown in the following table.

You need to determine how the current configuration will book the time.

What is logged in the system for each worker? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 30

You need to configure the system to meet the order requirements for unscented cleaning solution. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure the ingredient as a restricted and regulated product.
- B. Add the ingredients for unscented cleaning solution to a regulated products inclusion list
- C. Ensure that the PSDS file is active and within the expiration date requirements.
- D. In Document Handling, associate the PSDS file with the PSDS record and set restriction field set to Internal
- E. On the inventory management parameters, set the value for the Print Product Safety Data Sheet and Prevent Sales Pack Slip/Invoke Posting to TRUE

**Answer: A,B,E**

### NEW QUESTION # 31

A company produces homeopathic lotions (or pain relief) and uses Dynamics 365 Supply Chain Management.

Several components used in the production of the pain-relieving lotion and oils have special government- mandated reporting requirements.

You need to ensure the company can provide the appropriate reporting and tracking for these components.

Which parameters should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

### NEW QUESTION # 32

A company overstates on-hand raw materials due to the time it takes to post raw materials as consumed when production orders are processed.

All items used to manufacture finished goods must be consumed when a finished good is reported as finished. You must not change all bill of materials lines to use the option of flushing principal.

You need to ensure that all production orders consume raw materials at Report as finished.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

1 - In the Production order status section of Production control, select Start

2 - In the Picking list journal, select Always in the Automatic BOM consumption

3 - In the Production order status section of Production...

4 - Select Make default for all users

### NEW QUESTION # 33
