UiPath-ABAv1 Test Dumps Free, Reliable UiPath-ABAv1 Exam Preparation

Our UiPath-ABAv1 practice questions enjoy great popularity in this line. We provide our UiPath-ABAv1 exam braindumps on the superior quality and being confident that they will help you expand your horizon of knowledge of the exam. They are time-tested UiPath-ABAv1 Learning Materials, so they are classic. As well as our after-sales services. And we can always give you the most professional services on our UiPath-ABAv1 training guide.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q105-Q110):

NEW QUESTION # 105

When will a Transaction Item be in status Retried?

- A. The item has been manually selected from the Transactions page and marked as Retried
- **B. The item failed with an application exception and was retried**
- C. The item failed with a business exception and was retried
- D. The item was sent to a Set Transaction Status activity, which changed its status to Retried

Answer: B

Explanation:

In UiPath Orchestrator, a Transaction Item will be in status 'Retried' when it fails due to an application exception and the system automatically retries it. This is part of the queue's transaction handling, where items that encounter application exceptions can be set to retry based on the retry policy defined in Orchestrator1. The 'Retried' status indicates that the item has been attempted again after the initial failure.

NEW QUESTION # 106

What are the common Communications Mining analytics use cases?

- A. Auto-triage, Case automation, Query automation.
- **B. Communications Monitoring, Voice of the customer, Auto-triage.**
- C. Voice of the customer, Query automation, Sentiment Analysis.
- D. Communications Mining, Voice of the customer, Communications Monitoring.

Answer: B

Explanation:

Communications Mining analytics is a key component of UiPath's Communications Mining solution, which uses Natural Language Processing (NLP) to understand unstructured communications data and transform it into actionable insights. Common use cases

include:

- * Communications Monitoring: Tracking communication flows for operational inefficiencies and anomalies.
- * Voice of the Customer (VOC): Extracting customer sentiments and feedback to improve business processes and customer service.
- * Auto-triage: Automating the classification and prioritization of incoming communications to enable faster responses.

These use cases focus on leveraging data insights to automate decision-making, identify process improvement areas, and enhance customer satisfaction. This aligns with UiPath's goal to enable end-to-end process automation by mining communication channels like emails, tickets, and surveys.

NEW QUESTION # 107

What can be considered a characteristic of RPA?

- A. It allows anyone to configure hardware robots to behave as humans
- B. Can manipulate only User Interface applications
- **C. Can emulate human actions within digital systems**
- D. It requires constant human supervision to function properly

Answer: C

Explanation:

RPA is designed to mimic how humans interact with software applications to perform tasks, enabling the automation of repetitive, rule-based tasks without the need for constant human supervision or intervention.

NEW QUESTION # 108

What is the purpose of human in the loop?

- A. Human in the loop enables human execution flows.
- B. Human in the loop allows the human to stop a running process.
- **C. Human in the loop enables human validation in the middle of the process.**
- D. Human in the loop allows the human to pause a running process.

Answer: C

Explanation:

"Human in the loop" is a core concept in UiPath automation solutions, where automation might require human input or decisions to complete a task. Specifically, UiPath defines it as:

"Human-in-the-loop (HITL) involves incorporating human validation steps within an automated workflow to manage exceptions, validate data, or make decisions that require human judgment." This concept is a fundamental part of processes that require human expertise or compliance checks, typically seen in document processing, data extraction, and exception handling.

NEW QUESTION # 109

How can you allocate licenses in the Automation Cloud?

- **A. Direct assignment to user, Group allocation**
- B. Only group allocation, the user have to assign the license to themselves afterwards
- C. Only direct allocation to user, having the option to group the users in the tenant
- D. Pair allocation only, the license is assigned to the user and bound to a selected group

Answer: A

Explanation:

In the Automation Cloud, licenses can be allocated either by direct assignment to a user or by group allocation.

This flexibility allows administrators to efficiently manage and distribute licenses based on organizational needs and user roles, ensuring that resources are optimized across the tenant. References: UiPath Documentation on License Management in Automation Cloud at <https://docs.uipath.com/>.

NEW QUESTION # 110

.....

A growing number of people start to take the UiPath-ABAv1 exam in order to gain more intensifying attention in the different field. It is known to us that the knowledge workers have been playing an increasingly important role all over the world, since we have to admit the fact that the UiPath-ABAv1 certification means a great deal to a lot of the people, especially these who want to change the present situation and get a better opportunity for development. Our UiPath-ABAv1 Exam Questions will help you make it to pass the UiPath-ABAv1 exam and get the certification for sure.
