AZ-104 Renewal Exam (2025/2026) – Updated Questions and Verified Answers | 100% Guaranteed Microsoft Pass

Question 1

You need to assign a role to a user to manage all resources in a specific Azure resource group. Which role should you assign?

- A. Owner
- B. Contributor
- C. Reader
- D. User Access Administrator

Correct Answer: B. Contributor

Rationale: The Contributor role grants full access to manage all resources within a resource group without allowing changes to role assignments, unlike the Owner role. Reader only allows view access, and User Access Administrator is for managing access, not resources.

Question 2

What should you configure to enforce multi-factor authentication (MFA) for users accessing Azure resources from untrusted locations?

- A. Azure AD Conditional Access policy
- B. Azure AD Identity Protection
- C. Azure AD Privileged Identity Management
- D. Azure Security Center

Correct Answer: A. Azure AD Conditional Access policy

Rationale: Conditional Access policies in Azure AD enforce MFA based on conditions like location, ensuring secure access to Azure resources from untrusted networks.
