We do not charge any additional fees. Once our Identity-and-Access-Management-Architect Learning Materials are updated, we will automatically send you the latest information

Salesforce Certified Identity and Access Management Architect Sample Questions (Q37-Q42):

NEW QUESTION # 37
An architect has successfully configuredSAML-BASED SSO for universal containers. SSO has been working for 3 months when Universal containers manually adds a batch of new users to salesforce. The new users receive an error from salesforce when trying to use SSO. Existing users are still able to successfully use SSO to access salesforce. What is the probable cause of this behaviour?

- A. The administrator forgot to reset the new user's salesforce password.
- B. The new users do not have the SSO permission enabled on their profiles.
- C. The Federation ID field on the new user records is not correctly set
- D. The my domaincapability is not enabled on the new user's profile.

Answer: C

Explanation:
The Federation ID field on the new user records is not correctly set is the probable cause of this behavior. The Federation ID is an additional field contained in the Salesforce interface that allows admins to pick whatever username or username format they want to pass to Salesforce from their user directory for single sign-on. This field does not appear on the user pagelayout editor or on the user record page by default, and it must be populated with a unique value that matches the identity provider's assertion for each user. If the Federation ID is missing or incorrect, the SSO will fail. The administrator does not needto reset the new user's Salesforce password, as SSO bypasses the password authentication. The My Domain capability is not enabled on the new user's profile, but on the org level, so it does not affect individual users. The new users do not have the SSO permission enabled on their profiles is not a valid option, as there is no such permission in Salesforce.
References: Certification - Identity and Access Management Architect - Trailhead, Federation ID fieldon User detail page is not visible, What is the purpose of Salesforce SSO by federation ID?

NEW QUESTION # 38
A multinational company is looking to rollout Salesforce globally. The company has a Microsoft Active Directory Federation Services (ADFS) implementation for the Americas, Europe and APAC. The company plans to have a single org and they would like to have all of its users access Salesforce using the ADFS . The company would like to limit its investments and prefer not to procure additional applications to satisfy the requirements.
What is recommended to ensure these requirements are met ?

- A. Add a central identity system that federates between the ADFS systems and integrate with Salesforce for single sign-on.
- B. Use connected apps for each ADFS implementation and implement Salesforce site to authenticate users across the ADFS systemapplicable to their geo.
- C. Configure Each ADFSsystem under single sign-on settings and allow users to choose the system to authenticate during sign on to Salesforce-
- D. Implement Identity Connect to provide single sign-on to Salesforce and federated across multiple ADFS systems.

Answer: D

Explanation:
To have all of its user's access Salesforce using the ADFS, the multinational company should implement Identity Connect to provide single sign-on to Salesforce and federate across multiple ADFS systems. Identity Connect is a tool that synchronizes user data between Microsoft Active Directory and Salesforce. It allowssingle sign-on and federation between multiple Active Directory domains and a single Salesforce org.
Identity Connect can also handle user provisioning and deprovisioning based on the changes made in Active Directory. The other options are not recommended for this scenario, as they either require additional applications, do not support federation, or do not provide a seamless user experience. NEW QUESTION # 39
customer service representatives at Universal containers (UC) are complaining that whenever they click on links to case records and are asked to login with SAML SSO, they are beingredirected to the salesforce home tab and not the specific case record. What

item should an architect advise the identity team at UC to investigate first?

- A. My domain is configured and active within salesforce.
- B. The identity provider is correctly preserving the Relay state
- C. The salesforce SSO settings are using http post
- D. The users have the correct Federation ID within salesforce.

Answer: B

Explanation:
The identity provider must correctly preserve the Relay state in order to redirect the user to the specific case record after login with SAML SSO. According to the Salesforce documentation3, "The RelayState parameter is used by SAML to indicate where the user should be redirected after they've been authenticated by the identity provider." Therefore, option C is the correct answer.
References: Salesforce Documentation

NEW QUESTION # 40
A technology enterprise is planning to implement single sign-on login for users. When users log in to the Salesforce User object custom field, data should be populated for new and existing users.
Which two steps should an identity architect recommend?
Choose 2 answers

- A. Implement Auth.SamlJitHandler Interface.
- B. Create and update methods.
- C. Implement RegistrationHandler Interface.
- D. Implement SessionManagement Class.

Answer: A,B

NEW QUESTION # 41
Containers (UC) has an existing Customer Community. UC wants to expand the self-registration capabilities such that customers receive a different community experience based on the data they provide during the registration process. What is the recommended approach an Architect Should recommend to UC?

- A. Modify the Community pages to utilize specific fields on the User and Contact records.
- B. Modify the existing Communities registration controller to assign different profiles.
- C. Create an After Insert Apex trigger on the user object to assign specific custom permissions.
- D. Create separate login flows corresponding to the different community user personas.

Answer: A

NEW QUESTION # 42
......
