Salesforce Order Management Administrator Accredited Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which of the following options represent two ways that an administrator can utilize APIs in Workbench to query OrderSummaries?

- **A. Platform API and Composite API**
- B. Composite API and Invocable API
- C. Invocable API and Apex API
- D. Connect API and Platform API
- E. Apex API and Connect API

Answer: A

Explanation:

The Platform API and the Composite API are two ways that an administrator can use APIs in Workbench to query Order Summaries. The Platform API allows querying, creating, updating, deleting, and searching records in Salesforce. The Composite API allows combining multiple requests into a single call, which can improve performance and reduce complexity¹²

NEW QUESTION # 52

What type of relationship exists between FulfillmentOrder and Location?

- A. Junction (Many to Many)
- **B. One-to-one Lookup (Location) FulfilledFromLocationId**
- C. Many-to-One Lookup (Location) FulfilledFromLocationId
- D. One-to-many Lookup (Location) FulfilledFromLocation

Answer: B

NEW QUESTION # 53

An admin is analyzing project requirements and notes that there are requirements to support both high volume and multiple locations. What is the recommended approach for this scenario?

- **A. Download the Single Location High Volume sample flow and the Multiple Locations sample flow from the Partner Community and make a blend between the two considering trade-offs**
- B. Download the Multiple Locations sample flow from the Partner Community and have developers add Apex code to enhance performance
- C. Download the Single Location High Volume sample flow from the Partner Community and modify all the flows to loop through locations
- D. Download the Single Location High Volume sample flow from the Partner Community and have the developers add Apex code to enhance performance

Answer: A

Explanation:

The Single Location High Volume sample flow and the Multiple Locations sample flow are two examples of how to implement order fulfillment with Order Management. The Single Location High Volume sample flow is optimized for performance and scalability, but it only supports one fulfillment location per order. The Multiple Locations sample flow supports multiple fulfillment locations per order, but it has lower performance and scalability. To support both high volume and multiple locations, an admin can download both sample flows from the Partner Community and make a blend between them, considering trade-offs such as complexity, maintainability, and customizability. Reference: Order Fulfillment Flows, Partner Community

NEW QUESTION # 54

When are Fulfillment Orders created by default?

- A. During import with a status of Managed
- **B. The Status field on the Order Summary entity changes and a platform event which is caught by a flow**
- C. During import with a status of Activated
