While there are many PL-600 exam question preparation guides available online, it's crucial to be vigilant while making purchases due to the prevalence of online scams. DumpsActual offers Microsoft PL-600 exam questions for the best exam preparation experience.

Microsoft Power Platform Solution Architect Sample Questions (Q211-Q216):

NEW QUESTION # 211

You are designing a Power Platform solution for a company.

Users must be granted access only to data that is relevant to them.

You need to recommend actions to meet the requirements.

Which two recommendations should you make? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create teams and assign security roles and users to the teams.
- B. Define and configure security roles.
- C. Create business units and assign security roles to the business units.
- D. Add column security profiles to applicable teams.

Answer: B,C

Explanation:

To control data access, you must set up an organizational structure that both protects sensitive data and enables collaboration. You do this by setting up business units, security roles, and field security profiles.

<https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges>

NEW QUESTION # 212

A customer plans to use Microsoft Power Platform integration capabilities to migrate its on-premises sales database to Microsoft Dataverse. The database has more than 10 years of sales data with complex table relationships. The data is used to generate real-time sales reports and predictive analytics.

The customer requires a data migration strategy that implements the following:

- * ensures minimal downtime
 - * maintains data integrity
 - * allows for validation of migrated data before switching to the new system
 - * ensures that the historical data is preserved accurately in the Dataverse environment
- Which two strategies should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Develop a phased migration plan in which data is moved in chunks based on years.
- B. Map the data schema to Dataverse and validate integrity through trial loads.
- C. Migrate historical data to Azure Data Lake to reduce migration complexity.
- D. Perform a full migration and start using Dataverse after migration.
- E. Perform a full migration and perform a test run on Dataverse to simulate real-time activity.

Answer: A,B

NEW QUESTION # 213

You are designing tables and columns for a Microsoft Power Platform solution. The solution will contain an interactive experience dashboard.

You need to ensure that the columns you create can be used as global filters for the dashboard. Which two data types can you use?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Yes/No
- B. Multiline Text
- C. Text
- D. Lookup
- E. Choice

Answer: A,E

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-solution-explorer#column-data-types> With interactive dashboards, a chart uses the color assigned to the categories that make up the different values, even if the chart is configured to use random colors, when the chart is configured to be grouped by any of the following column types:

Choice

Yes/No

Status Reason

NEW QUESTION # 214

You are designing a Power Platform solution for a company that provides in-home appliance maintenance.

When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Data type

Capture information about the technician assigned to each service appointment.

Capture information about the technician assigned to each service appointment.	▼ Choice Choices Customer Lookup
Select the tools that the technician must bring to an appointment.	▼ Choices Customer Lookup Text

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION # 215

Hotspot Question

A company uses Microsoft Dataverse to store patient information.

Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:

- Show or hide tabs in the main form based on the column value selected.

- Add a discount code automatically when a new patient row is added.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Show or hide tabs in the main form based on the column value selected.

Add a discount code automatically when a new patient row is added.

Solution

	▼
Plug-in	
Client script	
Business rule	
Business process flow
