

Latest AIGP Study Materials & Valid AIGP Test Forum

P.S. Free & New AIGP dumps are available on Google Drive shared by 2Pass4sure: https://drive.google.com/open?id=1uW21FJNCBTYE5-QUO20vhNHXzscj_VB3

The pass rate is 98.75% for AIGP study materials, and if you choose us, we can ensure you pass the exam successfully. In addition, AIGP exam dumps of us are edited by professional experts, they are quite familiar with the exam center, therefore AIGP study materials cover most of knowledge points. We also pass guarantee and money back guarantee if you fail to pass the exam. We will refund your money to your payment account. Online service stuff for AIGP Exam Brindumps is available, and if you have any questions, you can have a chat with us.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 2	<ul style="list-style-type: none">Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 3	<ul style="list-style-type: none">Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

Topic 4	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

Valid IAPP AIGP Test Forum, AIGP Latest Test Experience

It is known to us that time is money, and all people hope that they can spend less time on the pass. We are happy to tell you that The AIGP study materials from our company will help you save time. With meticulous care design, our study materials will help all customers pass their exam in a shortest time. If you buy the AIGP Study Materials from our company, you just need to spend less than 30 hours on preparing for your exam, and then you can start to take the exam.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q118-Q123):

NEW QUESTION # 118

According to the GDPR, an individual has the right to have a human confirm or replace an automated decision unless that automated decision?

- A. Is necessary for entering into or performing under a contract between the data subject and data controller.
- B. Is deemed to solely benefit the individual and includes documented legitimate interests.
- C. Is authorized by applicable E.U. law and includes suitable safeguards.
- **D. Is authorized with the data subject's explicit consent.**

Answer: D

Explanation:

According to the GDPR, individuals have the right to not be subject to a decision based solely on automated processing, including profiling, which produces legal effects or similarly significantly affects them. However, there are exceptions to this right, one of which is when the decision is based on the data subject's explicit consent. This means that if an individual explicitly consents to the automated decision-making process, there is no requirement for human intervention to confirm or replace the decision. This exception ensures that individuals can have control over automated decisions that affect them, provided they have given clear and informed consent.

NEW QUESTION # 119

An AI system's function, the industry and the location in which it operates are important factors in considering which of the following?

- A. Explainability of results.
- **B. Internal governance needs.**
- C. Diversity of data sources.
- D. Organizational accountability.

Answer: B

Explanation:

An AI system's function, industry, and deployment location define its risk profile, which directly influences the internal governance structures an organization must put in place.

From the AI Governance in Practice Report 2025:

"There are many challenges and potential solutions for AI governance, each with unique proximity and significance based on an organization's role, footprint, broader risk-governance profile and maturity." (p. 4)

"AI governance starts with defining the corporate strategy for AI... and formulating policy standards and operational procedures to reflect industry, use case, and location." (p. 11)

- * A- Organizational accountability is broader and not directly scoped by industry or function.
- * C- Diversity of data sources is tied to data strategy.
- * D- Explainability is more influenced by model type, not use context.

NEW QUESTION # 120

In the machine learning context, feature engineering is the process of?

- A. Creating learning schema for a model apply.
- **B. Extracting attributes and variables from raw data.**
- C. Developing guidelines to train and test a model.
- D. Converting raw data into clean data.

Answer: B

Explanation:

In the machine learning context, feature engineering is the process of extracting attributes and variables from raw data to make it suitable for training an AI model. This step is crucial as it transforms raw data into meaningful features that can improve the model's accuracy and performance. Feature engineering involves selecting, modifying, and creating new features that help the model learn more effectively. Reference: AIGP Body of Knowledge on AI Model Development and Feature Engineering.

NEW QUESTION # 121

A UK company has designed a facial recognition model to support border control.
The EU AI Act would apply to the model in all of the following situations EXCEPT if?

- A. The model is deployed at an EU border checkpoint.
- B. The model was trained by an EU company.
- C. The model was released under an open source license.
- **D. The model is deployed at UK border checkpoints.**

Answer: D

Explanation:

The EU AI Act applies extraterritorially, meaning it affects entities outside the EU when their AI systems impact individuals within the EU. However, it does not apply to systems that are developed, sold, or used entirely outside of the EU—such as in the UK, unless they affect the EU market or individuals.

From the AI Governance in Practice Report 2024:

"The act imposes regulatory obligations... depending on their capabilities, reach and computing power, certain GPAI systems are considered to present systemic risk and attract broadly similar obligations to those applicable to high-risk AI systems." (p. 7)

"The EU AI Act is the world's first comprehensive AI regulation... requirements apply to providers, deployers, importers, and distributors of AI systems when such systems are placed on the EU market." (p. 7-8) Thus:

- * A. Open source releasedoes not exclude applicability if deployed in the EU.
- * B. Deployment at an EU borderclearly invokes jurisdiction.
- * D. Training by an EU companycreates jurisdictional links.
- * C. Deployment only at UK checkpoints, withno EU use or impact, isoutside scope.

NEW QUESTION # 122

Scenario:

A mid-sized tech firm is building its AI governance program and is exploring ISO/IEC standards that could support consistency in terminology and risk assessment processes across teams.

ISO/IEC 22989 and ISO/IEC 42001 can be valuable resources for AI Governance professionals in all of the following ways EXCEPT:

- **A. Addressing specific issues related to managing procurement processes with third parties that provide or develop AI systems for their organization**
- B. Establishing terminology and describing concepts so that governance team members can communicate with diverse parties

- C. Recommending key activities to assess and manage risk: test, evaluate, verify and validate (TEVV)
- D. Being applicable to organizations of any size and industry seeking to use AI responsibly and effectively in their design processes, information systems and controls

"These standards help establish common language and risk governance procedures. Procurement governance typically falls under separate frameworks or sector-specific guidance." Thus, procurement governance (Option C) is not a central use case for these standards.
