Test4Engine Huawei H11-861_V4.0 Practice Test dumps are doubtless the best reference materials compared with other H11-861_V4.0 exam related materials. If you still don't believe it, come on and experience it and then you will know what I was telling you was true. You can visit Test4Engine.com to download our free demo. There are two versions of Test4Engine dumps. The one is PDF version and another is SOFT version. You can experience it in advance. In this, you can check its quality for yourself.

Huawei H11-861_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	Cybersecurity and Risk Management: This section assesses the expertise of Security Engineers and Compliance Officers in securing IIoT environments by applying security frameworks, identity and access management, threat detection, and risk mitigation strategies.
Topic 2	Implementation and Configuration: This domain targets IIoT Solution Architects and System Integrators, focusing on configuring IoT devices, network connectivity, communication protocols, and edge computing components used in IIoT deployments.

Topic 3	• Technical Concepts: This section measures skills of Industrial IoT Engineers and Network Engineers and covers fundamental technical principles relevant to Industrial Internet of Things (IIoT), including architectures, protocols, data management, and integration technologies.
Topic 4	• Operations and Maintenance: This domain measures skills of Operations Engineers and Network Administrators in monitoring IIoT systems, troubleshooting network and device issues, and maintaining overall system health and performance.
Topic 5	• Integration and Application: This section targets Solution Developers and System Integrators involved in integrating IIoT systems with existing enterprise applications, cloud platforms, and analytics tools for data-driven decision making.

Different person has different goals, but our Test4Engine aims to help you successfully pass H11-861_V4.0 exam. Maybe to pass H11-861_V4.0 exam is the first step for you to have a better career in IT industry, but for our Test4Engine, it is the entire meaning for us to develop H11-861_V4.0 exam software. So we try our best to extend our dumps, and our Test4Engine elite comprehensively analyze the dumps so that you are easy to use it. Besides, we provide one-year free update service to guarantee that the H11-861_V4.0 Exam Materials you are using are the latest.

Huawei HCIP-Collaboration V4.0 Sample Questions (Q38-Q43):

NEW QUESTION # 38

Assume endpoints T1 and T2 are registered with the same SC node zone. After T1 calls the number of T2 using H.323, T1 and T2 communicate with each other. Which of the following statements are true about the call process? (Choose all that apply.)

- A. In this process, the H.225 call signaling interaction between T1 and T2 must pass through the SC.
- B. In this process, the H.225 RAS signaling interaction between T1 and T2 must pass through the SC.
- C. In this process, the media stream must be directly transmitted between T1 and T2.
- D. 225 RAS messages (registration, admission, status) always traverse the SC (gatekeeper) for endpoints in the same zone.
- E. Endpoint control signaling involved in this process mainly includes H.225 RAS, H.225 Call Signaling, and H.245.

Answer: B,C,E

Explanation:

RTP media is exchanged directly between T1 and T2 once the call is established.

The call control sequence involves H.225 RAS (registration/admission), H.225 call signaling (SETUP/CONNECT), and H.245 control for capabilities.

NEW QUESTION # 39

In a Huawei video conference, which of the following may cause echoes or even high-pitched noises when the local participant speaks? (Choose all that apply.)

- A. Another participant whose speaker is turned off is at the local site.
- B. The microphone is too close to the speaker.
- C. An audio loop exists. The external audio device feeds back the sound from the endpoint output port to the endpoint input port.
- D. The endpoint's input volume is lower than the minimum energy threshold required for echo cancellation.

Answer: B,C,D

Explanation:

If the input volume falls below the echo canceller's detection threshold, the device can't identify and suppress return audio, leading to

echoes or squealing.

An audio loop, where output is fed back into the input, directly causes echo and feedback noise.

Placing the microphone too close to the speaker allows direct pickup of its output, resulting in echo and potential high-pitched feedback.

NEW QUESTION # 40

The VDC can be used with the Huawei video conferencing platform to provide rich conference control functions. Conference control settings can be customized, and conference control shortcut keys and descriptions can be set.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

The Huawei Video Conferencing Desktop Client (VDC) offers comprehensive conference-control capabilities, allowing you to tailor control settings and define custom shortcut keys with descriptive labels for streamlined operation.

NEW QUESTION # 41

When the SMC is used to provision system administrator users, each user can be bound to an endpoint that is used as the conference joining device of the user.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

System administrator accounts in the SMC are management-only and do not support binding to endpoints for use as conference-joining devices; endpoint binding applies only to conference user or room accounts.

NEW QUESTION # 42

Which of the following registration information types are carried in an RRQ to register with the GK? (Choose all that apply.)

- A. IP address
- B. H.323 ID
- C. Port number
- D. MAC address

Answer: A,B,C

Explanation:

An RRQ conveys the endpoint's network address information (IP address and associated port number) along with its H.323 ID alias to the gatekeeper for registration.

NEW QUESTION # 43
