## GH-900인증시험 인기덤프 & GH-900최고덤프문제

ITDumpsKR는 여러분이Microsoft 인증GH-900인증시험 패스와 추후사업에 모두 도움이 되겠습니다. ITDumpsKR제품을 선택함으로써 여러분은 시간도 절약하고 돈도 절약하는 일석이조의 득을 얻을수 있습니다. 또한 구매후 일년무료 업데이트 버전을 받을수 있는 기회를 얻을수 있습니다. Microsoft 인증GH-900 인증시험패스는 아주 어렵습니다.

자기에 맞는 현명한 학습자료 선택은 성공의 지름길을 내딛는 첫발입니다. 퍼펙트한 자료만이 시험에서 성공할 수 있습니다. ITDumpsKR 시험문제와 답이야말로 퍼펙트한 자료이죠. ITDumpsKR Microsoft 인증 GH-900 인증 시험자료는 100% 패스보장을 드립니다.

## Microsoft GH-900 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI</li> <li>CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI</li> <li>CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.</li> </ul>
주제 6	<ul style="list-style-type: none"> <li>Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.</li> </ul>

## 최신 GitHub Administrator GH-900 무료 샘플문제 (Q55-Q60):

### 질문 # 55

Which of the following two-factor authentication (2FA) methods can you use to secure a GitHub account? (Choose three.)

- A. Security questions
- B. Single sign-on
- C. Security keys
- D. Authenticator app
- E. GitHub mobile

정답: C,D,E

### 설명:

The following two-factor authentication (2FA) methods can be used to secure a GitHub account:

A). Authenticator app: You can use an authenticator app (like Google Authenticator or Authy) to generate time-based one-time passwords (TOTP) for logging in.

C). GitHub mobile: The GitHub mobile app can also be used to receive 2FA codes, adding convenience for users who prefer to manage everything from their mobile devices.

D). Security keys: Physical security keys (such as YubiKeys) can be used as a strong form of 2FA, requiring physical access to the key to authenticate.

Security questions and Single sign-on (SSO) are not considered 2FA methods in the context of GitHub account security.

### 질문 # 56

What features are offered by Copilot for Business that are not offered by Copilot for individuals?  
(Choose three.)

- A. VPN proxy support via self-signed certificates
- B. Plugs directly into the editor
- C. Organization-wide policy management
- D. Blocks suggestions matching public code
- E. Offers multi-line function suggestions
- F. Support for organization or enterprise GitHub accounts

정답: C,D,F

#### 설명:

GitHub Copilot for Business offers several features that are tailored to the needs of organizations, providing more control, security, and support compared to the individual version.

Organization-wide Policy Management:

Option B is correct because Copilot for Business allows organizations to manage policies across their entire user base, providing control over how Copilot is used within the organization.

Blocking Suggestions Matching Public Code:

Option C is correct because Copilot for Business includes enhanced security features, such as blocking code suggestions that match public code to prevent inadvertent use of unlicensed code.

Support for Organization or Enterprise GitHub Accounts:

Option E is correct because Copilot for Business supports integration with GitHub Enterprise accounts, offering additional administrative controls and integration capabilities.

### 질문 # 57

How can a user choose to receive ongoing updates about a specific activity on GitHub.com?

- A. By customizing the types of notifications you will receive in the future
- B. By subscribing to notifications for all activity in a repository
- C. By automatically watching all repositories you have push access to
- D. By upgrading from a free to a paid account

정답: B

#### 설명:

On GitHub, you can choose to receive ongoing updates about specific activities by subscribing to notifications for all activity in a repository. This allows you to stay informed about all changes, discussions, and updates related to a particular project. Additionally, GitHub provides the ability to customize notifications to suit your preferences.

### 질문 # 58

What are the defining features of Git?

- A. Low-cost local branching, convenient staging areas, multiple workflows, and being designed for managing small projects
- B. Sequential version control, cloud-based hosting service, and being designed for collaboration on large projects
- C. Distributed version control, open source software, and being designed for handling projects of any size with efficiency
- D. Centralized version control, proprietary software, and being designed for small projects

정답: C

**설명:**

Git is a widely-used version control system that has several defining features:

Distributed Version Control:

Git is a distributed version control system, meaning that every developer has a full copy of the entire repository, including its history, on their local machine. This enables greater flexibility, as work can be done offline and each user has access to the full project history.

Open Source Software:

Git is open-source, meaning its source code is freely available for use, modification, and distribution. This fosters a large community of users and contributors who continuously improve the software.

Efficiency with Large Projects:

Git is designed to handle projects of any size with speed and efficiency. It can manage large codebases and many contributors without significant performance degradation, making it suitable for everything from small personal projects to large, complex software systems.

**질문 # 59**

Which of the following default workflows are available as part of GitHub projects? (Each answer presents a complete solution. Choose three.)

- A. " Pull request merged "
- B. " Auto-archive items "
- C. " Label added to issue "
- D. " Pull request opened "
- E. " Item closed "

**정답: A,B,C**

**질문 # 60**
