ITFAS-Level-1 Premium Exam - Latest ITFAS-Level-1 Test Sample

Just choose the right Itbraindumps NICET ITFAS-Level-1 exam questions format demo and download it quickly. Download the NICET ITFAS-Level-1 exam questions demo now and check the top features of NICET ITFAS-Level-1 Exam Questions. If you think the NICET ITFAS-Level-1 exam dumps can work for you then take your buying decision. Best of luck in exams and career!!!

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Verification of a DACT's trouble signal to the fire alarm shall be received within a maximum of how many minutes when the primary telephone line is disconnected?

- A. 0
- B. 1

- C. 2
- D. 3

Answer: D

Explanation:

DACTs (Digital Alarm Communicator Transmitters) are required to supervise their telephone communication paths. If the primary line is disconnected, the system must detect and transmit a trouble signal quickly.

NFPA 72 (2022), Section 26.6.4.4.4.2.3:

"Loss of the primary means of transmission shall be annunciated at the protected premises within 4 minutes." This ensures prompt identification and correction of communication issues.

Correct answer: C. 4

NEW QUESTION # 42

Which two of the following are needed to perform a periodic test of a projected beam type smoke detector? (Choose two.)

- A. Introducing smoke
- B. Using a listed test switch
- C. Using an optical filter
- D. Blocking the transmitter

Answer: B,C

Explanation:

Projected beam smoke detectors are tested not with actual smoke, but by simulating obscuration using listed tools such as a test switch or optical filter.

NFPA 72 (2022), Section 14.4.2.2.6.2:

"Projected beam-type smoke detectors shall be tested by introducing an obscuration in the beam path using an optical density filter or a method approved by the manufacturer." Some systems include listed test switches for functional checks without disrupting alignment.

Correct answer: Using a listed test switch, Using an optical filter

NEW QUESTION # 43

Prior to any testing, all persons and facilities receiving signals and all occupants need to be notified of the testing to prevent which of the following issues?

- A. Unnecessary response
- B. Critical system shutdown
- C. Elevator usage
- D. Facility evacuation

Answer: A

Explanation:

Before performing any inspection or testing activities, it's critical to notify all affected parties, including occupants, central stations, and local authorities (as applicable), to prevent accidental dispatch of emergency services. The reason for this is clearly stated in NFPA 72 (2022 Edition), Section 14.2.3.1, which requires notification of all stakeholders before any test.

NFPA 72:2022 - 14.2.3.1

"Prior to any testing, all persons and facilities receiving alarm, supervisory, or trouble signals, and all building occupants shall be notified to prevent unnecessary response." This is critical for avoiding disruptions like fire department rollouts or building evacuations that could be triggered by system activations during a test. That makes the correct answer:

D: Unnecessary response

NEW QUESTION # 44

After successful completion of an inspection, who shall be responsible for maintaining the permanent records?

- A. AHJ
- B. Fire marshal

- C. Owner
- D. Alarm contractor

Answer: C

Explanation:

NFPA 72 assigns the responsibility for maintaining inspection and testing records to the owner or their designated representative. This ensures records are available when needed by the AHJ or for future inspections.

NFPA 72 (2022), Section 14.6.1:

"The property or building owner or the owner's designated representative shall be responsible for the inspection, testing, and maintenance of the system and for maintaining the records." This responsibility cannot be offloaded to the contractor or fire marshal unless formally designated by the owner.

Correct answer: D. Owner

NEW QUESTION # 45

Where smoke detectors are installed for protection during construction, they shall be cleaned and verified to be within the marked sensitivity range before which event?

- A. Final commissioning
- B. Walk-through by engineer
- C. Final cleaning
- D. Pre-test of system

Answer: A

Explanation:

If smoke detectors are installed during construction, they are likely exposed to dust or debris. NFPA 72 requires that these be cleaned and tested for sensitivity before final commissioning of the system.

NFPA 72 (2022), Section 17.7.1.11:

"Where detectors are used for protection during construction, they shall be cleaned or replaced prior to final system commissioning." This ensures proper performance and prevents false alarms.

Correct answer: B. Final commissioning

NEW QUESTION # 46

.....

Another great format of our ITFAS-Level-1 exam dumps is the real questions in a PDF file. This is a portable file that contains the most probable ITFAS-Level-1 test questions. The NICET ITFAS-Level-1 Pdf Dumps format is a convenient preparation method as these ITFAS-Level-1 questions document is printable and portable.
