### **PECB Certified EMS ISO 14001 Lead Auditor Exam Sample Questions (Q11-Q16):**

#### **NEW QUESTION # 11**

In the case of ISO 14001 EMS audits that follow the recommendations of ISO 19011, which two of the following statements are true?

- A. The audit plan should consider the effect of the audit activities on the auditee's processes.
- B. Internal auditors can audit their own work.
- C. EMS auditors do not need to evaluate the organisation's capability to respond to and recover from disruptive incidents.
- D. An audit on an external provider may also be referred to as a third-party audit.
- E. The frequency of internal audits is determined based on the environmental importance of the processes concerned.
- F. Second-party audits are conducted by certification body auditors with experience in evaluating legal compliance.

**Answer: A,E**

Explanation:

From ISO 19011:2018:

Clause 5.4.3:

"The audit plan should consider the potential impact on the auditee's processes during audit activities to minimize disruption." Clause 5.2 and 5.3:

"The audit programme frequency should be based on the significance of the environmental aspects, past audit results, changes, and risks." Internal auditors auditing their own work violates auditor impartiality (Clause 4.4.2 - Auditor Independence).

Second-party audits are customer-supplier audits, not certification body audits (Clause 3.7 - Audit Types).

EMS auditors must consider the organization's preparedness for emergencies (ISO 14001:2015 Clause 8.2).

Reference: ISO 19011:2018 Clauses 4.4.2, 5.2, 5.3, 5.4.3; ISO 14001:2015 Clause 8.2.

#### **NEW QUESTION # 12**

Showitoff is an organisation specialising in the design and production of wall decorating materials for the domestic market. During an ISO 14001 certification audit of the site, the auditor comes across an open, walled area just outside the maintenance department. It contains various scraps of wood and metal as well as several rusty components. They are lying on an oily floor. When asked about

it, the EMS Manager states that he presumes that the materials come from maintenance work.

The auditor interviews the Maintenance Manager in his department. He notes that shelves containing various spares are well labelled and neatly stacked. He asked about the "dump" outside and is told that it contains some excess materials that the Manager likes to keep in case they come in handy at some stage. The auditor points out that the "dump" might be classed under regulations as a landfill site, which requires an operating licence. The Maintenance Manager is not aware of such a licence.

The auditor decides to review the process for evaluation of compliance with environmental regulations in more depth.

Select three options that provide a meaningful audit trail for this process.

- A. What environmental aspects have been identified as being associated with regulations?
- B. Is a regulatory expert employed on the internal audit programme?
- C. How is the handling of waste materials monitored?
- D. How is the cost of unused or excess materials calculated?
- E. Are operators trained in the identification of legal requirements?
- F. How is the material content of scrap items verified?
- G. How are maintenance staff made aware of regulatory requirements?
- H. What are the qualifications of the EMS and Maintenance Managers?

**Answer: A,C,G**

#### **NEW QUESTION # 13**

An internal auditor of a manufacturer of aluminium products for the car industry asked to see the most recent management review minutes and found no reference to the completion of some of the current environmental objectives. He raised a nonconformity against section 9.3.c of ISO 14001 in Report IA202. The nonconformity (NC3) stated:

"Top management has not analysed why some of the environmental objectives have been met since the last management review." When discussing the finding with the Environmental Manager, the auditor was informed that planned actions taken to complete the current environmental objectives were specifically covered in the internal audit programme and did not need any further work done. Select one of the options which would constitute an effective response by the Environmental Manager to the nonconformity.

- A. Schedule additional internal audits in the internal audit programme for the next year, specifically to cover the completion of all environmental objectives.
- B. Revise the incomplete environmental objectives to make them more achievable within 12 months.
- C. Reject the non-conformity. Objectives do not have to be met within a year. Plans on how to achieve objectives are established and reviewed when conducting the internal audit programme.
- D. Embark on a training programme for internal auditors on the setting and evaluation of environmental objectives.

**Answer: A**

#### **NEW QUESTION # 14**

The audit lifecycle describes the ISO 19011 process for conducting an individual audit.

Which two of the following are part of conducting the audit activities?

- A. Determine audit conclusion
- B. Determine audit feasibility
- C. Distribute the audit report
- D. Assign work to the audit team
- E. Hold the opening meeting
- F. Verify corrective action effectiveness

**Answer: A,E**

Explanation:

According to ISO 19011:2018 Clause 6.4.3 (Conducting audit activities):

Conducting audit activities includes:

Holding opening meetings (A).

Collecting and verifying information.

Generating audit findings.

Determining audit conclusions (F).

Assigning work (B) and determining feasibility (E) occur during audit planning.

Report distribution (C) and corrective action verification (D) occur after audit completion.

### NEW QUESTION # 15

XM, a chain of 25 petrol stations, established an EMS following the requirements of ISO 14001, which was third-party certified 10 years ago. You are performing an internal audit before the fourth certification cycle.

During the audit to the EMS Manager (EM), the following dialogue takes place:

You: Could you please give me some details on the inspection of underground tanks in each station?

EM: It's very simple. There is a regulation that requires an annual leak inspection.

You: Who performs these inspections?

EM: I personally contract the inspectors and submit the results to the local authority. These are the certificates submitted last year.

You: I see only 22 certificates. There are three missing.

EM: The tanks of those three stations will be removed next year and replaced by new ones. I phoned the local authority and they told me that I do not need to send any report of the tanks that will be changed.

Which one of the following would be your next question?

- A. Can I see the contract XM signed with the inspector?
- B. Have you planned any final disposal of the tanks to be removed?
- C. Can I see the plan for the installation of the new tanks?
- D. **Did you ask the local authority to send a written confirmation of their decision?**

**Answer: D**

Explanation:

According to ISO 14001:2015 Clause 9.1.2 (Compliance Obligations) and Clause 7.4 (Communication):

The organization must retain evidence of compliance obligations and communications with regulatory bodies.

Verbal confirmation from the authority is insufficient; written confirmation ensures objective evidence for audit purposes.

Reference: ISO 14001:2015 Clause 9.1.2, 7.4.

### NEW QUESTION # 16

.....

We all know that PECB Certified EMS ISO 14001 Lead Auditor Exam (ISO-14001-Lead-Auditor) exam dumps are an important section of the PECB Certified EMS ISO 14001 Lead Auditor Exam (ISO-14001-Lead-Auditor) exam that is purely based on your skills, expertise, and knowledge.
