P.S. Free & New C1000-173 dumps are available on Google Drive shared by BraindumpsVCE: https://drive.google.com/open?id=1NNs415OvUEGtn0aBkTa5Up_t65I7wdJb

Our C1000-173 study materials are written by experienced experts in the industry, so we can guarantee its quality and efficiency. The content of our C1000-173 learning guide is consistent with the proposition law all the time. We can't say it's the best reference, but we're sure it won't disappoint you. This can be borne out by the large number of buyers on our website every day. A wise man can often make the most favorable choice, I believe you are one of them. If you are not at ease before buying our C1000-173 Actual Exam, we have prepared a free trial for you. Just click on the mouse to have a look, giving you a chance to try. Perhaps this choice will have some impact on your life.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 2	<ul style="list-style-type: none"> Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.
Topic 3	<ul style="list-style-type: none"> Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.

Free PDF Quiz Marvelous C1000-173 - IBM Cloud Pak for Data v4.7 Architect Test Passing Score

With the help of the C1000-173 practice exam questions and preparation material offered by BraindumpsVCE, you can pass any C1000-173 certifications exam in the first attempt. You don't have to face any trouble, and you can simply choose to do a selective C1000-173 brain dumps to pass the exam. We offer guaranteed success with C1000-173 Dumps Questions on the first attempt, and you will be able to pass the C1000-173 exam in short time. You can always consult our C1000-173 certified professional support if you are facing any problems.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which of the following statements best describes the business value of Watson Assistant?

- A. It provides enhanced security for cloud-based services.
- B. It significantly reduces the time required for data processing.
- C. It offers an advanced platform for numerical computation.
- D. It improves customer engagement through AI-driven conversations.

Answer: D

NEW QUESTION # 65

In the context of Cloud Pak for Data and OpenShift, what is the advantage of containerization for service availability?

- A. Limiting the scalability of services
- B. Reducing the efficiency of resource utilization
- C. Decreasing the portability of applications
- D. Facilitating easier backup and recovery processes

Answer: D

NEW QUESTION # 66

Which component must be enabled in order to render business lineage when installing IBM Knowledge Catalog?

- A. Knowledge graph
- B. Data quality
- C. Automated metadata lineage
- D. Data graph

Answer: A

Explanation:

Business Lineage and Knowledge Graph: IBM Knowledge Catalog leverages a Knowledge Graph to store and visualize the relationships between various assets, including data assets, governance artifacts (like business terms), and the flow of data. Business lineage, which shows the end-to-end journey of data in business terms, relies heavily on these interconnected relationships within the Knowledge Graph.

Documentation Confirmation: IBM's documentation explicitly states: "To view lineage, you can have any role in a catalog. Optional This feature is not available by default. Knowledge graph must be installed with IBM Knowledge Catalog, IBM Knowledge Catalog Premium, or IBM Knowledge Catalog Standard.

For information on installing knowledge graph, see Specifying additional installation options in the IBM Software Hub documentation." (Source: IBM Documentation on Lineage). It further clarifies, "Enable knowledge graph to gain access to the lineage feature, business-term relationship search, and the relationship explorer."

NEW QUESTION # 67

When creating a Db2 Big SQL service instance, which two service resource items should be taken into account when sizing the cluster?

- A. Number of virtual cores
- B. Number of workers
- C. Number of physical cores
- D. Amount of memory
- E. Maximum expected throughput

Answer: B,D

Explanation:

When provisioning a Db2 Big SQL service instance in IBM Cloud Pak for Data, key considerations include the amount of memory available per worker node and the total number of worker nodes. These factors directly affect query execution parallelism and system capacity. The system does not distinguish between physical and virtual cores at the configuration level. Throughput is an outcome of sizing, not a direct sizing parameter.

Therefore, memory and number of workers are the two most critical sizing metrics.

NEW QUESTION # 68

What outcomes can be achieved from Match 360?

- A. Produces a AI based dashboard to let users analyze business data.
- B. Produces statistics and graphs to let users analyze and explore master data.
- C. Connect disparate data sources to provide a virtual view of your data.
- D. Uses a dialog format to talk with your data to get insights.

Answer: B

Explanation:

Match 360 is IBM's master data management (MDM) service integrated into Cloud Pak for Data. It produces master data views along with statistics, graphs, and insights that allow users to explore, analyze, and understand their master data entities (e.g., customers, products). While it does integrate data from disparate sources, its focus is on consolidating and providing master data analysis rather than virtual views (B) or conversational analytics (A).

NEW QUESTION # 69

.....

The BraindumpsVCE C1000-173 exam practice questions are being offered in three different formats. These formats are BraindumpsVCE C1000-173 web-based practice test software, desktop practice test software, and PDF dumps files. All these three BraindumpsVCE C1000-173 exam questions format are important and play a crucial role in your IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam preparation. With the BraindumpsVCE C1000-173 exam questions you will get updated and error-free IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam questions all the time. In this way, you cannot miss a single Network Security Specialist C1000-173 exam question without an answer.
