## 312-38 Valid Braindumps Free, 312-38 Exam Bible

How our 312-38 study questions can help you successfully pass your coming 312-38 exam? The answer lies in the outstanding 312-38 exam materials prepared by our best industry professionals and tested by our faithful clients. Our exam materials own the most authentic and useful information in questions and answers. For our 312-38 practice material have been designed based on the format of real exam questions and answers that you would surely find better than the other exam vendors'.

The EC-Council Certified Network Defender (CND) certification is a valuable certification for IT security professionals who are responsible for protecting and securing networks. EC-Council Certified Network Defender CND certification exam is rigorous and requires extensive preparation and study. However, the benefits of obtaining the certification are numerous, including increased job opportunities, higher salaries, and recognition as a skilled and knowledgeable security professional.

### EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q678-Q683):

#### NEW QUESTION # 678

Which of the following connects the SDN controller and SDN networking devices and relays information from network services to network devices such as switches and routers?

- A. Southbound API
- B. Northbound API
- C. Eastbound API
- D. Westbound API

**Answer: A**

#### NEW QUESTION # 679

Peter works as a network administrator at an IT company. He wants to avoid exploitation of the cloud, particularly Azure services. Which of the following is a group of PowerShell scripts designed to help the network administrator understand how attacks happen and help them protect the cloud?

- A. Sysmon
- B. SecurityPolicyDsc
- C. POSH-Sysmon
- D. MicroBurst

**Answer: D**

Explanation:

MicroBurst is a collection of PowerShell scripts designed to help network administrators understand how attacks occur and to protect cloud environments, particularly Azure services.

These scripts aid in detecting vulnerabilities, simulating attacks, and implementing defensive measures to secure the cloud infrastructure.

#### NEW QUESTION # 680

Which type of firewall consists of three interfaces and allows further subdivision of the systems based on specific security objectives of the organization?

- A. Bastion host
- B. Screened subnet
- C. Multi-homed firewall
- D. Unscreened subnet

**Answer: C**

#### NEW QUESTION # 681

Which of the following techniques uses a modem in order to automatically scan a list of telephone numbers?

- A. Warchalking
- B. War driving
- C. War dialing
- D. Warkitting

**Answer: C**

Explanation:

War dialing is a technique of using a modem to automatically scan a list of telephone numbers, usually dialing every number in a local area code to search for computers, BBS systems, and fax machines. Hackers use the resulting lists for various purposes, hobbyists for exploration, and crackers (hackers that specialize in computer security) for password guessing.

Answer option C is incorrect. Warchalking is the drawing of symbols in public places to advertise an open Wi-Fi wireless network. Having found a Wi-Fi node, the warchalker draws a special symbol on a nearby object, such as a wall, the pavement, or a lamp post. The name warchalking is derived from the cracker terms war dialing and war driving.

Answer option A is incorrect. War driving, also called access point mapping, is the act of locating and possibly exploiting connections to wireless local area networks while driving around a city or elsewhere. To do war driving, one needs a vehicle, a computer (which can be a laptop), a wireless Ethernet card set to work in promiscuous mode, and some kind of an antenna which can be mounted on top of or positioned inside the car.

Because a wireless LAN may have a range that extends beyond an office building, an outside user may be able to intrude into the network, obtain a free Internet connection, and possibly gain access to company records and other resources.

Answer option D is incorrect. Warkitting is a combination of wardriving and rootkitting. In a warkitting attack, a hacker replaces the firmware of an attacked router. This allows them to control all traffic for the victim, and could even permit them to disable SSL by replacing HTML content as it is being downloaded. Warkitting was identified by Tsow, Jakobsson, Yang, and Wetzel in 2006. Their discovery indicated that 10% of the wireless routers were susceptible to WAPjacking (malicious configuring of the firmware settings, but making no modification on the firmware itself) and 4.4% of wireless routers were vulnerable to WAPkitting (subverting the router firmware). Their analysis showed that the volume of credential theft possible through Warkitting exceeded the estimates of credential theft due to phishing.

## NEW QUESTION # 682

FILL BLANK

Fill in the blank with the appropriate term. \_\_\_\_\_ management is an area of systems management that involves acquiring, testing, and installing multiple patches (code changes) to an administered computer system.

**Answer:**

Explanation:

Patch

Explanation:

Patch management is an area of systems management that involves acquiring, testing, and installing multiple patches (code changes) to an administered computer system. Patch management includes the following tasks:

Maintaining current knowledge of available patches

Deciding what patches are appropriate for particular systems

Ensuring that patches are installed properly

Testing systems after installation, and documenting all associated procedures, such as specific configurations required A number of products are available to automate patch management tasks, including RingMaster's Automated Patch Management, PatchLink Update, and Gibraltar's Everguard.
