Topic 4	• Protect devices: In this topic, aspiring administrators get knowledge about configuration of endpoint security and management of device updates by using Intune.

Microsoft Endpoint Administrator Sample Questions (Q167-Q172):

NEW QUESTION # 167

You have a Microsoft 365 subscription. The subscription contains computers that run Windows 11 and are enrolled in Microsoft Intune. You need to create a compliance policy that meets the following requirements:

- * Requires BitLocker Drive Encryption (BitLocker) on each device
- * Requires a minimum operating system version

Which setting of the compliance policy should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 168

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD)

domain named contoso.com

What should you do?

- A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- **B. Create a provisioning package (.ppkg) file and email the file to the user**
- C. Create a Windows To Go workspace and ship the workspace to the user
- D. Create a Sysprep Unattend (.xml) file and email the file to the user

Answer: B

Explanation:

A provisioning package (.ppkg) is a container for a collection of configuration settings. With Windows 10, you can create

provisioning packages that let you quickly and efficiently configure a device without having to install a new image. Provisioning packages are simple enough that with a short set of written instructions, a student or non-technical employee can use them to configure their device. This can result in a significant reduction in the time required to configure multiple devices in your organization.

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-create-package>

NEW QUESTION # 169

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-register>

NEW QUESTION # 170

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS.

What should you configure first?

- A. Device settings in Microsoft Azure Active Directory (Azure AD)
- B. Device categories in Intune
- **C. Groups that have dynamic membership rules in Microsoft Azure Active Directory (Azure AD)**
- D. Corporate device identifiers in Intune

Answer: C

Explanation:

Mendel is correct (IMHO) the line "Different policies will apply depending on the version of Android or iOS installed on the device." the only way to do this is with D.

(A) This does not allow you to segregate based on OS version.

(B) Device settings don't allow you to segregate based on OS version

(C) You can use this, but you would have to manually add the category per device

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-dynamic-membership>

<https://www.anoopenair.com/create-azure-ad-dynamic-groupsmanaging-devices-via-intune/>

NEW QUESTION # 171

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices. All devices are in the same time zone.

You create an update rings policy and assign the policy to all Windows devices.

On the November 1, you pause the update rings policy.

All devices remain online.

Without further modification to the policy, on which date will the devices next attempt to update?

- A. December 6
- B. December 1
- **C. November 15**
- D. November 22

Answer: C

NEW QUESTION # 172
