2026 Salesforce AP-223 –The Best Exam Cost

The Salesforce AP-223 questions PDF questions are portable and printable, making it simple for you to prepare for the CPQ and Billing Consultant Accredited Professional (AP-223) test in a short time. Smart devices such as smartphones, tablets, and laptops all support the Salesforce AP-223 Exam PDF dumps format of our study material.

Salesforce CPQ and Billing Consultant Accredited Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23

Which three customer teams should be invited to participate in scoping a Revenue Cloud project?

- A. Information Technology
- B. Sales Operations
- C. Accounting and Finance
- D. Customer Service
- E. Human Resources

Answer: A,B,C

Explanation:

Scoping a Revenue Cloud project involves understanding the business needs, defining the project goals, and planning the implementation strategy¹². The teams that should be involved in this process are those that have a direct stake in the project's outcome and can provide valuable input into the project's requirements¹². These teams typically include:

Accounting and Finance: This team can provide insights into the financial processes that the Revenue Cloud project will support, such as billing, revenue recognition, and financial reporting¹².

Sales Operations: This team can provide insights into the sales processes that the Revenue Cloud project will support, such as quote-to-cash, contract management, and sales forecasting¹².

Information Technology: This team can provide technical expertise and support for the implementation of the Revenue Cloud project, including system integration, data migration, and IT infrastructure¹². Reference: 12

NEW QUESTION # 24

A Revenue Cloud Consultant is setting up a new product in the product catalog. The consultant already created a Product Classification and a set of Product Attributes, but the attributes are not appearing when viewing the product in the workspace. What is the cause of this error?

- A. The consultant forgot to publish the product in the product catalog
- B. The consultant did not activate the attribute group in the Product Workspace
- C. The consultant did not assign the attributes to the Product Classification.

Answer: C

NEW QUESTION # 25

Universal Containers sell boxes based on size. Price for a specific product is based on the selection of length and width and height. which cpq pricing functionality should be used here?

- A. Price Rule with lookup table
- B. Percent of total
- C. Multi Dimensional Quoting
- D. Discount Schedule

Answer: A

Explanation:

This use case describes a three-dimensional pricing model where the price of a product is determined by length × width × height. These values are user selections (likely stored on Quote Line fields), and CPQ must determine the correct price based on a matrix of dimensions.

Salesforce CPQ documentation identifies Lookup Tables used with Price Rules as the standard method for implementing matrix or multi-attribute pricing.

✓ Why Price Rule with Lookup Table is the correct answerSalesforce CPQ Lookup Tables allow you to store pricing data externally from the product record and return the correct price based on multiple inputs.

Lookup tables can key off of multiple dimensions, e.g.:

Length

Width

Height

A price rule performs the lookup at calculation time and sets:

List Price, or

Custom price field

Create custom fields on Quote Line:

Length__c

Width__c

Height_c

Build a Lookup Table with key columns:

Length range

Width range

Height range

Resulting price

Build a Price Rule that uses:

Price Conditions → to map entered dimensions

Lookup Query → to fetch matching price

Price Action → to set the Quote Line's Unit Price

Relevant capabilities: Typical CPQ design for dimensional pricing: This is exactly the pattern Salesforce recommends for multi-attribute pricing.

□ Why the other options are incorrect

A. Percent of Total Used for:

Support fees
Add-on fees based on parent products Not for dimensional pricing.

B. Multi-Dimensional Quoting (MDQ) Used for:

Term-based pricing (Year 1, Year 2, Year 3)

Usage tiers over time

MDQ does not support 3-dimensional physical attributes.

C. Discount Schedule Supports:

Volume tiering

Quantity-based pricing

Does not support multi-attribute dimensional pricing.

NEW QUESTION # 26

Universal Containers has setup a partner type custom field on the CPQ quote object in order to ensure partners receive discounts. Setting the partner type on the quote should cause a recalculation because the field is an input to the product prices. How can a partner type trigger a new calculation for the quote?

- A. Refresh post install scripts
- B. Setup a quote calculator plugin to ensure the custom field triggers calculation
- C. Include the field in a custom metadata setting
- D. Add the partner type field to the calculating fields field set

Answer: D

Explanation:

In Salesforce CPQ, if a custom field is an input to product prices and you want a change in this field to trigger a recalculation, you should add this field to the calculating fields field set. This is because Salesforce CPQ's Advanced Quote Calculator determines quote and quote line prices in response to user or automated actions. Therefore, adding the 'partner type' field to the calculating fields field set will ensure that setting the partner type on the quote triggers a new calculation. NEW QUESTION # 27

An Invoice Scheduler is set up with Target Date = January 15 and Bill Usage Charges = False. Which setting will generate invoice lines?

- A. Order Products with Next Billing Date equal to or earlier than January 15
- B. Order Products with Next Charge Date equal to or earlier January 15
- C. Order Products with Next Billing Date equal to or after January 15
- D. Usage Summaries with Next Billing Date equal to or earlier than January 15

Answer: A

Explanation:

Invoice Scheduler Settings:

Target Date = Jan 15

Bill Usage Charges = FALSE

This means:

The scheduler will generate invoice lines for Order Products only, not usage summaries. Thus the correct rule is:

✓ A - Order Products with Next Billing Date equal to or earlier than January 15 Why the other options are wrong: Option Why Incorrect B - Usage Summaries Ignored because Bill Usage Charges = False.

C - Next Billing Date equal to or after

Billing only generates lines for dates <= Target Date.

D - Next Charge Date

Not used by Invoice Scheduler.

Thus A is correct.

NEW QUESTION # 28

.....

Salesforce training pdf material is the valid tools which can help you prepare for the AP-223 actual test. AP-223 vce demo gives you the prep hints and important tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. With the help of AP-223 study material, you will master the concepts and techniques that ensure you exam success. What's more, you can receive AP-223 updated study material within one year after purchase. Besides, you can rest assured to enjoy the secure shopping for Salesforce exam dumps on our site, and your personal information will be
