NEW QUESTION 43
A developer created a weather app that contains multiple Lightning web components. One of the components, called Toggle, has a toggle for Fahrenheit or Celsius units. Another component, called Temperature, displays the current temperature in the unit selected in the Toggle component. When a user toggles from Fahrenheit to Celsius or vice versa in the Toggle component, the information must be sent to the Temperature component so the temperature can be converted and displayed.
What is the recommend way to accomplish this?

- A. The Toggle component should call a method in the Temperature component.
- B. Use Lightning Message Service to communicate between the components.
- C. Create a custom event to handle the communicate between the components.
- D. Use Lightning Message Service to communicate between the component.

Answer: C

NEW QUESTION 44
A developer created a Visualforce page and custom controller to display the account type field as shown below. Custom controller code: `public class customCtrlr { private Account theAccount; public String actType; public customCtrlr() { theAccount = [SELECT Id, Type FROM Account WHERE Id = :apexPages.currentPage().getParameters().get('id')]; actType = theAccount.Type; } }` Visualforce page snippet:
The Account Type is {!actType}. The value of the account type field is not being displayed correctly on the page. Assuming the custom controller is property referenced on the Visualforce page, what should the developer do to correct the problem?

- A. Add with sharing to the custom controller.
- B. Change theAccount attribute to public.
- C. Convert theAccount.Type to a String.
- D. Add a getter method for the actType attribute.

Salesforce PDI (Platform Developer I) Exam is one of the most sought-after certifications for developers looking to enhance their career in the Salesforce ecosystem. PDI exam is designed to test a developer's knowledge and skills in building custom applications on the Salesforce platform. Passing PDI Exam is a significant milestone for developers as it validates their expertise in Salesforce development and opens up new career opportunities.

Salesforce Platform Developer I (PDI) Sample Questions (Q35-Q40):

NEW QUESTION # 35

What are three considerations when using the @InvocableMethod annotation in Apex?
Choose 3 answers

- A. A method using the @InvocableMethod annotation can be declared as Public or Global.
- B. A method using the @InvocableMethod annotation must define a return value.
- C. A method using the @InvocableMethod annotation must be declared as static
- D. A method using the @InvocableMethod annotation can have multiple input parameters.
- E. Only one method using the @InvocableMethod annotation can be defined per Apex class.

Answer: A,C,E

NEW QUESTION # 36

A developer must create a DrawList class that provides capabilities defined in the Sortable and Drawable interfaces. public interface Sortable { void sort(); } public interface Drawable { void draw(); } Which is the correct implementation?

- A. Public class DrawList implements Sortable, Drawable {
 public void sort() { /*implementation*/ }
 public void draw() { /*implementation*/ }
}
- B. Public class DrawList implements Sortable, Implements Drawable {
 public void sort() { /*implementation*/ }
 public void draw() { /*implementation*/ }
}
- C. Public class DrawList extends Sortable, Drawable {
 public void sort() { /*implementation*/ }
 public void draw() { /*implementation*/ }
}
- D. Public class DrawList extends Sortable, extends Sortable, extends Drawable { public void sort() { /*implementation*/ }
 public void draw() { /* implementation */ }

Answer: A

NEW QUESTION # 37

What are three capabilities of the <lng: require> tag when loading JavaScript resources in Aura components?
Choose 3 answers

- A. Specifying loading order
- B. One-time loading for duplicate scripts

- C. Loading externally hosted scripts
- D. Loading scripts in parallel
- E. Loading Files from Documents

Answer: A,B,C

Explanation:

- * Option A: The <ltngrequire> tag ensures that scripts are loaded only once, even if referenced multiple times.
- * Option D: The tag allows you to specify the order of scripts to ensure dependencies are loaded correctly.
- * Option E: Externally hosted scripts can be loaded using the scripts attribute.

Not Suitable:

- * Option B (Loading scripts in parallel): Scripts are loaded sequentially to ensure proper dependency handling.
- * Option C (Loading Files from Documents): Files must be hosted externally or in static resources, not in Documents.

NEW QUESTION # 38

If apex code executes inside the execute() method of an Apex class when implementing the Batchable interface, which statement are true regarding governor limits? Choose 2 answers

- A. The apex governor limits are reset for each iteration of the execute() mrrthod.
- B. The Apex governor limits are relaxed while calling the costructor of the Apex class.
- C. The Apex governor limits might be higher due to the asynchronous nature of the transaction.
- D. The Apex governor limits cannot be exceeded due to the asynchronous nature of the transaction,

Answer: A,C

NEW QUESTION # 39

A developer is implementing an Apex class for a financial system. Within the class, the variables 'creditAmount' and 'debtAmount' should not be able to change once a value is assigned. In which two ways can the developer declare the variables to ensure their value can only be assigned one time? Choose 2 answers

- A. Use the final keyword and assign its value in the class constructor.
- B. Use the static keyword and assign its value in the class constructor.
- C. Use the final keyword and assign its value when declaring the variable.
- D. Use the static keyword and assign its value in a static initializer.

Answer: C,D
