100% Pass Quiz CIPS - L3M6 - Socially Responsible Warehousing and

Distribution –Reliable New Exam Bootcamp

Maybe you still have doubts about our L3M6 study materials. You can browser our official websites. We have designed a specific module to explain various common questions such as installation, passing rate and so on. If you still have other questions about our L3M6 Exam Questions, you can contact us directly via email or online, and we will help you in the first time with our kind and professional suggestions. All in all, our L3M6 training braindumps will never let you down.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q128-Q133):

NEW QUESTION # 128

The _____ runs the global disclosure system that enables organizations, cities, states, and regions to measure and manage their environmental impacts.

- A. Company Disclosure Project
- B. Carbon Disclosure Programme
- **C. Carbon Disclosure Project**
- D. Company Disclosure Programme

Answer: C

Explanation:

The Carbon Disclosure Project (CDP) is the organization that operates a global disclosure system, allowing entities to report and manage their environmental impacts, particularly in areas like carbon emissions, water usage, and deforestation. The CIPS L3M6 module identifies the CDP as a critical tool for transparency and accountability in sustainability efforts, widely used by businesses and public sector organizations.

NEW QUESTION # 129

Land take can have knock-on effects, e.g., supply chains may build up in the location, which creates more employment opportunities, which brings more people to the area, which can then lead to housing and schools being built.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

Land take triggers cascading effects: new factories attract supply chains, jobs draw residents, and population growth spurs infrastructure (housing, schools). The CIPS L3M6 module notes this in LO2 as an environmental and social impact, often increasing emissions but also economic activity-a true statement.

Reference:

NEW QUESTION # 130

_____ is unwanted or excessive sound that can have detrimental effects on human health and environmental quality.

- A. Noise Abuse
- B. Noise Corruption
- C. Noise Eruption
- **D. Noise Pollution**

Answer: D

Explanation:

Noise Pollution is unwanted/excessive sound harming health (e.g., stress) and ecosystems (e.g., wildlife disruption). The CIPS L3M6 module defines it in LO2 as a supply chain concern-e.g., truck noise near warehouses. Other terms are invalid, making 'noise

pollution" the correct concept.

NEW QUESTION # 131

Which of the following sources contribute to a warehouse carbon footprint calculation? Select all that apply.

- A. Transport
- B. Energy use from heating, cooling, and insulation
- C. Material handling and other equipment
- D. Waste

Answer: A,B,C,D

Explanation:

A warehouse's carbon footprint measures the total greenhouse gas (GHG) emissions generated by its operations, both directly and indirectly. According to the CIPS L3M6 syllabus, all listed sources-energy use from heating, cooling, and insulation; material handling and other equipment; transport; and waste-are key contributors. Energy use (A) includes electricity and fuel for climate control, a major emission source in warehousing. Material handling equipment (B), such as forklifts, often relies on fossil fuels or electricity, adding to the footprint. Transport (C) covers emissions from vehicles moving goods to, from, and within the warehouse, a significant factor in logistics. Waste (D) contributes through disposal processes, including methane from landfills. The syllabus emphasizes monitoring these elements as part of CSR to reduce environmental impact, making "All the above" the correct choice.
Reference:

NEW QUESTION # 132

The government needs to ensure their laws keep pace with economic, demographic, and technological change.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

Governments must update laws to address economic shifts (e.g., green markets), demographic trends (e.g., urban growth), and tech advances (e.g., electric vehicles). The CIPS L3M6 module stresses this adaptability-e.g., new emissions standards for drones reflect tech change. This ensures relevance in regulating supply chains, a true statement central to LO2's governance focus.
