## 新版L4M7題庫上線，L4M7考題資訊

Fast2test考題網剛剛更新的CIPS L4M7題庫和大家分享了，如果你正在準備L4M7考試的話，可以憑藉這份最新的題庫指定有效的複習計畫。更新後的考題涵蓋了考試中心的正式考試的所有的題目。確保了考生能順利通過L4M7考試，獲得CIPS認證證照。這個考古題是由我們提供的。每個人都有潛能的，所以，當面對壓力時，要相信自己，一切都能處理得好。

CIPS L4M7考試是一個有價值的認證計劃，專為希望增強其資產管理知識和技能的專業人士而設計。該考試涵蓋與資產管理相關的廣泛主題，被全球認可為該領域能力的基準。通過考試，專業人士可以展示其在資產管理方面的熟練程度，並改善其職業前景。該考試適用於廣泛的行業專業人士，對於那些希望在資產管理方面推進職業生

涯的人士來說，這是一個有價值的資格證書。

## 最新的 Level 4 Diploma in Procurement and Supply L4M7 免費考試真題 (Q240-Q245):

### 問題 #240

Which of the following allow an organisation to have more flexible space for storage by leveraging the facilities of other parties?  
Select TWO that apply.

- A. Eliminating dead stock or inventory
- B. Adopting carousel-type storage
- C. Consignment stocking
- D. Temporary warehousing
- E. Installing double-deep pallet racking

答案: C,D

解題說明:

Temporary warehousing (or 'Very short-term warehousing') is offered in the market where organisations make their requirements for space open online to offers or bids for available space. This appears to be an emerging market and service providers in the UK and USA typically quote a price per pallet per week with some also requiring a 'transaction fee' for movements of each pallet in and out.

Consignment stocking is a facility offered by a supplier to a buyer to allow a delivery of stock to the buyer with payment only after it is used or sold to a customer.

Double-deep pallet racking and carousel-style storage are two tools that leverage space within a warehouse:

Double-deep pallet rack

Carousel style storage

### 問題 #241

When designing the layout of a warehouse or stores area, one of the factors to consider is the width of the aisles between the racking. Which of the following is a main consideration when calculating the aisle width?

- A. Overall height of driver's cage of the forklift truck
- B. Dimensional depth and height of pallet racks
- C. Dimensional length and depth of the items on a pallet
- D. Turning circle of the forklift truck and the size of the pallet being carried

答案: D

解題說明:

The turning circle of the forklift truck and the size of the pallet it carries are primary factors in determining aisle width. The aisle width must accommodate forklift maneuvers for safe and efficient access to stored items. Whole-life asset management emphasizes warehouse layout planning to optimize space usage, reduce handling time, and enhance safety.

### 問題 #242

What term describes a method used to account for inventory, where the oldest produced items are recorded as sold first?

- A. First in, first out
- B. First in, last out
- C. Last in, last out
- D. Last in, first out

答案: A

### 問題 #243

Assuming that all other factors are constant except one, the net present value of a capital expenditure increases when...?

- A. Cash outflow during a time period increases
- B. The discounted rate increases
- C. Net cash flow during a time period increases
- D. The initial cost of a project increases

答案: C

解題說明:

Net present value (NPV) is the 'today' net value that deprives from 'future' cash flow of an investment or a capital purchase.

The following formula is used to calculate NPV

Where:

$R_t$  is the net cash flow (cash inflow - cash outflow) during the period  $t$   $i$  is the discount rate  $t$  is the number of time periods As you can conclude from the above formula, the net present value increases when the numerators (net cash flows) increase and/or denominators ( $1+i$ ) decrease. So the correct answer should be "Net cash flow during a time period increases" The purpose of this exercise is to help you identify the factors that influence the net present value and how to increase/decrease NPV in real-world scenario.

#### 問題 #244

A logistics company has a 2-story warehouse in the suburban area. The goods receiving area and dispatch area are located on the ground floor only. There is a lift connecting the two floors. The daily operations of the warehouse are quite busy. Which of the following would be the best arrangement for this warehouse?

- A. Pallets, roller cages and other bulky items will be stored on the ground floor, smaller items in plastic tote boxes will be stored on the first floor
- B. Forklifts and other warehouse equipment will park on the ground floor, all inventories will be stored on the first floor
- C. Small items in tote boxes will be stored on the ground floor with forklifts and other equipment, high- usage palletised items will be stored on the first floor
- D. Medium- to low-usage palletised items will be stored on the ground floor, high-usage items will be stored on the first floor where the building administrative office is located

答案: A

解題說明:

The purposes of a warehouse are to keep the inventories in good condition and to ensure that the operations is smooth. In the scenario, the warehouse has 2 stories, with goods-in and goods-out areas located on the ground floor and a lift connecting the stories. The lift could become a bottleneck if the goods inside the warehouse are not well-arranged.

Since the lift is often small with limited load capacity, putting heavy bulk items on the first floor will cause bottleneck and increase the chance of accidents. Therefore, palletised items (even they have low-usage) should be placed on the ground floor. Smaller and lighter items should be stored on the first floor.

This questions does appear in the real exam. To answer the question, students should imagine the situation.
