NSK300試験に合格して認定を取得すると、対処方法がわからない多くのハンディキャップが発生する可能性があるため、NSK300試験に合格して受験することは難しいと思われるかもしれません。認証。これらの問題を解決し、試験に簡単に合格できるようにするため、このようなNSK300試験急流を遵守しました。NSK300試験問題集を購入した後悔がないことをお約束します。NSK300試験問題の合格率は99%~100%であり、必ず合格します。

Netskope NSK300 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.
トピック 2	• Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.
トピック 3	• Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.
トピック 4	• Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.
トピック 5	• Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.

NSK300試験勉強過去問 & NSK300的中率

NSK300テスト資料を購入したすべてのお客様を大切にしています。お客様との協力を継続したいと考えています。NSK300テストの質問は常に更新および改善されているため、必要な情報を入手してより良い体験を得ることができます。NSK300のテストの質問は、デジタル化のペースに従い、絶えず改裝し、新しいものを追加しています。NSK300試験準備がお客様に誠実に役立つことを実感していただければ幸いです。また、NSK300トレーニングガイドの合格率は99%から100%であり、NSK300試験に高いスコアで合格することができます。

Netskope Certified Cloud Security Architect 認定 NSK300 試験問題 (Q57-Q62):

質問 #57

Review the exhibit.

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data. Referring to the exhibit, which statement is correct?

- A. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- B. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.
- C. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.
- D. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.

正解: A

質問 #58

Review the exhibit.

You created an SSL decryption policy to bypass the inspection of financial and accounting Web categories.

However, you still see banking websites being inspected.

Referring to the exhibit, what are two possible causes of this behavior? (Choose two.)

- A. The policy is in a "disabled" state.
- B. An incorrect action has been specified.
- C. The policy is in a "pending changes" state.
- D. An incorrect category has been selected

正解: B、C

質問 # 59

A recent report states that users are using non-sanctioned Cloud Storage platforms to share data Your CISO asks you for a list of aggregated users, applications, and instance IDs to increase security posture Which Netskope tool would be used to obtain this data?

- A. Cloud Confidence Index (CCI)
- B. Advanced Analytics
- C. Applications in Skope IT
- D. Behavior Analytics

正解: B

解説:

To obtain a list of aggregated users, applications, and instance IDs, especially when dealing with non- sanctioned Cloud Storage platforms, the Advanced Analytics (A) tool within Netskope would be used.

Advanced Analytics provides in-depth visibility into cloud app usage and activities. It allows security teams to create detailed reports and dashboards that can help identify risks and ensure compliance with company policies by analyzing user behavior, application access, and data movement across the organization1.

The capabilities of the Advanced Analytics tool are outlined in Netskope's documentation and resources, which describe its use for gaining insights into cloud application usage and security posture

質問 # 60

A recent report states that users are using non-sanctioned Cloud Storage platforms to share data Your CISO asks you for a list of aggregated users, applications, and instance IDs to increase security posture Which Netskope tool would be used to obtain this data?

- A. Cloud Confidence Index (CCI)
- B. Advanced Analytics
- C. Applications in Skope IT
- D. Behavior Analytics

正解: B

解説:

To obtain a list of aggregated users, applications, and instance IDs, especially when dealing with non- sanctioned Cloud Storage platforms, the Advanced Analytics (A) tool within Netskope would be used.

Advanced Analytics provides in-depth visibility into cloud app usage and activities. It allows security teams to create detailed reports and dashboards that can help identify risks and ensure compliance with company policies by analyzing user behavior, application access, and data movement across the organization1.

The capabilities of the Advanced Analytics tool are outlined in Netskope's documentation and resources, which describe its use for gaining insights into cloud application usage and security posture

質問 # 61

You created a Real-time Protection policy that blocks all activities to non-corporate S3 buckets, but determine that the policy is too restrictive. Specifically, users are complaining that normal websites have stopped rendering properly. How would you solve this problem?

- A. Create a Real-time Protection policy to allow the Browse activity to the Amazon S3 application.
- B. Create a Real-time Protection policy to allow the Download activity to the Amazon S3 application
- C. Create a Real-time Protection policy to allow the Download activity to the Cloud Storage category
- **D. Create a Real-time Protection policy to allow the Browse activity to the Cloud Storage category**

正解: D

解説:

To solve the problem of normal websites not rendering properly due to a Real-time Protection policy that blocks all activities to non-corporate S3 buckets, the best solution is to create a Real-time Protection policy to allow the Browse activity to the Cloud Storage category. This approach will enable users to view content from various cloud storage services, including Amazon S3, without allowing full access to non-corporate S3 buckets. It's a more granular and less restrictive policy that allows necessary browsing activities while still maintaining control over the upload and download activities to non-corporate buckets1.

The Netskope Knowledge Portal provides information on how to configure Real-time Protection policies, including how to set up policies that allow certain activities while blocking others1. Additionally, the Netskope Community Forum offers insights into best practices for policy configuration to avoid overly restrictive rules that can impact normal web browsing
