## High efficient AZ-500 Guide Torrent Practice Materials: Microsoft Azure Security Technologies - ActualTestsQuiz

The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the AZ-500 certification which is crucial for you successfully, I highly recommend that you should choose the AZ-500 certification braindumps from our company so that you can get a good understanding of the exam that you are going to prepare for. We believe that if you decide to buy the AZ-500 Exam Materials from our company, you will pass your exam and get the certification in a more relaxed way than other people.

To pass the Microsoft AZ-500 Exam, candidates need to have hands-on experience with Azure security technologies and be familiar with security concepts and best practices. Candidates must also have a deep understanding of Azure infrastructure, networking, and storage services, as well as knowledge of cloud computing concepts and architectures.

## Microsoft Azure Security Technologies Sample Questions (Q312-Q317):

### NEW QUESTION # 312

You have an Azure subscription named Sub1 that contains the resources shown in the following table.

□ You need to ensure that you can provide VM1 with secure access to a database on SQL1 by using a contained database user. What should you do?

- A. Create a secret in KVI.

- B. Configure a service endpoint on SQL1.
- C. Create a key in KV1.
- D. Enable a managed service identity on VM1.

**Answer: A**

### NEW QUESTION # 313

You have the Azure virtual machines shown in the following table.

For which virtual machine can you enable Update Management?

- A. VM1, VM2, and VM4 only
- B. VM1, VM2, and VM3 only
- C. VM2, VM3, and VM4 only
- D. VM1, VM2, VM3, and VM4
- E. VM2 and VM3 only

**Answer: A**

Explanation:

### NEW QUESTION # 314

You need to configure SQLDB1 to meet the data and application requirements.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation

Step 1: Connect to SQLDB1 by using Microsoft SQL Server Management Studio (SSMS) Step 2: In SQLDB1, create contained database users.

Create a contained user in the database that represents the VM's system-assigned identity.

Step 3: In Azure AD, create a system-assigned managed identity.

A system-assigned identity for a Windows virtual machine (VM) can be used to access an Azure SQL server.

Managed Service Identities are automatically managed by Azure and enable you to authenticate to services that support Azure AD authentication, without needing to insert credentials into your code.

### NEW QUESTION # 315

You have an Azure subscription that contains the Azure Active Directory (Azure AD) resources shown in the following table.

You create the groups shown in the following table.

Which resources can you add to Group5 and Group6? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 316

You have an Azure subscription named Sub1 that contains an Azure Log Analytics workspace named LAW1. You have 100 on-premises servers that run Windows Server 2012 R2 and Windows Server 2016. The servers connect to LAW1. LAW1 is configured to collect security-related performance counters from the connected servers. You need to configure alerts based on the data collected by LAW1. The solution must meet the following requirements:

- Alert rules must support dimensions.
- The time it takes to generate an alert must be minimized.
- Alert notifications must be generated only once when the alert is generated and once when the alert is resolved.

Which signal type should you use when you create the alert rules?

- A. Metric
- B. Activity Log
- C. Log
- D. Log (Saved Query)

**Answer: A**

Explanation:

Metric alerts in Azure Monitor provide a way to get notified when one of your metrics cross a threshold. Metric alerts work on a range of multi-dimensional platform metrics, custom metrics, Application Insights standard and custom metrics.

Note: Signals are emitted by the target resource and can be of several types. Metric, Activity log, Application Insights, and Log References:
