Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q294-Q299):

NEW QUESTION # 294

You have an on-premises SAP landscape and a hybrid Microsoft Entra tenant. You plan to enable Microsoft Entra authentication for SAP NetWeaver. What should you configure first in Microsoft Entra ID?

- A. a user flow
- B. a service principal

- C. a conditional access policy
- D. a Microsoft Entra Application Proxy

Answer: D

NEW QUESTION # 295

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

YES

YES

NO

NEW QUESTION # 296

You have an Azure Active Directory (Azure AD) tenant and an SAP Cloud Platform tenant.

You need to ensure that users sign in automatically by using their Azure AD accounts when they connect to SAP Cloud Platform.

Which four actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 297

You plan to migrate an SAP environment to Azure.

You need to create a design to facilitate end-user access to SAP applications over the Internet, while restricting user access to the virtual machines of the SAP application servers.

What should you include in the design?

- A. Deploy an internal Azure Standard Load Balancer for incoming connections
- B. Configure point-to-site VPN connections for each user
- C. Use an SAP Web Dispatcher to route all incoming connections
- D. Configure a public IP address for each SAP application server

Answer: C

Explanation:

A public internet user can reach the SAP Web-Dispatcher over port 443

The SAP Web-Dispatcher can reach the SAP Application server over port 443 The App Subnet accepts traffic on port 443 from 10.0.0.0/24 The SAP Application server sends traffic on port 30015 to the SAP DB server The DB subnet accepts traffic on port 30015 from 10.0.1.0/24.

Public Internet Access is blocked on both App Subnet and DB Subnet.
