You can also use the VMware Cloud Operations 8.x Professional V2 PDF format using smartphones, tablets, and laptops. Since the PDF format of real dumps questions is portable, you can access it from any place in free time. The VMware Cloud Operations 8.x Professional V2 web-based practice exam can be easily taken from every browser and operating system without installing additional software. The desktop VMware Cloud Operations 8.x Professional V2 practice exam software comes with all specs of the VMware 2V0-32.24 web-based version but it works offline only on Windows computer or laptop.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q15-Q20):

NEW QUESTION # 15
An administrator would like to limit the access in vRealize Log Insight for application developers to a specific group of hosts where their application is running.
What should the administrator to configure satisfy this requirement?

- A. Create a DRS Host group and assign the users as part of the role assignment in vRealize Log Insight.
- B. Define a data set with required ESXi hosts and associate it with the vSphere content pack.
- C. Define a data set with required ESXi hosts and associate it with a role.
- D. Make sure that all ESXi hosts are added to the same vSphere HA/DRS cluster.

Answer: C

Explanation:
To limit access in vRealize Log Insight for application developers to a specific group of hosts, the administrator can define a datasetthat includes only the required ESXi hosts where the application is running, and then associate this data set with a specific role. By doing this, the administrator ensures that the developers only have access to the logs from those specific hosts.
This method leverages the role-based access control (RBAC) in vRealize Log Insight, allowing granular control over the logs that users can access based on their assigned role and the data sets to which they are associated.

NEW QUESTION # 16
Which three filters can be used when adding agents to an agent group in vRealize Log Insight? (Choose three.)

- A. IP address
- B. Logging protocol
- C. Hostname
- D. Agent version
- E. Agent type
- F. Agent status

Answer: C,D,E

Explanation:
Agent type: This filter allows the administrator to group agents by their type, such as virtual, physical, or containerized agents.
Agent version: Filters agents by their version, which can be helpful in ensuring compatibility and updating agents.
Hostname: This filter groups agents based on the hostname of the machines they are installed on, providing more targeted management.

NEW QUESTION # 17
When setting up the vRealize Log Insight integration within vRealize Operations what do administrators configure within vRealize Operations?

- A. The vRealize Log Insight collector group instance
- B. The vRealize Log Insight content pack
- C. The vRealize Log Insight troubleshootingdashboard
- D. The vRealize Log Insight management pack

Answer: D

Explanation:
When setting up vRealize Log Insight integration within vRealize Operations, administrators configure the vRealize Log Insight management pack in vRealize Operations. This management pack allows vRealize Operations to integrate with vRealize Log Insight, enabling the collection and analysis of log data from vRealize Log Insight within the vRealize Operations platform. It provides enhanced visibility and monitoring for logs, allowing users to correlate performance data with log data.

NEW QUESTION # 18
Which three deployment architectures are valid for vRealize Log Insight listed below? (Choose three.)

- A. Three node deployment with an external load balancer
- B. Single node deployment with no load balancer
- C. Ten node deployment with the integrated load balancer
- D. Single node deployment with an external load balancer
- E. Single node deployment with the integrated load balancer
- F. Two node deployment with the integrated load balancer

Answer: A,B,F

Explanation:
Two node deployment with the integrated load balancer: vRealize Log Insight supports a two-node deployment with an integrated

load balancer, providing redundancy and load distribution.
Three node deployment with an external load balancer: A three-node deployment with an external load balancer is a valid and scalable option, ensuring high availability and load balancing.
Single node deployment with no load balancer: A single node can be deployed without a load balancer for smaller environments or testing purposes.

NEW QUESTION # 19
Which three types of Virtual Machine (VM) action can be scheduled in a vRealize Operations Automation Central job? (Choose three.)

- A. Delete unused snapshots for VMs
- B. Move VMs
- C. Power On VMs
- D. Reboot VMs
- E. Delete powered oft VMs
- F. Downsize oversized VMs

Answer: C,D,F

Explanation:
Power On VMs: You can schedule the action to power on specific VMs at a specified time.
Reboot VMs: Scheduling a reboot for VMs can be done to automate maintenance or restart processes.
Downsize oversized VMs: This action allows you to resize VMs based on performance data, ensuring resources are allocated optimally.

NEW QUESTION # 20
