300-710 Latest Test Discount | 300-710 Reliable Test Cost

2026 Latest VerifiedDumps 300-710 PDF Dumps and 300-710 Exam Engine Free Share: https://drive.google.com/open?id=1IKVh-pkAfWU-I6QNy-M7ADocMGjUc0aS

Contrary to the low price of VerifiedDumps exam dumps, the quality of its dumps is the best. What's more, VerifiedDumps provides you with the most excellent service. As long as you pay for the dumps you want to get, you will get it immediately. VerifiedDumps has the 300-710 exam materials that you most want to get and that best fit you. After you buy the dumps, you can get a year free updates. As long as you want to update the 300-710 Dumps you have, you can get the latest updates within a year. VerifiedDumps does its best to provide you with the maximum convenience.

Our 300-710 test questions are available in three versions, including PDF versions, PC versions, and APP online versions. Each version has its own advantages and features, 300-710 test material users can choose according to their own preferences. The most popular version is the PDF version of 300-710 exam prep. The PDF version of 300-710 Test Questions can be printed out to facilitate your learning anytime, anywhere, as well as your own priorities. The PC version of 300-710 exam prep is for Windows

users. If you use the APP online version, just download the application. Program, you can enjoy our 300-710 test material service.

Cisco 300-710 PDF Dumps file

In some companies, the certificate of the exam is directly linked with the wages and the position in your company. Our 300-710 exam cram will offer you the short way to get the certificate. With the most eminent professionals in the field to compile and examine the 300-710 Test Dumps, they have a high quality. Purchasing the 300-710 exam cram of us guarantees the pass rate, and if you can't pass, money back is guaranteed.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q197-Q202):

NEW QUESTION # 197
What is the difference between inline and inline tap on Cisco Firepower?

- A. Inline mode cannot do SSL decryption.
- B. Inline mode can drop malicious traffic.
- C. Inline tap mode does full packet capture.
- D. Inline tap mode can send a copy of the traffic to another device.

Answer: B

Explanation:
Section: Deployment

NEW QUESTION # 198
An engineer must build redundancy into the network and traffic must continuously flow if a redundant switch in front of the firewall goes down. What must be configured to accomplish this task?

- A. redundant interfaces on the firewall cluster mode and switches
- B. vPC on the switches to the interface mode on the firewall cluster
- C. redundant interfaces on the firewall noncluster mode and switches
- D. vPC on the switches to the span EtherChannel on the firewall cluster

Answer: D

NEW QUESTION # 199
An engineer has been tasked with using Cisco FMC to determine if files being sent through the network are malware. Which two configuration tasks must be performed to achieve this file lookup? (Choose two).

- A. The Cisco FMC needs to connect to the Cisco ThreatGrid service directly for sandboxing.
- B. The Cisco FMC needs to connect with the FireAMP Cloud.
- C. The Cisco FMC needs to include a SSL decryption policy.
- D. The Cisco FMC needs to include a file inspection policy for malware lookup.
- E. The Cisco FMC needs to connect to the Cisco AMP for Endpoints service.

Answer: D,E

NEW QUESTION # 200
An engineer must investigate a connectivity issue from an endpoint behind a Cisco FTD device and a public DNS server. The endpoint cannot perform name resolution queries. Which action must the engineer perform to troubleshoot the issue by simulating real DNS traffic on the Cisco FTD while verifying the Snarl verdict?

- A. Perform a Snort engine capture using tcpdump from the FTD CLI.

- B. Use the Capture w/Trace wizard in Cisco FMC.
- C. Create a Custom Workflow in Cisco FMC.
- D. Run me system support firewall-engine-debug command from me FTD CLI.

Answer: B

Explanation:
The Capture w/Trace wizard in Cisco FMC allows you to capture packets on an FTD device and trace their path through the Snort engine. This can help you troubleshoot connectivity issues from an endpoint behind an FTD device and a public DNS server, as well as verify the Snort verdict for the DNS traffic. The Capture w
/Trace wizard lets you specify the source and destination IP addresses, ports, and protocols for the packets you want to capture and trace, as well as the FTD device and interface where you want to perform the capture.
You can also apply filters to limit the capture size and duration. After you start the capture, you can ping the DNS server from the endpoint and then view the captured packets and their Snort verdicts in the FMC web interface2.
To use the Capture w/Trace wizard in Cisco FMC, you need to follow these steps2:
* In the FMC web interface, navigate to Troubleshooting > Capture/Trace.
* Click New Capture.
* Choose an FTD device from the Device drop-down list.
* Choose an interface from the Interface drop-down list.
* Enter the source and destination IP addresses, ports, and protocols for the packets you want to capture and trace. For example, if you want to capture DNS queries from an endpoint with IP address
10.1.1.100 to a DNS server with IP address 8.8.8.8, you can enter these values:
* Source IP: 10.1.1.100
* Source Port: any
* Destination IP: 8.8.8.8
* Destination Port: 53
* Protocol: UDP
* Optionally, apply filters to limit the capture size and duration. For example, you can set the maximum number of packets to capture, the maximum capture file size, or the maximum capture time.
* Click Start.
* Ping the DNS server from the endpoint and wait for some packets to be captured.
* Click Stop to stop the capture.
* Click View Capture to see the captured packets and their Snort verdicts.
The other options are incorrect because:
* Performing a Snort engine capture using tcpdump from the FTD CLI will not allow you to trace the path of the packets through the Snort engine or verify their Snort verdicts. Tcpdump is a command-line tool that can capture packets on an FTD device, but it does not provide any information about how Snort processes those packets or what actions Snort takes on them2.
* Creating a Custom Workflow in Cisco FMC will not help you troubleshoot a connectivity issue from an endpoint behind an FTD device and a public DNS server. A Custom Workflow is a user-defined set of pages that display event data in different formats, such as tables, charts, maps, and so on. A Custom Workflow does not allow you to capture or trace packets on an FTD device3.
* Running the system support firewall-engine-debug command from the FTD CLI will not allow you to simulate real DNS traffic on the FTD device or verify the Snort verdict for that traffic. The firewall-engine-debug command is a diagnostic tool that can generate synthetic packets and send them through the Snort engine on an FTD device. The synthetic packets are not real network traffic and do not affect any connections or policies on the FTD device4.

NEW QUESTION # 201
A VPN user is unable to conned lo web resources behind the Cisco FTD device terminating the connection.
While troubleshooting, the network administrator determines that the DNS responses are not getting through the Cisco FTD What must be done to address this issue while still utilizing Snort IPS rules?

- A. Disable the intrusion rule threshes to optimize the Snort processing.
- B. Uncheck the "Drop when Inline" box in the intrusion policy to allow the traffic.
- C. Decrypt the packet after the VPN flow so the DNS queries are not inspected
- D. Modify the Snort rules to allow legitimate DNS traffic to the VPN users.

Answer: D

NEW QUESTION # 202

......

At the information age, knowledge is wealth as well as productivity. All excellent people will become outstanding one day as long as one masters skill. In order to train qualified personnel, our company has launched the 300-710 Study Materials for job seekers. We are professional to help tens of thousands of the candidates get their 300-710 certification with our high quality of 300-710 exam questions and live a better life.

300-710 Reliable Test Cost: https://www.verifieddumps.com/300-710-valid-exam-braindumps.html

You don't have to waste your time and energy looking for the authentic 300-710 exam braindumps as we have it all at Examout, Our passing rate for 300-710 is high up to 99.27% based on past data, Moral company, Cisco 300-710 Latest Test Discount Many users report to us that they are very fond of writing their own notes while they are learning, Cisco 300-710 Latest Test Discount According to our investigation, 99% people pass the exam for the first time.

Doing so will benefit you greatly for years to come, How AppleScript Works Across a Network, You don't have to waste your time and energy looking for the authentic 300-710 Exam Braindumps as we have it all at Examout.

Pass Guaranteed Authoritative Cisco - 300-710 Latest Test Discount

Our passing rate for 300-710 is high up to 99.27% based on past data, Moral company, Many users report to us that they are very fond of writing their own notes while they are learning.

According to our investigation, 99% people pass the exam for the first time.
