Practicing the FCSS_NST_SE-7.4 exam questions, you actually learn to answer the real FCSS_NST_SE-7.4 exam questions. Additionally, you also study time management to solve paper in the given time. Above all, you overcome the fear of the real exam and doing FCSS_NST_SE-7.4 Exam Dumps, you gain enough confidence and examination ability that is necessary to pass the tough FCSS_NST_SE-7.4 certifications.

Fortinet FCSS - Network Security 7.4 Support Engineer Sample Questions (Q101-Q106):

NEW QUESTION # 101

Refer to the exhibit, which shows the omitted output of a session table entry.

Which two statements are true? (Choose two.)

- A. The traffic has been tagged for VLAN 0000.
- B. NP7 is handling offloading of this session.
- C. The traffic matches Policy ID 1.
- D. The session has been offloaded.

Answer: B,D

NEW QUESTION # 102

Refer to the exhibit, which contains the output of a debug command.

If the default settings are in place, what can you conclude about the conserve mode shown in the exhibit?

- A. FortiGate is currently allowing new sessions that require flow-based content inspection and blocking sessions that require proxy-based content inspection.
- B. FortiGate is currently allowing new sessions that require flow-based or proxy-based content inspection and is performing inspection on those sessions.
- C. FortiGate is currently allowing new sessions that require flow-based or proxy-based content inspection but is not performing inspection on those sessions.
- D. FortiGate is currently blocking all new sessions regardless of the content inspection requirements or configuration settings because of high memory use.

Answer: A

Explanation:

When memory usage exceeds the red threshold but is still below the extreme threshold, FortiGate's conserve mode will admit new sessions that use flow based inspection but will reject any that require proxy based inspection.

NEW QUESTION # 103

Refer to the exhibit, which shows a partial output of the fssod daemon real-time debug command.

What two conclusions can you draw from the output? (Choose two.)

- A. The logon event can be seen on the collector agent installed on Windows.
- **B. FSSO is using agentless polling mode to detect logon events.**
- C. FSSO is using DC agent mode to detect logon events.
- **D. The workstation with IP 10.124.2.90 will be polled frequently using TCP port 445 to see if the user is still logged on.**

Answer: B,D

NEW QUESTION # 104

Which two configuration commands change the default behavior for proxy-based content- inspected traffic while FortiGate is in conserve mode? (Choose two.)

- **A. set av-failopen one-shot**
- **B. set av-failopen off**
- C. set fail-open enable
- D. set ips fail-open disable

Answer: A,B

NEW QUESTION # 105

Refer to the exhibit, which shows the port1 interface configuration on FortiGate and partial session information for ICMP traffic.
What happens to the session information if a routing change occurs that affects this session?

- A. The session will be flagged as dirty but no route lookups will be performed.
- B. Only the interface and gateway information for dev=7 will be removed.
- **C. The session information will not change unless the current route has been removed from the routing table.**
- D. Sessions involving port7 or port19 will not have their routing information flushed.

Answer: C

NEW QUESTION # 106
