# Valid 350-501 Learning Engine bring you Fantastic Knowledge 350-501 Points for Cisco Implementing and Operating Cisco Service Provider Network Core Technologies

Select our excellent 350-501 training questions, you will not regret it. According to the above introduction, you must have your own judgment. Quickly purchase our 350-501 study materials we will certainly help you improve your competitiveness with the help of our 350-501 simulating exam! Just image that you will have a lot of the opportunities to be employed by bigger and better company, and you will get a better position and a higher income. What are you waiting for? Just buy our exam braindumps!

Cisco 350-501 exam is a challenging test that requires a solid understanding of Cisco service provider network technologies. To prepare for the exam, candidates should have a strong foundation in networking concepts and experience working with service provider networks. They should also be familiar with Cisco's products and technologies, such as Cisco IOS XR, Cisco ASR 9000, and Cisco Nexus. With a strong understanding of these technologies, candidates can successfully pass the Cisco 350-501 exam and earn their CCNP Service Provider certification.

Cisco 350-501 Exam consists of 90-110 questions that must be completed within 120 minutes. 350-501 exam is available in English and Japanese and can be taken at any Pearson VUE testing center around the world. To prepare for the exam, Cisco offers several training courses, including Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) and Cisco Service Provider Core Network Services (SPCOR).

Knowledge 350-501 Points - Free 350-501 Updates

Free Cisco 350-501 Dumps to prepare for the Implementing and Operating Cisco Service Provider Network Core Technologies 350-501 exam is a great way to gauge your progress in preparation. You can also check your progress with the help of evaluation reports. These reports will help you know where you stand in your preparation and boost your confidence.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q470-Q475):

NEW QUESTION # 470
Refer to the exhibit. A service provider engineer Is configuring the connection between CE1 and CE2. AS
200 of the service provider and AS 100 of enterprise ABC should connect using BGP. The engineer already completed the configuration of VRF RT 100:10 of enterprise ABC. Which configuration must the engineer apply on PE1 to meet the requirement?

- A. Option B
- B. Option C
- C. Option D
- D. Option A

Answer: B

Explanation:
The correct configuration for PE1 to connect AS 200 of the service provider with AS 100 of enterprise ABC using BGP, considering the VRF RT 100:10 is already configured, would involve setting up BGP with the correct neighbor and route distinguisher settings. Option C is likely the correct choice as it specifies the BGP neighbor to be within the enterprise ABC's AS 100 and includes the address family configuration necessary for VRF-aware BGP sessions. References := The Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) course materials provide detailed instructions on configuring BGP in a service provider environment, including the use of VRFs and route distinguishers. For more information, please refer to the official Cisco documentation and course materials related to SPCOR1.

NEW QUESTION # 471
Refer to the exhibit. Tier 2 ISP A on AS 653 is connected to two Tier 1 ISPs on AS 321 and AS 51 respectively. The network architect at ISP A is planning traffic flow inside the network to provide predictable network services. Cisco Express Forwarding is disabled on the edge router. How should the architect implement BGP to direct all traffic via the Tier 1 ISP with next-hop 7.4.5.2?

- A. Implement the BGP routing protocol and run the bgp deterministic-med command.
- B. Implement BGP route-reflector functionality with the bgp always-compare-med configuration.
- C. Implement MP-BGP with a 4-byte AS number with the bgp best path compare-routerid command.
- D. Implement the BGP routing protocol and the maximum-paths 2 configuration.

Answer: A

NEW QUESTION # 472
Refer to the exhibit:
Which two statements about the ISIS topology are true? (Choose two.)

- A. R1 and R4 are Level 2 neighbors
- B. All four routers are operating as Level 1 routers only.
- C. R1 and R2 are Level 2 neighbors.
- D. All four routers are operating as Level 1-2 routers.
- E. All four routers are operating as Level 2 routers only.

Answer: C,D

NEW QUESTION # 473
Drag and drop the functions from the left onto the correct Path Computation Element Protocol roles on the right

Answer:

Explanation:

NEW QUESTION # 474
A network engineer is adding 10Gbps link to an existing 2X1Gbps LACP-based LAG to augment its capacity. Network standards require a bundle interface to be take out of service if one of its member links does down, and the new link must be added with minimal impact to the production network. Drag and drop the tasks that the engineer must perform from the left into the sequence on the right. Not all options are used.

Answer:

Explanation:

NEW QUESTION # 475
......

Do you want to pass the 350-501 exam by the first attempt? Our 350-501 exam questons can be our best assistant on your way to success. And the pass rate of our 350-501 study guide is high as 98% to 100%, which also prove our excellent quality. If you study with our 350-501 praparation guide, they will strengthen your learning skilles, add to your knowledge and will enable you to revise the entire syllabus more than once. And you will pass for sure with our 350-501 learning quiz.
