Everything you do will help you successfully pass the exam and get the card.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which of the following is a characteristic of cloud-based applications in the context of cybersecurity?

- A. They are not widely used and are considered a less secure option.
- B. They require physical installation and maintenance, limiting their accessibility.
- C. They provide enhanced flexibility and scalability for organizations.
- D. They are typically more susceptible to cyber attacks compared to traditional on-premises applications.

Answer: C

Explanation:

Cloud-based applications offer numerous benefits, one of which is enhanced flexibility and scalability. These applications allow organizations to easily adjust their usage and storage needs without the need for physical hardware upgrades. This flexibility often contributes to improved productivity and cost-effectiveness. However, it's important to note that the cybersecurity of cloud-based applications depends on the implementation and security measures taken by the provider and user.

NEW QUESTION # 37

What is malware?

- A. A network of compromised computers used to carry out coordinated attacks.
- B. A technique used by attackers to obtain sensitive information through deception.
- C. A software program that is designed to damage, disrupt, or gain unauthorized access to a computer system.
- D. A form of cyber attack that attempts to gain unauthorized access to a network.

Answer: C

Explanation:

Malware is a term used to describe any type of malicious software that is specifically designed to damage, disrupt, or gain unauthorized access to a computer system. This can include viruses, worms, trojan horses, spyware, and adware.

NEW QUESTION # 38

Which of the following is a characteristic of an IPv6 address?

- A. Consists of 32 bits
- B. Uses colons as separators
- C. Supports a maximum of 4.3 billion unique addresses
- D. Can be represented by both decimal and binary notation

Answer: B

Explanation:

An IPv6 address consists of 128 bits, which is four times the size of an IPv4 address. Unlike IPv4 addresses that use periods (dots) as separators, IPv6 addresses use colons as separators. For example, an IPv6 address could be written as 2001:0db8:85a3:0000:0000:8a2e:0370:7334.

NEW QUESTION # 39

What is the purpose of a VPN?

- A. To encrypt network traffic
- B. To block unauthorized access
- C. To detect network vulnerabilities
- D. To authenticate users

Answer: A

Explanation:

A VPN (Virtual Private Network) is used to create a secure connection between a user's device and a private network, such as a corporate network or the internet. It encrypts the data that is transmitted between the user and the network, ensuring that even if intercepted, the data is unreadable by unauthorized individuals.

NEW QUESTION # 40

Which of the following describes the purpose of a VPN (Virtual Private Network)?

- A. To segment a network into multiple smaller networks
- B. To provide secure remote access to a private network over the internet
- C. To control and filter network traffic based on predefined policies
- D. To improve network performance and reduce latency

Answer: B

Explanation:

A VPN (Virtual Private Network) is a technology that enables secure and encrypted communication over a public network, such as the internet. It allows users to establish a secure connection to a private network from remote locations. By encrypting the communication, a VPN ensures confidentiality and integrity of the data transmitted between the remote user and the private network, making it a suitable solution for secure remote access.

NEW QUESTION # 41

.....

The product is made in three different formats to help customers with different preparation styles meet their needs.
