AB-900 Reliable Test Testking & New AB-900 Test Materials

Through the Microsoft Certification AB-900 Exam method has a lot of kinds, spend a lot of time and energy to review the Microsoft certification AB-900 exam related professional knowledge is a kind of method, through a small amount of time and money PracticeVCE choose to use the pertinence training and exercises is also a kind of method.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q41-Q46):

NEW QUESTION # 41

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

* Microsoft Defender for Office 365 provides protection from phishing and malware attacks. Answer: Yes

* Microsoft Defender for Identity monitors identities in Active Directory domains. Answer: Yes

* Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications. Answer: No The correct selections are Yes, Yes, No . Microsoft documents that Microsoft Defender for Office 365 protects email and collaboration workloads from threats such as phishing and malware , including zero-day malware and business email compromise scenarios. That makes statement 1 Yes .

Statement 2 is also Yes because Microsoft states that Microsoft Defender for Identity monitors identity signals from on-premises Active Directory and related identity infrastructure to detect suspicious activity and identity-based attacks. Microsoft further describes monitoring information generated from your organization's Active Directory, network, and event activities.

Statement 3 is No because Microsoft Defender Vulnerability Management is focused on discovering and prioritizing vulnerabilities across devices and assets such as Windows, macOS, Linux, mobile platforms, and network devices. Microsoft's SaaS application protection offering is Microsoft Defender for Cloud Apps , not Defender Vulnerability Management.

NEW QUESTION # 42

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

The correct selections are No, Yes, Yes . Statement 1 is No because Microsoft states that if an organization has a Microsoft 365 Copilot license and at least one user is assigned to a Copilot license, SharePoint administrators automatically get access to the SharePoint Advanced Management features required for Copilot deployment. Microsoft does not say that all users in the organization must have Microsoft 365 Copilot licenses for administrators to use SharePoint Advanced Management.

Statement 2 is Yes because Microsoft documents SharePoint Advanced Management features such as Restricted Content Discovery and Restricted SharePoint Search , which can limit whether content from specific SharePoint sites appears in Microsoft 365 Copilot and organization-wide search experiences.

Statement 3 is Yes because Microsoft explicitly states that organizations can purchase a standalone SharePoint Advanced Management license for each user in the organization. That means it is available even for organizations that do not have Microsoft 365 Copilot.

NEW QUESTION # 43

Hotspot Question

A user named User5 navigates to <https://myapps.microsoft.com>. After entering their username and password, User5 receives the following message on their mobile device.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer:

Explanation:

NEW QUESTION # 44

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

□ The correct answer is Microsoft Defender XDR . Microsoft Learn defines Microsoft Defender XDR as a unified pre- and post-breach enterprise defense suite that natively coordinates detection, prevention, investigation, and response across endpoints, identities, email, and applications to provide integrated protection against sophisticated attacks. That wording matches the sentence in the question almost exactly, which makes this the clearly correct choice.

The other options do not fit that definition. Microsoft Entra Conditional Access is Microsoft's Zero Trust policy engine used to evaluate signals and enforce access policies, not a cross-domain threat detection and response suite. Microsoft Entra ID Protection focuses on detecting and responding to identity risks such as risky sign-ins and risky users. Microsoft Purview is Microsoft's portfolio for data governance, data security, and compliance. None of those products is described by Microsoft as coordinating detection, prevention, investigation, and response across endpoints, identities, email, and applications in the same integrated XDR manner. Therefore, the only answer that correctly completes the sentence is Microsoft Defender XDR .

NEW QUESTION # 45

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 46

.....
