

2V0-17.25 Pass Guaranteed - 100% Pass Quiz VMware - 2V0-17.25 - First-grade VMware Cloud Foundation 9.0 Administrator Actual Dump

BTW, DOWNLOAD part of PassExamDumps 2V0-17.25 dumps from Cloud Storage: <https://drive.google.com/open?id=1x64TJLJhSWxgD3sEcUJOflQqvIXpxEh3>

Our 2V0-17.25 study materials will provide you with 100% assurance of passing the professional qualification exam. We are very confident in the quality of 2V0-17.25 guide torrent. Our pass rate of 2V0-17.25 training braindump is high as 98% to 100%. You can totally rely on our 2V0-17.25 Practice Questions. We have free demo of our 2V0-17.25 learning prep for you to check the excellent quality. As long as you free download the 2V0-17.25 exam questions, you will satisfied with them and pass the 2V0-17.25 exam with ease.

VMware 2V0-17.25 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Monitoring, Troubleshooting, and Maintenance	25%	- Backup and restore procedures - Log collection and analysis - Health monitoring and alert configuration - Troubleshooting deployment and operational issues - Performance optimization
Topic 2: VCF Deployment and Configuration	25%	- Networking and storage configuration - Bring-up and initial configuration - Workload domain design and deployment - Integration with external systems - Planning and prerequisites for deployment
Topic 3: VMware Cloud Foundation Architecture and Components	20%	- Private cloud principles and use cases - SDDC Manager role and functionality - VCF core components and architecture - Integration with vSphere, vSAN, NSX
Topic 4: Resource Management and Operations	30%	- Identity and access management - Lifecycle management: patch, update, upgrade - Resource allocation and optimization - Automation and API usage - Multi-tenancy and workload management - License and certificate management

2V0-17.25 Actual Dump - 2V0-17.25 Exam Outline

The VMware 2V0-17.25 PDF questions file of PassExamDumps has real VMware 2V0-17.25 exam questions with accurate answers. You can download VMware PDF Questions file and revise VMware Cloud Foundation 9.0 Administrator 2V0-17.25 exam questions from any place at any time. We also offer desktop 2V0-17.25 practice exam software which works after installation on Windows computers. The 2V0-17.25 web-based practice test on the other hand needs no software installation or additional plugins. Chrome, Opera, Microsoft Edge, Internet Explorer, Firefox, and Safari support the web-based 2V0-17.25 Practice Exam. You can access the VMware 2V0-17.25 web-based practice test via Mac, Linux, iOS, Android, and Windows. PassExamDumps VMware Cloud Foundation 9.0 Administrator 2V0-17.25 practice test (desktop & web-based) allows you to design your mock test sessions. These VMware 2V0-17.25 exam practice tests identify your mistakes and generate your result report on the spot.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q65-Q70):

NEW QUESTION # 65

An administrator must replace a component's certificate in VCF with an external CA-signed certificate. What format must be used when creating the certificate?

- A. DER
- B. PFX
- **C. PEM**
- D. P7B

Answer: C

Explanation:

VCF supports only certificates in PEM format when replacing system component certificates with those signed by an external Certificate Authority.

PEM is the standard Base64 format with .crt and .key files. PFX (PKCS#12) is used for Windows stores but not supported in VCF automation. P7B is for certificate chains, while DER is binary encoding. Thus, the required format for certificates in VCF is PEM.

NEW QUESTION # 66

What is the primary benefit of using HCX Replication Assisted vMotion (RAV) for VM migration?

- A. It requires no configuration changes to the VM(s) within the destination environment.
- **B. It ensures zero downtime to the VM(s).**
- C. It performs a test migration to ensure compatibility.
- D. It provides the fastest migration method by powering off the VM(s) before initiating the migration.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the VMware HCX User Guide and the VMware Cloud Foundation 5.2 Documentation, HCX Replication Assisted vMotion (RAV) is designed to provide a seamless migration of VMs across environments with no downtime to the workload.

Exact Extract from the VMware HCX User Guide:

"HCX Replication Assisted vMotion (RAV) provides zero-downtime migration for virtual machines, combining the benefits of vMotion with replication technologies. This allows VMs to continue running without disruption during the migration process, ensuring uninterrupted service for business-critical workloads." (VMware HCX User Guide - VM Mobility Methods) Why Not the Other Options?

A: RAV does not eliminate all configuration changes; network and other settings may still need updates depending on environments.

B: RAV does not perform a test migration; test migration is a feature of other migration methods.

D: RAV is not a cold migration method; it avoids powering off the VMs and maintains their availability throughout.

Summary:

The primary benefit of using HCX Replication Assisted vMotion (RAV) for VM migration is that it ensures zero downtime to the VM(s) (C), as stated in the official VMware documentation.

NEW QUESTION # 67

What open source project does vSphere Supervisor use to automate the lifecycle management of VMware Kubernetes Service (VKS) clusters?

- A. Kubeadm
- B. Contour
- **C. Cluster API**
- D. Grafana

Answer: C

Explanation:

vSphere Supervisor leverages the Cluster API (CAPI) open-source project to manage the lifecycle of Kubernetes clusters. Cluster API provides declarative APIs to create, scale, upgrade, and manage Kubernetes clusters. The VMware documentation states:

"VMware Kubernetes Service uses Cluster API components to provision and manage Tanzu Kubernetes clusters on vSphere."

Incorrect options:

Kubeadm (A) is a Kubernetes bootstrap tool but not the lifecycle engine used by Supervisor.

Contour (B) is an ingress controller.

Grafana (C) is a visualization and monitoring tool.

Thus, the correct answer is Cluster API.

NEW QUESTION # 68

Which statement describes a Container Storage Interface (CSI) in vSphere Supervisor?

- A. It is a plug-in that is required for ephemeral storage.
- B. It is a plug-in that only works with vSphere object storage.
- C. It is a plug-in that is only used for clusters which require cloud native storage.
- **D. It is a plug-in that allows providers to expose storage as persistent storage.**

Answer: D

Explanation:

The VMware Cloud Foundation 9.0 and vSphere with Tanzu documentation describes the Container Storage Interface (CSI) as follows:

"The vSphere CSI driver allows vSphere storage to be exposed as persistent storage to containerized applications running on Kubernetes clusters. The driver implements the Kubernetes CSI specification and enables dynamic provisioning, attach/detach, and snapshot operations for persistent volumes." Key points from the documentation:

CSI is not limited to vSphere object storage (A). It works with vSAN, VMFS, NFS, and other vSphere-supported datastores.

Its purpose is to provide persistent storage (B), so containerized workloads have data that outlives pod lifecycles.

CSI is not restricted to "cloud native storage only" (C); it is the standard interface for Kubernetes persistent storage.

CSI is not used for ephemeral storage (D); ephemeral storage is provided by local container runtimes and does not require CSI.

Therefore, the correct description is that CSI is a plug-in that allows providers to expose storage as persistent storage to Kubernetes workloads running in vSphere Supervisor clusters.

Reference:

VMware Cloud Foundation 9.0 - vSphere with Tanzu Storage Documentation.

vSphere CSI Driver Guide (Persistent Volume provisioning, dynamic storage for Kubernetes workloads).

NEW QUESTION # 69

An organization uses VMware Cloud Foundation (VCF) Operations to monitor and troubleshoot issues within their VCF fleet.

As part of an incident review following a recent critical event, the administrator noted that some important event data about the issue was missing from VCF Operations.

What optional VCF solution should the administrator implement to provide additional data to help troubleshoot in the future?

- A. VCF Operations Diagnostics
- B. VCF Operations Management Pack for VCF
- **C. VCF Operations for logs**
- D. VCF Automation

Answer: C

Explanation:

VCF Operations for logs provides detailed log data from infrastructure and workloads, supplementing metrics and events already

collected by VCF Operations. Implementing it ensures richer, time-correlated log information is available to investigate and troubleshoot incidents where event or metric data alone is insufficient.

NEW QUESTION # 70

.....

The 2V0-17.25 exam requires a lot of preparation, hard work, and practice to be successful. To pass the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) test, you need to get updated VMware 2V0-17.25 dumps. These 2V0-17.25 questions are necessary to study for the test and pass it on the first try. Updated 2V0-17.25 Practice Questions are essential prepare successfully for the VMware Cloud Foundation 9.0 Administrator certification exam. But gaining access to updated 2V0-17.25 questions is challenging for the candidates.
