If you do not have extraordinary wisdom, do not want to spend too much time on learning, but want to reach the pinnacle of life through JN0-105 exam, then you must have JN0-105 question torrent.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q83-Q88):

NEW QUESTION # 83

Which two common routing policy actions affect the flow of policy evaluation? (Choose two.)

- A. next policy
- B. next term
- C. community
- D. next hop

Answer: A,B

Explanation:

In Junos OS routing policy evaluation, "next policy" (A) and "next term" (C) are common actions that affect the flow of policy evaluation. "Next policy" directs the evaluation to the next policy in the sequence, whereas "next term" moves the evaluation to the next term within the current policy, allowing for granular control over routing decisions.

NEW QUESTION # 84

You are creating a new policy to accept and redistribute routes into your IGP.

In this scenario, which match criteria would you use to identify the route prefixes to select?

- A. route-type
- B. neighbor
- C. route-filter
- D. instance

Answer: C

Explanation:

When creating a policy to accept and redistribute routes into your IGP, "route-filter" (D) is the match criteria used to identify specific route prefixes. Route filters enable you to specify which routes should be accepted, rejected, or modified based on their attributes, such as prefix length or value.

NEW QUESTION # 85

What is the primary system log file that is present in the default configuration of a Junos device?

- A. messages
- B. vrrp
- C. kmd
- D. jsrpd

Answer: A

Explanation:

In the default configuration of a Junos device, the primary system log file is "messages" (B). This log file contains a wide range of system messages, including operational status changes, system errors, and other critical information, making it a key resource for troubleshooting and monitoring the system's health.

NEW QUESTION # 86

After the factory default configuration is loaded, which configuration object must be created prior to the first commit?

- A. out-of-band connectivity
- B. root authentication
- C. host name
- D. loopback IP address

Answer: B

Explanation:

In Juniper Networks devices, when the factory default configuration is loaded, the first step before committing any configuration is to set up root authentication. This is crucial because it secures the device by ensuring that only authorized users have administrative access. Without setting up a root password, the device will not allow any commit operations, which is a safety measure to prevent unauthorized access. This requirement emphasizes the importance Juniper places on security right from the initial setup of the device.

NEW QUESTION # 87

Exhibit

```
term limit-icmp { from {
source-address {
172.25.11.0/24;
}
protocol icmp;
}
then {
count count-icmp; discard;
}
```

}

Referring to the exhibit, which two actions will occur when a packet matches the firewall filter? (Choose two.)

- A. An ICMP destination unreachable message will be returned.
- **B. A counter will be incremented.**
- C. The packet will be forwarded.
- **D. The packet will be discarded.**

Answer: B,D

Explanation:

Referring to the firewall filter configuration in the exhibit, when a packet matches the specified term limit-icmp, two actions are defined in the then statement: count count-icmp and discard. The count count-icmp action means that each time a packet matches this term, a counter named count-icmp will be incremented, providing a tally of how many packets have matched the term. The discard action means that the packet will be dropped and not forwarded through the device. This effectively prevents the packet from reaching its intended destination. There is no action specified that would cause an ICMP destination unreachable message to be returned, nor is there any action that would allow the packet to be forwarded.

NEW QUESTION # 88

.....

Our JN0-105 training materials are designed carefully. We have taken all your worries into consideration. We have hired the most professional experts to compile the content and design the displays according to the latest information and technologies. Also, we adopt the useful suggestions about our JN0-105 Practice Engine from our customers. Now, our JN0-105 study materials are famous in the market and very popular among the candidates all over the world.
