

CCAAK Free Practice & Online CCAAK Version

P.S. Free 2026 Confluent CCAAK dumps are available on Google Drive shared by VerifiedDumps: <https://drive.google.com/open?id=1eJA5OUDdyFnwX6Ojn-ilzycQNmcZhCaN>

This updated Confluent CCAAK exam study material of VerifiedDumps consists of these 3 formats: Confluent CCAAK PDF, desktop practice test software, and web-based practice exam. Each format of VerifiedDumps aids a specific preparation style and offers unique advantages, each of which is beneficial for strong Confluent Certified Administrator for Apache Kafka (CCAAK) exam preparation. The features of our three formats are listed below. You can choose any format as per your practice needs.

The modern Confluent world is changing its dynamics at a fast pace and has become so competitive. To stay updated and competitive in the market you have to learn new in-demand skills. With one Confluent CCAAK exam certificate you can do this task nicely. With the Confluent CCAAK Certification Exam successful candidates can validate their knowledge, increase marketability, enhance academic performance, improve reputation and increase earning power and other personal and professional benefits, etc.

Everybody knows that Confluent is an influential company with high-end products and best-quality service. It will be a long and tough way to pass CCAAK exam test, especially for people who have no time to prepare the CCAAK Questions and answers. So choosing right CCAAK dumps torrent is very necessary and important for people who want to pass test at first attempt.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.
Topic 2	<ul style="list-style-type: none">• Observability: This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.
Topic 3	<ul style="list-style-type: none">• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q38-Q43):

NEW QUESTION # 38

A company has an existing Kafka cluster running without SSL/TLS enabled. The customer wants to enable SSL on brokers to secure data in transit, but they would like to give applications connecting to this cluster some time to migrate to using SSL connection instead of putting a hard stop.

Which solution will meet the customer's requirements?

- A. Enable SSL on the current listener, and do not implement SSL on application side.
- B. Modify the advertised listeners setting on brokers to use SSL.
- C. Enable SSL on the current Listener, and do not enable mTLS.
- **D. Create a new listener with SSL enabled.**

Answer: D

Explanation:

Kafka supports multiple listeners, allowing you to run PLAINTEXT and SSL simultaneously. By creating a new SSL-enabled listener (e.g., on a different port), existing applications can continue using PLAINTEXT while gradually migrating to the SSL listener. This approach avoids downtime and gives clients time to adapt without enforcing a hard cutover.

NEW QUESTION # 39

Where are Apache Kafka Access Control Lists stored?

- **A. ZooKeeper**
- B. Schema Registry
- C. Connect
- D. Broker

Answer: A

Explanation:

In Apache Kafka (open-source), Access Control Lists (ACLs) are stored in ZooKeeper. Kafka brokers retrieve and enforce ACLs from ZooKeeper at runtime.

NEW QUESTION # 40

What does Kafka replication factor provide? (Choose two.)

- **A. Durability**
- B. Security
- C. Performance
- **D. Availability**

Answer: A,D

Explanation:

Replication ensures that multiple copies of data exist across different brokers, so data is not lost if one broker fails.

With multiple replicas, Kafka can continue to serve data even if the leader or one replica fails, maintaining service availability.

NEW QUESTION # 41

A developer is working for a company with internal best practices that dictate that there is no single point of failure for all data stored.

What is the best approach to make sure the developer is complying with this best practice when creating Kafka topics?

- **A. Set the topic replication factor to 3.**
- B. Set 'min.insync.replicas' to 1.
- C. Use the parameter --partitions=3 when creating the topic.
- D. Make sure the topics are created with linger.ms=0 so data is written immediately and not held in batch.

Answer: A

Explanation:

Replication factor determines how many copies of each partition exist across different brokers. A replication factor of 3 ensures that even if one or two brokers fail, the data is still available, thus eliminating a single point of failure.

NEW QUESTION # 42

You want to increase Producer throughput for the messages it sends to your Kafka cluster by tuning the batch size ('batch.size') and the time the Producer waits before sending a batch ('linger.ms').

According to best practices, what should you do?

- A. Decrease 'batch.size' and decrease 'linger.ms'
- B. Decrease 'batch.size' and increase 'linger.ms'
- C. Increase 'batch.size' and decrease 'linger.ms'
- **D. Increase 'batch.size' and increase 'linger.ms'**

Answer: D

Explanation:

Increasing batch.size allows the producer to accumulate more messages into a single batch, improving compression and reducing the number of requests sent to the broker.

Increasing linger.ms gives the producer more time to fill up batches before sending them, which improves batching efficiency and throughput.

This combination is a best practice for maximizing throughput, especially when message volume is high or consistent latency is not a strict requirement.

NEW QUESTION # 43

.....

Your opportunity to survey the Confluent Certified Administrator for Apache Kafka (CCAAK) exam questions before buying it will relax your nerves. VerifiedDumps proudly declares that it will not disappoint you in providing the best quality Confluent Certified Administrator for Apache Kafka (CCAAK) study material. The guarantee to give you the money back according to terms and conditions is one of the remarkable facilities of the VerifiedDumps.
