If you purchase our DA0-001 guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy. So do not hesitate and buy our DA0-001 study torrent, we believe it will give you a surprise, and it will not be a dream for you to pass your CompTIA Data+ Certification Exam exam and get your certification in the shortest time.

CompTIA DA0-001 exam is a multiple-choice exam that consists of 90 questions. DA0-001 exam duration is 90 minutes, and the passing score is 720 on a scale of 100-900. DA0-001 exam is available in English, Japanese, and Portuguese. DA0-001 Exam Fees vary by location, and candidates can register for the exam through the Pearson VUE website.

CompTIA Data+ Certification Exam Sample Questions (Q192-Q197):

NEW QUESTION # 192
A data analyst needs to create a weekly recurring report on sales performance and distribute it to all sales managers. Which of the following would be the BEST method to automate and ensure successful delivery for this task?

- A. Upload the report to the server.
- B. Implement subscription access delivery.
- C. Use scheduled report delivery.
- D. Print out a copy.

Answer: C

Explanation:
Scheduled report delivery is a feature that allows a data analyst to automate the generation and distribution of a report at a specified time and frequency. This would be the best method to ensure that the sales managers receive the weekly report on sales performance without manual intervention. Subscription access delivery is a feature that allows users to subscribe to a report and access it on demand, but it does not automate the delivery. Printing out a copy or uploading the report to the server are manual methods that require more time and effort from the data analyst. Reference: CertMaster Practice for Data+ Exam Prep - CompTIA

NEW QUESTION # 193
Given the diagram below:

Which of the following types of sampling is depicted in the image?

- A. Stratified
- B. Systematic
- C. Random
- D. Cluster

Answer: B

NEW QUESTION # 194
Refer to exhibit.

Which of the following summary statements upholds integrity in data reporting?

- A. Product D should be promoted more than the other products in all strategies.
- B. While Strategy 2 does not result in the highest sales of Product D. over all products it appears to be the most effective.
- C. Strategy 4 provides the best sales in comparison to other strategies.
- D. Sales are approximately equal for Product A and Product B across all strategies.

Answer: B

Explanation:
Answer C) While Strategy 2 does not result in the highest sales of Product D. over A summary statement that upholds integrity in data reporting should be accurate, unbiased, and supported by evidence. Option C is the only statement that meets these criteria, as it reflects the data shown in the bar graph without exaggerating or distorting it. Option C also acknowledges the limitation of the statement by using the word "appears", which indicates that there may be other factors or variables that affect the sales performance.
Option A is inaccurate, as sales are not approximately equal for Product A and Product B across all strategies. Product A has higher sales than Product B in strategies 1, 3, and 5, while Product B has higher sales than Product A in strategies 2 and 4.
Option B is biased, as it does not consider the sales of different products in each strategy. Strategy 4 provides the best sales for Product B, but not for the other products. Strategy 5 has the highest total sales across all products, as shown by the black line graph.
Option D is unsupported by evidence, as it does not explain why Product D should be promoted more than the other products in all strategies. Product D has the lowest sales among all products in strategies 1, 3, and 4, and only slightly higher sales than Product C in strategies 2 and 5.

NEW QUESTION # 195

Taylor wants to investigate how manufacturing, marketing, and sales expenditures impact overall profitability for her company.
Which of the following systems is the most appropriate?

- A. OLTP.
- B. OLAP.
- C. Data warehouse.
- D. Data mart.

Answer: C

Explanation:
A Data mart is too narrow, because Taylor needs data from across multiple divisions.
OLAP is a broad term for analytical processing, and OLTP systems are transactional and not ideal for the task. Since Taylor is working with data across multiple different divisions, she will work with a Data warehouse.

NEW QUESTION # 196

A user imports a data file into the accounts payable system each day. On a regular basis. the field input is not what the system is expecting. so it results in an error for the row and a broken import process. To resolve the issue, the user opens the file, finds the error in the row, and manually corrects it before attempting the import again. The import sometimes breaks on subsequent attempts. though. Which of the following changes should be made to this process to reduce the number of errors?

- A. Have the user manually review the file for data completeness before loading it
- B. Spot-check the file prior to import to catch and correct field errors.
- C. Create a data field to data type validator to run the file through prior to import.
- D. Delete all incorrect inputs and upload the corrected file.

Answer: C

Explanation:
Explanation
A data field to data type validator is a tool or a process that checks if the data in each field of a file matches the expected data type, such as text, number, date, etc. A data field to data type validator can help to identify and correct any errors or inconsistencies in the data before importing it into the accounts payable system. This would reduce the number of errors and broken imports, as well as save time and effort for the user.
