

# Customizable C-ACDET-2506 Practice Test Software

BTW, DOWNLOAD part of ExamDumpsVCE C-ACDET-2506 dumps from Cloud Storage: <https://drive.google.com/open?id=1TdeF5zb6mrhltsIkJTibiBhdi9aVN-c>

This product is enough to get ready for the C-ACDET-2506 test on the first attempt. Three formats are easy to use and meet the needs of every SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) test applicant. The SAP C-ACDET-2506 practice material's three formats are Desktop practice test software, web-based practice exam, and PDF.

## SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Project Overview, Roles and Responsibilities:</b> This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>

### **Latest C-ACDET-2506 Test Cost | C-ACDET-2506 Latest Exam Duration**

The immediate downloading feature of our C-ACDET-2506 study materials is an eminent advantage of our products. Once the pay is done, our customers will receive an e-mail from our company. There is a linkage given by our e-mail, and people can begin their study right away after they have registered in. Our C-ACDET-2506 study materials are available for downloading without any other disturbing requirements as long as you have paid successfully, which is increasingly important to an examinee as he or she has limited time for personal study. Therefore, our C-ACDET-2506 Study Materials are attributive to high-efficient learning.

### **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q10-Q15):**

#### **NEW QUESTION # 10**

Custom partner bundles can be leveraged to share and apply baselines in which deployment scenario?

- **A. Greenfield**
- B. Brownfield
- C. Bluefield
- D. Grayfield

**Answer: A**

Explanation:

Custom partner bundles are predefined baseline configurations provided by SAP or implementation partners and are primarily used in Greenfield deployments, where a new SAP Ariba solution is being implemented from scratch. These bundles help accelerate deployment by applying standard best-practice settings and templates as a starting point in the Test environment. In Bluefield or Brownfield deployments, which involve migration or upgrade of existing systems, incremental or selective configuration migration is more typical, and partner bundles are less relevant. Grayfield is not a recognized SAP Ariba deployment scenario.

Using partner bundles in Greenfield supports standardized setups and reduces manual configuration errors early in the project lifecycle, enabling faster time to value.

#### **NEW QUESTION # 11**

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- **A. SupplierContact - contacts for the suppliers**
- B. Template - project templates such as Contract templates
- C. AMLExtension - AML customizations such as custom fields
- D. DynamicForm - custom form templates (dForms)

**Answer: A**

Explanation:

The Intelligent Configuration Manager (ICM) migrates configuration types such as DynamicForms (dForms), AML Extensions (custom fields and enumerations), and Templates (contract or project templates). However, SupplierContact data, which is master or transactional data, is not migrated through ICM because ICM focuses on configuration migration, not operational or transactional data. Supplier contact information is managed separately and must be migrated using appropriate master data processes.

### NEW QUESTION # 12

How can you make the attributes of a Flex Master Data field reportable?

- A. When the Flex Master Data Template is created, the attributes can be marked as reportable or not.
- B. Flex Master Data objects automatically include all attributes as reportable without any additional configuration.
- C. Create a custom reportable field and use a defaulting expression to set the value of the Flex Master Data attribute
- D. Flex Master Data objects and their attributes cannot be made reportable

**Answer: A**

Explanation:

When creating a Flex Master Data (FMD) template, you can specify which attributes are reportable by marking them accordingly during template setup. Only attributes marked as reportable will be accessible in reporting tools within SAP Ariba.

While some users employ workarounds by creating custom fields with defaulting expressions to surface FMD attribute values, the direct and supported method is to configure reportability at the attribute level within the FMD template itself.

This capability ensures efficient and accurate reporting without requiring complex custom fields or expressions.

### NEW QUESTION # 13

During which SAP Activate Methodology phase do you define the customer requirements?

- A. Define
- B. Design
- C. Explore
- D. Discover

**Answer: C**

### NEW QUESTION # 14

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. SalesContractRequest and InternalContractRequest
- B. ContractRequest
- C. InternalContractWorkspace and SalesContractWorkspace
- D. AbstractContractWorkspace

**Answer: C**

Explanation:

The ContractWorkspace class is a parent class to both InternalContractWorkspace and SalesContractWorkspace classes in SAP Ariba. When a custom field is added to ContractWorkspace, it automatically inherits down to both these subclasses, making the field available in both internal and sales contract workspace types. It does not propagate upward to AbstractContractWorkspace or into contract request classes. This inheritance model is part of SAP Ariba's class hierarchy to ensure consistent data structures across related contract objects.

### NEW QUESTION # 15

.....

Obtaining a certificate is not only an affirmation of your ability, but also can improve your competitive force in the job market. C-ACDET-2506 exam materials will help you pass the exam and get the certificate successfully. You just need to spend some money and you can get the certificate. In addition, we have a professional team to collect the latest information about the C-ACDET-2506 Exam Materials, we can ensure you that what you get is the latest version we have. We offer you free update for 365 days after purchasing, and the update version for C-ACDET-2506 exam dumps will be sent to your email automatically.
