And there is no exaggeration that our pass rate for our XSOAR-Engineer study guide is 98% to 100% which is proved and tested by our loyal customers.

Palo Alto Networks XSOAR Engineer Sample Questions (Q170-Q175):

NEW QUESTION # 170
Which two options may be added when a content pack is being installed? (Choose two.)

- A. Other content packs
- B. Lists
- C. Roles
- D. Indicator layouts

Answer: B,C

NEW QUESTION # 171
What are two primary uses of standard tasks? (Choose two.)

- A. To highlight different paths in a playbook
- B. To automate tasks such as parsing a file or enriching indicators
- C. To create an incident or escalate an existing incident
- D. To generate new widgets for a dashboard

Answer: B,C

NEW QUESTION # 172
An engineer creates a script to display data in markdown format for a layout. When configuring the layout, the new script is not listed.
Which missed configuration step will cause this behavior?.

- A. Using a markdown output type.
- B. Ensuring the script has the necessary permissions.
- C. Adding the snippet as an integration command.
- D. Tagging the script with Dynamic Section.

Answer: D

Explanation:
The XSOAR Layouts documentation states that scripts can appear inside incident layouts only when they are designated as Dynamic Section scripts. Dynamic Sections are special script types that run automatically within layouts to display enrichment data, contextual summaries, or markdown-rendered information.
When creating such a script, the developer must mark it with the "dynamic-section" tag; otherwise, XSOAR does not expose it as an option during layout configuration. Without this mandatory tag, the script is treated as an ordinary automation and therefore cannot be placed into layout components.
Permissions (option B) affect script execution but do not prevent it from appearing in the layout editor.
Integration commands (option C) are unrelated-dynamic sections do not use integration command definitions. Markdown output type (option D) determines formatting only and does not affect whether the script is selectable within the layout editor.
Thus, the missing configuration step is failing to tag the script as a Dynamic Section, making option A the correct answer according to the official XSOAR documentation.

NEW QUESTION # 173

Which of the following does a XSOAR Admin need to create an integration with a third party cloud application?

- A. Multitenant deployment
- B. Marketplace access
- C. Private key/Public key integration
- D. Application with API

Answer: D

NEW QUESTION # 174

An XSOAR engineer has been tasked with exporting all indicators from the production environment in the last 90 days. The final report needs to be in CSV format containing all indicator fields. How can this task be achieved?

- A. Run the command !findIndicators in CLI with the query firstSeen:>="90 days ago" and export to CSV.
- B. SSH into the server and copy the indicator's database.
- C. Run the command !GetIndicatorsByQuery in CLI with its default arguments and export all indicators in the last 90 days.
- D. In the Threat Intel page, add query firstSeen:>="90 days ago", select All columns in Table View, and click Export to export as a CSV.

Answer: D

NEW QUESTION # 175

......

In addition to the XSOAR-Engineer study materials, our company also focuses on the preparation and production of other learning materials. If you choose our XSOAR-Engineer study materials this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our XSOAR-Engineer Study Materials a choice is to give you a chance to succeed.
