P.S. Free 2026 Salesforce Salesforce-MuleSoft-Developer-I dumps are available on Google Drive shared by Exam4Docs:
<https://drive.google.com/open?id=1hMKNGEIJAg4nHep-3S6lDasBjBF-68nO>

There are a lot of materials for Salesforce Salesforce-MuleSoft-Developer-I practice test. Exam4Docs is the only site providing with the finest Salesforce Salesforce-MuleSoft-Developer-I dumps torrent. All Exam4Docs test questions are the latest and we guarantee you can pass your exam at first time. Salesforce-MuleSoft-Developer-I Questions and answers Exam4Docs provide are rewritten by the modern information technology experts, which is good for you.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.

Topic 2	<ul style="list-style-type: none"> • Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 3	<ul style="list-style-type: none"> • Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 4	<ul style="list-style-type: none"> • Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Topic 5	<ul style="list-style-type: none"> • Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 6	<ul style="list-style-type: none"> • Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 7	<ul style="list-style-type: none"> • Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.
Topic 8	<ul style="list-style-type: none"> • Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.

Exam Salesforce-MuleSoft-Developer-I Simulator Fee, Study Guide Salesforce-MuleSoft-Developer-I Pdf

Every question from our Salesforce-MuleSoft-Developer-I study materials is carefully elaborated and the content of our Salesforce-MuleSoft-Developer-I exam questions involves the professional qualification certificate examination. We believe under the assistance of our Salesforce-MuleSoft-Developer-I practice quiz, passing the exam and obtain related certificate are not out of reach. As long as you study our Salesforce-MuleSoft-Developer-I training engine and follow it step by step, we believe you will achieve your dream easily.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q234-Q239):

NEW QUESTION # 234

A function named newProdCode needs to be defined that accepts two input parameters, an integer value for itemID and a string value for productCategory, and returns a new product code.

What is the correct DataWeave code to define the newProdCode function?

- A. `var newProdCode(itemID: Number, productCategory: String) -> "PC-" ++ productCategory ++ (itemID as String)`
- B. `fun newProdCode(itemID: Number, productCategory: String) = "PC-" ++ productCategory ++ (itemID as String)`
- C. `fun newProdCode {itemID: Number, productCategory: String} -> "PC-" ++ productCategory ++ (itemID as String)`
- D. `function newProdCode(itemID: Number, productCategory: String) = "PC-" ++ productCategory ++ (itemID as String)`

Answer: B

NEW QUESTION # 235

A Utility.dwl is located in a Mule project at src/main/resources/modules. The Utility.dwl file defines a function named encryptString that encrypts a String. What is the correct DataWeave to call the encryptString function in a Transform Message component?

- A. 1. %dw 2.0
2. output application/json
3. import modules::Utility
4. ---
5. encryptString("John Smith")
- B. 1. %dw 2.0
2. output application/json
3. import modules.Utility
4. ---
5. encryptString("John Smith")
- C. 1. %dw 2.0
2. output application/json
3. import modules.Utility
4. ---
5. Utility.encryptString("John Smith")
- D. 1. %dw 2.0
2. output application/json
3. import modules::Utility
4. ---
5. Utility::encryptString("John Smith")

Answer: A

Explanation:

Correct answer is

```
%dw 2.0
```

```
output application/json
```

```
import modules::Utility
```

```
---
```

```
Utility::encryptString( "John Smith" )
```

DataWeave 2.0 functions are packaged in modules. Before you begin, note that DataWeave 2.0 is for Mule 4 apps. For Mule 3 apps, refer to DataWeave Operators in the Mule 3.9 documentation. For other Mule versions, you can use the version selector for the Mule Runtime table of contents.

Functions in the Core (dw::Core) module are imported automatically into your DataWeave scripts. To use other modules, you need to import the module or functions you want to use by adding the import directive to the head of your DataWeave script, for example:

```
import dw::core::Strings
```

```
import camelize, capitalize from dw::core::Strings
```

```
import * from dw::core::Strings
```

The way you import a module impacts the way you need to call its functions from a DataWeave script. If the directive does not list specific functions to import or use * from to import all functions from a function module, you need to specify the module when you call the function from your script. For example, this import directive does not identify any functions to import from the String module, so it calls the pluralize function like this: Strings::pluralize("box").

Transform

```
%dw 2.0
```

```
import dw::core::Strings
```

```
output application/json
```

```
---
```

```
{ 'plural': Strings::pluralize("box") }
```

NEW QUESTION # 236

The new RAML spec has been published to Anypoint Exchange with client credentials.

What is the next step to gain access to the API?

- A. Email the owners of the API
- B. No additional steps needed
- C. Request access to the API in Anypoint Exchange

- D. Create a new client application

Answer: C

Explanation:

Correct answer is Request access to the API in Anypoint Exchange. This way we can get clientId and Client secret which we can use to access the API

NEW QUESTION # 237

Refer to the exhibits.

A web client submits a request to `http://localhost:8081 /flights`. What is the result at the end of the flow?

- A. "object"
- B. "string"
- C. "XML"
- D. "Java"

Answer: B

NEW QUESTION # 238

A web client sends one GET request to the test flow's HTTP Listener, which causes the test flow to call the updateTemp flow. After the test flow returns a response, the web client then sends a different GET request to the getTemp flow's HTTP Listener. The test flow is not called a second time.

What response is returned from the request to the getTemp flow's HTTP Listener?

- A.
- B.
- C.
- D.

Answer: B

NEW QUESTION # 239

.....

Now in this time so precious society, I suggest you to choose Exam4Docs which will provide you with a short-term effective training, and then you can spend a small amount of time and money to pass your first time attend Salesforce Certification Salesforce-MuleSoft-Developer-I Exam.
