Certification 4A0-D01 Training | 4A0-D01 New Exam Bootcamp

Through continuous development and growth of the IT industry in the past few years, 4A0-D01 exam has become a milestone in the Nokia exam, it can help you to become a IT professional. There are hundreds of online resources to provide the Nokia 4A0-D01 questions. Why do most people to choose It-Tests? Because It-Tests has a huge IT elite team, In order to ensure you accessibility through the Nokia 4A0-D01 Certification Exam, they focus on the study of Nokia 4A0-D01 exam. It-Tests ensure that the first time you try to obtain certification of Nokia 4A0-D01 exam. It-Tests will stand with you, with you through thick and thin.

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	• SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.
Topic 2	• SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.
Topic 3	• SR Linux Configuration and Routing: This section of the exam measures skills of a Network Automation Specialist and focuses on configuring and managing SR Linux systems. It examines the YANG-driven CLI, JSON output, environment variables, and static and dynamic routing. Learners also explore BGP, ECMP, IP-VRF, MAC-VRF, and the use of VXLAN with EVPN to implement both Layer 2 and Layer 3 overlays, including symmetric and asymmetric models.

Topic 4	• This section of the exam measures skills of a Network Automation Specialist and introduces the principles of Event Driven Automation in SR Linux environments. It covers integration with Kubernetes and explores core use cases such as intent-based automation for fabrics and services, as well as enhanced network observability.

4A0-D01 New Exam Bootcamp & Training 4A0-D01 Pdf

It-Tests offers actual and updated Nokia 4A0-D01 Dumps after seeing the students struggling to prepare quickly for the test. We have made this product after consulting with a lot of professionals so the students can be successful. It-Tests has hired a team of professionals who work on a daily basis without caring about themselves to update the Nokia 4A0-D01 practice material.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24
Which of the following statements about SR Linux interfaces is FALSE?

- A. Network interfaces are associated with physical ports on the linecards.
- B. Layer 2 parameters such as MTU are configured at the SR Linux interface level while Layer 3 parameters are configured at the subinterface level.
- C. The loopback interface is a physical interface directly connected to another interface on the same chassis.
- D. Only one management interface is allowed.

Answer: C

Explanation:
The loopback interface in SR Linux is a logical, virtual interface used for management and routing purposes; it is not a physical interface directly connected to another interface on the same chassis.

NEW QUESTION # 25
Which of the following statements about resilient ECMP load balancing is TRUE?

- A. The hash value used to distribute traffic is calculated as a modulo function on specific fields of the packet header.
- B. A different hash seed is used on downstream routers to ensure that flows are randomly distributed across all eligible router interfaces.
- C. When one of the next-hops fail, only flows currently egressing to that next-hop are impacted.
- D. Hash buckets are used to ensure that flows egressing the same interface on one router use different egress interfaces on downstream routers.

Answer: C

Explanation:
In resilient ECMP load balancing, when a next-hop fails, only the flows that were using that specific next-hop are affected and need to be redistributed, minimizing disruption to other flows.

NEW QUESTION # 26
Which of the following statements about Nokia's Fabric Services System is FALSE?

- A. Digital sandbox provides notification of performance issues in the data center fabric.
- B. Data center fabric configuration is represented as the fabric intent in a declarative YAML format.
- C. Cloud-native design enables easy integration with the customer's environment.
- D. Telemetry data is provided in a context that is relevant to the fabric intent.

Answer: A

Explanation:
The Digital Sandbox in Nokia's Fabric Services System is primarily used for simulation and validation of fabric intent, not for providing notifications of performance issues.

NEW QUESTION # 27
Which of the following statements about the data center's leaf-spine topology (clos network) is FALSE?

- A. It provides a consistent path for east-west traffic.
- B. It uses the spanning tree protocol to avoid forwarding loops.
- C. Each leaf router is connected to all the spine routers in the cluster.
- D. It uses ECMP to distribute traffic across duplicate links.

Answer: B

Explanation:
The leaf-spine (Clos) topology does not use the spanning tree protocol because it relies on equal-cost multipath (ECMP) routing to prevent loops and efficiently utilize all available paths. Spanning tree is typically avoided in modern data center fabrics to enable full bandwidth utilization.

NEW QUESTION # 28
How are LLDP frames advertised between two Nokia SR Linux routers?

- A. They are periodically flooded to the broadcast MAC address on each interface.
- B. They are forwarded to the destination node based on the MAC VRF table.
- C. They are forwarded to the destination node based on the MAC VRF table.
- D. They are routed to the destination node based on the IP VRF forwarding table.

Answer: B

Explanation:
LLDP frames are periodically sent to a well-known multicast MAC address on each interface to discover directly connected devices.

NEW QUESTION # 29
......

4A0-D01 questions & answers are valid, covering the whole chapter in the actual test and the key points. You can take 4A0-D01 pdf torrent as your study reference.After you get the 4A0-D01 exam dumps, do not worry about the update, because one year free update is provided to you. Please pay attention to your payment email and check if there is any 4A0-D01 Updated Dumps. Dear, if you have any questions about 4A0-D01 study torrent, you can contact us by email or online chat as you like. In addition, we have money back guarantee, in case of failure, we will give you full refund.
