Our customers comment that the Desktop-Specialist latest dumps pdf covers most questions of actual test. Most questions in our Desktop-Specialist dumps valid will appear in the real test because Tableau exam prep is created based on the formal test. If you practice the Desktop-Specialist Test Questions and remember the key points of study guide, the rate of you pass will reach to 95%.

Tableau Desktop-Specialist Exam is a certification exam designed for individuals who want to demonstrate their proficiency in using Tableau Desktop software. Tableau Desktop is a powerful data visualization tool that allows users to connect to various data sources, create interactive dashboards, and share insights with others. Tableau Desktop Specialist Exam certification exam tests candidates' knowledge of Tableau Desktop's features and functionalities, as well as their ability to use the software to analyze and visualize data effectively.

Practice Desktop-Specialist Engine | Efficient Desktop-Specialist: Tableau Desktop Specialist Exam

It is browser-based; therefore no need to install it, and you can start practicing for the Tableau Desktop Specialist Exam (Desktop-

Specialist) exam by creating the Tableau Desktop-Specialist practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Tableau Desktop Specialist Exam (Desktop-Specialist) exam. Pass4SureQuiz Tableau Desktop Specialist Exam (Desktop-Specialist) web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

Tableau Desktop Specialist Exam Sample Questions (Q44-Q49):

NEW QUESTION # 44
What are two requirements to combine two tables by using a union? Choose two.

- A. The tables must come from different connections.
- B. Related fields must have different names.
- C. The tables must have the same number of fields.
- D. Related fields must have matching data types.

Answer: C,D

Explanation:
To perform a union in Tableau, the tables must have a related field with matching data types, and they must have the same number of fields. This allows the tables to be appended vertically in the data source. Different names or tables from different connections do not affect the ability to union the tables.

NEW QUESTION # 45
Which statement accurately describes creating a group by selecting headers in a view?

- A. A new group updates the aliases from the selected headers.
- B. A newly created group only exists in the current view.
- C. The grouped dimension replaces the original dimension field on Rows or Columns.
- D. The grouped dimension is added to Color.

Answer: C

Explanation:
When creating a group by selecting headers in a Tableau view, the newly created grouped dimension replaces the original dimension field on either the Rows or Columns shelf. This grouping action aggregates the selected headers into a single group, and this new group dimension is automatically placed in the view, replacing the original dimension. This functionality allows for more simplified and customized categorization within the data visualization, enhancing the ability to analyze and interpret data according to specific groupings.

NEW QUESTION # 46
The row and column shelves contain _____

- A. Parameters
- B. Pills
- C. Grand Totals
- D. Filters

Answer: B

Explanation:
We can drag fields from the Data pane to create the structure for your visualizations.
The Columns shelf creates the columns of a table, while the Rows shelf creates the rows of a table. You can place any number of fields on these shelves.
These FIELDS are also referred to as PILLS. See below:
▢

NEW QUESTION # 47
If you have a dashboard and are displaying its filter, how can you rearrange it?

- A. By clicking on the 2 lines on top and dragging the filter.
- B. By clicking on the filter title and dragging it.
- C. By clicking on the dropdown and dragging the filter
- D. By clicking anywhere inside the filter and dragging it.

Answer: A

Explanation:
Explanation
You can drag the filter by clicking on the 2 lines on top, and then dragging the filter as shown:

NEW QUESTION # 48

Which of the following is not a Trend Line Model?

- A. Logarithmic Trend Line
- B. binomial Trend Line
- C. Exponential Trend Line
- D. Linear Trend Line

Answer: B

Explanation:
According to the official Tableau documentation, there are 5 types of trend lines which we can work with in Tableau :
1) Linear Trend Line
2) Logarithmic Trend Line
3) Exponential Trend Line
4) Polynomial Trend Line
5) Power Model
Hence, the correct answer is BINOMIAL trend line which is not present in Tableau.
See the following image:
For more information, refer to: https://help.tableau.com/current/pro/desktop/en-us/trendlines_add.htm

NEW QUESTION # 49

......
