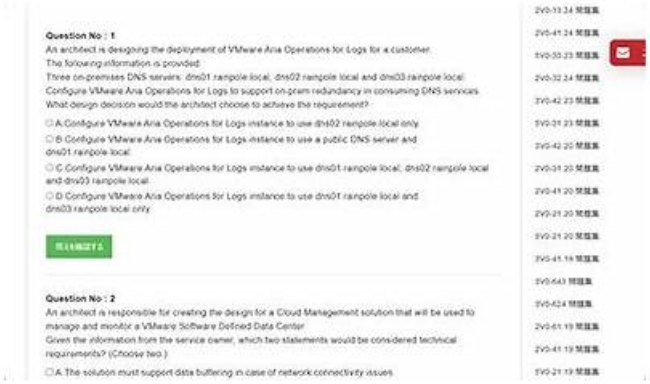
3V0-32.23 Reliable Braindumps Questions, 3V0-32.23 PDF Question



Question No : 1
An architect is designing the deployment of VMware Aria Operations for Logs for a customer.
The following information is provided:
Three on-premises DNS servers: dns01.rainpole.local, dns02.rainpole.local and dns03.rainpole.local
Configure VMware Aria Operations for Logs to support on-prem redundancy in consuming DNS services.
What design decision would the architect choose to achieve the requirement?
A. Configure VMware Aria Operations for Logs instance to use dns02.rainpole.local only.
B. Configure VMware Aria Operations for Logs instance to use a public DNS server and dns01.rainpole.local.
C. Configure VMware Aria Operations for Logs instance to use dns01.rainpole.local, dns02.rainpole.local and dns03.rainpole.local.
D. Configure VMware Aria Operations for Logs instance to use dns01.rainpole.local and dns03.rainpole.local only.
Question No : 2
An architect is responsible for creating the design for a Cloud Management solution that will be used to manage and monitor a VMware Software Defined Data Center.
Given the information from the service owner, which two statements would be considered technical requirements? (Choose two.)
A. The solution must support data buffering in case of network connectivity issues.

In the modern world, obtaining 3V0-32.23 certification is essential. With the growing popularity of VMware, the demand for professionals holding this Cloud Management and Automation Advanced Design (3V0-32.23) certification holders has increased significantly. Unfortunately, many candidates fail to pass the 3V0-32.23 Exam due to outdated Cloud Management and Automation Advanced Design (3V0-32.23) exam study material. Such failure can lead to the loss of time, money, and confidence.

VMware 3V0-32.23 exam focuses on advanced concepts and techniques related to cloud management and automation. 3V0-32.23 exam covers a wide range of topics, including cloud design principles, automation workflows, infrastructure as code, cloud security, and governance and compliance. 3V0-32.23 exam is designed to test your knowledge and expertise in these areas, and to help you demonstrate your ability to design and implement cloud-based solutions.

VMware 3V0-32.23 certification exam is intended for IT professionals who work with VMware vRealize Suite, including architects, consultants, and engineers. 3V0-32.23 Exam is ideal for individuals who have already earned the VMware Certified Professional (VCP) certification and are looking to further their knowledge and skills in cloud management and automation. Passing 3V0-32.23 exam demonstrates that you have the necessary expertise to design and implement VMware-based cloud management and automation solutions in complex environments.

100% Pass Quiz VMware - 3V0-32.23 - Cloud Management and Automation Advanced Design –High-quality Reliable Braindumps Questions

Our users are all over the world, and users in many countries all value privacy. Our 3V0-32.23 simulating exam ' global system of privacy protection standards has reached the world's leading position. No matter where you are, you don't have to worry about your privacy being leaked if you ask questions about our 3V0-32.23 Exam Braindumps or you pay for our 3V0-32.23 practice guide by your credit card. It is safe for our customers to buy our 3V0-32.23 learning materials!

VMware Cloud Management and Automation Advanced Design Sample Questions (Q135-Q140):

NEW QUESTION # 135
An architect has been asked to design a configuration management solution.
Following an initial design workshop with the customer, the following information is known about the existing environment:
The customer already has deployed a VMware Software-Defined Data Center.
The customer is fully licensed for Aria Universal Suite - Standard.
The customer has a corporate policy stating that all user authentication must be completed using Active Directory.
The customer has sufficient budget for additional license purchases (if required).

The following solution requirements have been captured during the design workshop, the solution must:
Be capable of automating the deployment of software to managed virtual machines.
Provide configuration management capabilities.
Provide a centralized Single Sign-On (SSO) solution for all of the cloud management solution.
Which three design decisions would meet the requirement? (Choose three).

- A. Workspace One Access will be configured to use the system domain for user authentication.
- B. VMware Aria Automation Orchestrator will be configured to use Workspace One Access as its authentication method.
- C. Workspace One Access will be deployed to provide a Single Sign-On solution for all VMware Aria cloud management components.
- D. Workspace ONE Access will be configured to use Active Directory as the authentication solution.
- E. VMware Aria Automation Config will be deployed.
- F. VMware Aria Automation Orchestrator (standalone) will be deployed.

Answer: C,D,E

Explanation:
Deploying Workspace One Access provides a centralized SSO solution for all VMware Aria cloud management components.
VMware Aria Automation Config delivers the configuration management and software automation capabilities.
Configuring Workspace One Access to use Active Directory satisfies the corporate policy for user authentication.

NEW QUESTION # 136
What design decision(s) would be relevant in a VMware Aria Operations for Logs physical design?

- A. Planning log collection, storage, and analysis processes
- B. Defining employee dress code
- C. Selecting company event themes
- D. Establishing customer service response times

Answer: A

NEW QUESTION # 137
An architect is creating a design for a VMware Cloud Management solution. Based on customer constraints, the design decision has already been made to select VMware Aria Automation (SaaS) as part of the solution.
The architect is evaluating a customer requirement to integrate with an IT Service Management (ITSM) solution that is based on-prem. The vendor of the ITSM solution has previously created an Aria Automation Orchestrator plugin that can be used as the foundation of the integration.
What additional component must the architect include in the solution design that will satisfy the requirement?

- A. VMware Aria Automation cloud proxy
- B. VMware Aria Automation cloud extensibility proxy
- C. VMware Aria Automation Orchestrator (on-prem)
- D. VMware Aria Automation Orchestrator (SaaS)

Answer: B

Explanation:
The VMware Aria Automation cloud extensibility proxy enables integration between Aria Automation (SaaS) and on-premises systems, such as an on-prem ITSM solution, by facilitating secure communication and orchestrator plugin execution.

NEW QUESTION # 138
A PaaS Provider wants to start offering private cloud solutions to its customers. It has tasked its internal team of cloud architects with recommending an architectural design that supports the new initiative and continues to leverage the existing centralized VMware Cloud Management Platform.
Which deployment model will let the company achieve its desired goal?

- A. Individual tenant-managed multitenancy
- B. Default tenant-managed multitenancy

- C. Multiple individual vRealize Automation deployments
- D. Single-tenant

Answer: A

NEW QUESTION # 139
What role is responsible for defining and managing policies within vRealize Automation?

- A. Tenant Administrator
- B. Business Group Manager
- C. Fabric Administrator
- D. Infrastructure Architect

Answer: C

NEW QUESTION # 140
.....

If you want to ace the Cloud Management and Automation Advanced Design (3V0-32.23) certification exam and make a successful career in the VMware sector, Free4Dump is the right choice for you. Their Cloud Management and Automation Advanced Design (3V0-32.23) practice tests and preparation materials are designed to provide you with the best possible chance of passing the VMware 3V0-32.23 Exam with flying colors. So, don't wait any longer, start your preparation now with Free4Dump!
