Huawei HCSE-Presales-Campus Network Planning and Design V1.0 Sample Questions (Q200-Q205):

NEW QUESTION # 200

Each AC must be assigned a unique IP address. The APs attached to the AC device learn this IP address or the IP address configured on this interface for communication between the AC and AP in the ACHIT AP network and for establishing CAPWAP tunnels.

- A. Error
- B. Correct

Answer: B

NEW QUESTION # 201

When the Cloud Box device registers using DHCP Option, which option is used?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

NEW QUESTION # 202

USB flash drive deployment means that the network administrator completes the ZTP configuration of the site on the controller, and the controller automatically generates a ZTP file that records the CPE deployment configuration information. The deployment personnel then use the tool to generate a configuration file and import the configuration file into the USB flash drive for USB flash drive deployment.

- A. Error
- **B. Correct**

Answer: B

NEW QUESTION # 203

Which of the following statements regarding the requirements for confirming on-site environmental information during a site survey are correct? (Multiple choice)

- **A. When surveying indoors, refer to the drawings to distinguish the types of obstacles, mark the actual location and material of each type of obstacle, mark different obstacles with different colors, and test their 2.4G and 5C attenuation peaks.**
- **B. Confirm whether the site is completely consistent with the architectural drawings. Mark out any inconsistent areas, take photos as much as possible, and mark the room numbers on the drawings.**
- C. Take as many photos of the indoor scene as possible, paying special attention to the equipment installation location, overall coverage area, internal building structure, and any new obstacles. For outdoor coverage, focus only on obstacles between the AP and the coverage area.
- **D. When surveying indoor spaces, be sure to mark out any obstacles that may affect the coverage, such as load-bearing columns and large objects added during interior design to block ceilings.**

Answer: A,B,D

NEW QUESTION # 204

Which of the following statements about 802.1X authentication is incorrect?

- A. The 802.1X protocol is a Layer 2 protocol and does not require Layer 3. It does not require high performance of access devices and can effectively reduce network construction costs.
- **B. 802.1X can only be applied to the physical interface of the switch and cannot be applied to the logical interface.**
- C. The 802.1X protocol is a port-based network access control protocol.
- D. The 802.1X system is a typical Client/Server structure.

Answer: B

NEW QUESTION # 205
