

JN0-105 Sample Questions & JN0-105 Exam Vce Format

P.S. Free & New JN0-105 dumps are available on Google Drive shared by BraindumpsIT: https://drive.google.com/open?id=18C8_nEDIlwQ6u7cXZf6yxskThh61Z0VO

The successful selection, development and JN0-105 training of personnel are critical to our company's ability to provide a high standard of service to our customers and to respond their needs. That's the reason why we can produce the best JN0-105 exam prep and can get so much praise in the international market. And we always believe first-class quality comes with the first-class service. You will find we are professional on the answering the questions on our JN0-105 Study Materials.

The JN0-105 pdf format of the BraindumpsIT product is easy-to-use. It contains actual Junos, Associate (JNCIA-Junos) (JN0-105) exam questions. You can easily download and use Juniper JN0-105 pdf on laptops, tablets, and smartphones. BraindumpsIT regularly updates JN0-105 Exam Questions' pdf version so that you always have the latest material. Furthermore, the Juniper JN0-105 pdf can be printed enabling paper study.

Free PDF Quiz Reliable Juniper - JN0-105 - Junos, Associate (JNCIA-Junos) Sample Questions

It is universally acknowledged that the pass rate is the most persuasive evidence to prove how useful and effective a kind of JN0-105 practice test is. In terms of our JN0-105 training materials, the pass rate is one of the aspects that we take so much pride in because according to the statistics from the feedbacks of all of our customers, under the guidance of our JN0-105 Preparation materials, the pass rate among our customers has reached as high as 98% to 100%, which marks the highest pass rate in the field. So just feel rest assured to buy our JN0-105 study guide!

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.
Topic 2	• Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 3	• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 4	• Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device

Topic 5	• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q41-Q46):

NEW QUESTION # 41

You configured your system authentication order using the set authentication-order tacplus radius password command. Which statement is correct in this scenario?

- A. All authentication methods are used with the most restrictive permission set used.
- B. The password authentication will only be used if the TACACS+ and RADIUS servers fail to respond.
- C. A rejection by TACACS+ will prevent a login and bypass the other two authentication methods.
- D. The password authentication method is evaluated if the TACACS+ and RADIUS servers respond with a reject message.

Answer: B

Explanation:

In the scenario where the system authentication order is set to "tacplus radius password," the correct statement is (B). If the TACACS+ and RADIUS servers are unreachable or fail to respond, the system will fall back to using password authentication. This ensures that users can still authenticate using locally stored passwords if external authentication servers are unavailable.

NEW QUESTION # 42

What is the protocol data unit (PDU) of the Data Link Layer?

- A. bit
- B. byte
- C. frame
- D. segment

Answer: C

Explanation:

In the OSI model, the Data Link Layer is responsible for node-to-node delivery of data. It frames the packets received from the Network Layer and prepares them for physical transmission. The Protocol Data Unit (PDU) for the Data Link Layer is called a "frame." Frames encapsulate the network layer packets, adding a header and a trailer that include the hardware addresses of the source and destination, among other things, facilitating the data link layer services like frame synchronization, flow control, and error checking.

NEW QUESTION # 43

Which two statements apply to the Routing Engine functions? (Choose two.)

- A. It does not process routing updates.
- B. It responds to ping and traceroute commands.
- C. It maintains the routing tables.
- D. It processes the transit traffic.

Answer: B,C

Explanation:

The Routing Engine (RE) in Juniper Networks devices plays a critical role in the control plane operations. One of its functions includes responding to network utility commands like ping and traceroute, which are essential for diagnosing network connectivity and path issues. Furthermore, the RE is responsible for maintaining the routing tables, which contain information about network paths and destinations. These tables are vital for making forwarding decisions but are distinct from the actual forwarding of packets, which is handled by the Packet Forwarding Engine (PFE).

NEW QUESTION # 44

Which two components are included in a transport header? (Choose two.)

- A. source port number
- B. destination port number
- C. source MAC address
- D. destination MAC address

Answer: A,B

Explanation:

The transport layer in the OSI model is responsible for end-to-end communication and error recovery. In a transport header, such as TCP or UDP, the key components include the source port number and the destination port number. These port numbers are used to identify sending and receiving applications. The source port number indicates the port of the sending application, and the destination port number refers to the port of the receiving application. MAC addresses, on the other hand, are part of the data link layer (Layer 2) and would be included in an Ethernet header, not a transport header.

NEW QUESTION # 45

How many login classes are assignable to a user account?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

<https://www.juniper.net/documentation/us/en/software/junos/user-access-evo/user-access/topics/topic-map/junos-os-login-class.html#:~:text=You%20can%20define%20any%20number,to%20an%20individual%20user%20account.>

In Junos OS, each user account can be assigned only one login class. Login classes in Junos OS define the permissions for users, controlling what they can access and modify within the system. This setup helps in maintaining a clear and secure access control mechanism.

Reference:

Junos OS Documentation on User Accounts and Login Classes.

NEW QUESTION # 46

.....

Now we can say that Junos, Associate (JNCIA-Junos) (JN0-105) exam questions are real and top-notch Juniper JN0-105 exam questions that you can expect in the upcoming Junos, Associate (JNCIA-Junos) (JN0-105) exam. In this way, you can easily pass the JN0-105 exam with good scores. The countless JN0-105 Exam candidates have passed their dream JN0-105 certification exam and they all got help from real, valid, and updated JN0-105 practice questions, You can also trust on BraindumpsIT and start preparation with confidence.
