## Pass-Sure Latest Chrome-Enterprise-Administrator Exam Registration for Real Exam

IT certification exam materials providers are increasing recently years so that you will feel confused while choosing Google Chrome-Enterprise-Administrator latest exam questions vce. Here is good news that PracticeVCE dumps are updated and it is valid and latest. If you purchase dumps right now you can get the best discount and price. Chrome-Enterprise-Administrator Latest Exam Questions vce will be your best choice for your test. Wish you pass exam successfully with our products.

## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Manage Chrome Enterprise in the Cloud:</b> This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Chrome Enterprise Management Fundamentals:</b> This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Chrome Extensions:</b> This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Chrome Updates:</b> This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li> </ul>

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q37-Q42):

### NEW QUESTION # 37

The security team has a request to approve two extensions with similar functionality. They only want to approve one extension for use in the environment to avoid redundancy. What is an objective measurement that the security team can use to help determine which extension may be safer to use?

- **A. 3rd Party Risk Score**
- B. Chrome Manifest Version
- C. Chrome Web Store Ratings
- D. Permission Count

**Answer: A**

Explanation:

A "3rd Party Risk Score" provides an objective assessment of the extension's security and privacy risks, often based on automated analysis of its code, requested permissions, developer reputation, and other factors. This is a more data-driven approach to evaluating safety compared to simply counting permissions (which doesn't account for the sensitivity of each permission), the Manifest version (which indicates features but not necessarily safety), or Chrome Web Store ratings (which are subjective and can be manipulated).

### NEW QUESTION # 38

A Chrome administrator notices that a Chrome browser is checking in with the Google Admin console but has not received a new cloud computer policy setting that was recently deployed. During the investigation, the administrator deletes the Chrome browser from the Google Admin console. What action can be taken to have the browser re-enroll in the Google Admin console?

- **A. Delete the device management token from the device and relaunch Chrome**
- B. Delete the Chrome Policies from the device and reboot
- C. Delete the enrollment token from the device and relaunch Chrome
- D. Delete the Chrome Browser Cache and sign back in to Chrome

**Answer: A**

Explanation:

When a managed browser is deleted from the Google Admin console, it needs to be re-enrolled to receive policies again. The

process for re-enrollment typically involves deleting the **\*\*device management token\*\*** from the local machine. Upon relaunching Chrome, the browser will detect the absence of the token and attempt to re-enroll with the cloud management service, at which point it will receive a new token and the latest policies. Deleting the enrollment token (option B) might disrupt the initial enrollment if it still existed.

Deleting Chrome policies (option C) might not trigger re-enrollment. Clearing the cache and signing back in (option D) addresses user profile data, not device enrollment.

#### NEW QUESTION # 39

A user reports having frequent issues accessing corporate pages and logging into corporate applications. After looking into user reports, it is determined that other users have reported similar issues over the past few months. While the broader investigation is launched to identify and resolve the root cause, which Google Admin remote actions for managed Chrome browsers can be used to help alleviate such issues for the user?

- **A. Clear Cache; Clear Cookies; Clear Cache and Cookies**
- B. Clear Cache and Cookies; Delete Temporary Files; Restart User Session
- C. Clear Cookies; Restart Browser; Logout User
- D. Clear Cache; Delete Temporary Files; Delete Swap File

**Answer: A**

Explanation:

Clearing the browser's cache and cookies is a common first-line troubleshooting step for issues related to website access and login problems. Outdated or corrupted cached data and cookies can often interfere with website functionality and authentication processes. The Google Admin console provides remote actions to "Clear Cache," "Clear Cookies," or both. Options B, C, and D include actions that are either more disruptive (restart browser, logout user, restart user session) or not standard remote actions available for managed Chrome browsers through the Admin console (delete temporary files, delete swap file).

#### NEW QUESTION # 40

A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles. Company

- Employees
- Users
- Contractors

If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Users OU
- B. Create a Managed Browsers OU nested under the Contractors OU
- C. Create a Managed Browsers OU nested under the Employees OU
- **D. Create a Managed Browsers OU nested under the Company OU**

**Answer: D**

Explanation:

To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply policies at the user profile level), creating a separate OU at the top level (under "Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same managed browser.

#### NEW QUESTION # 41

The security team requires Chrome to be updated on computers that only have intranet access with no available internet connectivity. These computers cannot be restarted, and Chrome is not updating. How can Chrome be updated?

- A. Use force relaunch after period
- B. Run auto-update.
- C. Use a target version
- **D. Run the Chrome installer**

**Answer: D**

Explanation:

For machines with no internet connectivity, automatic updates will not work. The only way to update Chrome in this scenario is to manually run the Chrome installer with an updated version obtained through an alternative method (e.g., downloaded on a connected machine and transferred). Auto-update requires internet access, setting a target version only dictates the desired version for automatic updates, and force relaunch requires an update to be downloaded first.

## NEW QUESTION # 42

.....

As a professional website, PracticeVCE offers you the latest and valid Chrome-Enterprise-Administrator test questions and latest learning materials, which are composed by our experienced IT elites and trainers. They have rich experience in the Google actual test and are good at making learning strategy for people who want to pass the Chrome-Enterprise-Administrator Practice Exam.
